## The Access 3 Key System

The patented Access 3 system from Corbin Russwin provides the right level of security for each opening in a facility. Three levels of ANSI/BHMA Grade 1 protection, from patented keyway to UL437 certified, secures every opening. A common key for all three levels of security enhances key control and simplifies administrative procedures. Key blanks are controlled through authorized distribution and geographical protection is available. Available for mortise, rim, component and Large Format Interchangeable Core (LFIC) cylinders, Corbin Russwin offers the right level of access for every door in your facility.

### Benefits

- Patent protection from unauthorized key duplication through 2027
- New keyway family protects system integrity from legacy systems
- Keys are significantly stronger than competitive systems
- User-friendly design with minimal components provides easy field service
- Availability in all existing Corbin Russwin cylinder types provides cost-effective upgrade for Corbin Russwin facilities
- Bump resistance for added protection

**Access 3 - AP** The first level of protection features a utility patented keyway and provides protection against bumping for mortise, rim and component fixed core cylinders. These cylinders easily retrofit into existing hardware and are appropriate for most applications. Keys for AP can only open AP cylinders.

**Access 3 - AS** This level builds on the utility patented keyway of AP and adds patented side bar locking with unique angled bottom pins that provide end users with geographical exclusivity. Cylinders provide protection against bumping and picking. Because of its superior key control and patent protection until 2027, AS cylinders are recommended for use in conjunction with AHS for new installations or when retrofitting systems.

**Access 3 - AHS** The highest level of security for the Access 3 key system. AHS combines utility patented keyway, side bar locking with unique angled bottom pins that provide end users with geographical exclusivity, and adds certification to UL437. AHS cylinders are classified as high security because of their superior resistance to physical attack and protection against unauthorized key duplication. Because of its superior key control, patent protection until 2027, and physical strength, we recommend AHS cylinders for new high- security installations or when retrofitting systems. Corbin Russwin also offers anti-vandal and high security locksets that complement AHS cylinders for those openings most vulnerable to attack.

*IMPORTANT: Corbin Russwin Access 3 Product is available with a "0" cut depth for AP systems **only** and it is not available for use in an AS or AHS security level product. If there is a possibility to elevate the AP system to AS or AHS, any master keying expansion requests should be discussed with a Corbin Russwin Key Records team specialist.*

# Specifications & Features

## Features of the Access 3 Key System

	AP	AS	AHS
Utility patented until 2027	X	X	X
Key blank distribution restrictions	X	X	X
Geographic exclusivity		X	X
Bump resistant	X	X	X
Common style pins	X		
Unique angled bottom pins		X	X
Convenient, simple to service	X	X	X
New keyway family and keying specifications from previous Corbin Russwin systems	X	X	X
Can be masterkeyed with all Access 3 levels	X	X	X
Certified to UL437			X

## Product Specifications

All cylinders shall be utility patented, bump resistant and require the use of a patented key. All cylinders shall be available in any of the mortise, rim, key-in-knob/lever, auxiliary locks, padlocks or large format interchangeable core types.

Access 3 offers three distinct security options from which facilities can select the appropriate level of security for any door. Access 3's one key design allows the use of all three locking mechanisms within the same system to be operated with just one key. Access 3 provides the ultimate in key control by simplifying ordering processes and by allowing the system administrator to determine the level of protection for system components. Additional specifications are found on page 20.

### Three levels of security.

Access 3 AP provides a utility patented keyway that protects against unauthorized key duplication until the year 2027 and is constructed to guard against bumping.

Access 3 AS consists of AP's utility patented keyway plus a sidebar and specially designed pins that increases the cylinders security and guards against attempts to be bumped or picked.

Access 3 AHS incorporates all the security features of AP and AS and is also specially constructed to guard against physical attack including drilling. It is certified to UL437.

### Keying Specification

- Access 3 is a factory based key system
- 6 pin cylinders furnished with two nickel silver keys per cylinder. Access 3 cylinders may be furnished uncombined, master keyed, or grandmaster keyed to a specific facility. Double cylinder lock sets keyed alike on both sides will get two change keys total.
- Each level of Access 3 security (AP, AS, AHS) can be operated with just one key design.
- Access 3 systems are independent and cannot be keyed into existing and/or conventional Corbin Russwin master key systems
- Cross keying is not recommended. Key Systems Administration will review all requests and determine if compatible with a secured master key system

### UL 437 Listed

Access 3 AHS cylinders are UL437 Listed. UL437 sets the standard for both drilling and picking resistances.

AHS cylinders are manufactured to include hardened drill resistant inserts in both the plug/barrel and body.

UL437 High Security cylinders are recommended for doors most likely to be physically assaulted, while the use of AP and AS cylinders are more advantageous and less costly for interior doors.

### Patents

Patent pending and/or patent [www.assaabloydss.com/patents](http://www.assaabloydss.com/patents). Access 3 offers patent protection through 2027.

### Product Certifications

ANSI/BHMA A156.5 Grade 1   
E09211 (Mortise)  
E09221 (Rim)  
E09231 (Cylindrical Lock Cylinders)

### Applications

Access 3 is recommended for installations requiring patented key control protection including picking and/or drilling, in one locking system. Access 3 is ideally suited for Educational and Healthcare facilities, Industrial and Commercial buildings.

# System Administration

## Access 3 System Administration

All Corbin Russwin Access 3 key systems must have a signed System Information Document (SID), located in the back of this catalog and available online, for each facility. The SID designates a primary systems administrator for the facility. Unless otherwise indicated by the primary systems administrator by way of a separate specific letter of authorization, all shipments for Access 3 product will go to the shipping address on the Systems Information Document.

All key blanks are to remain in the possession of the facility and must be accounted for. Any factory defect or incorrectly cut keys must be returned to the factory. All damaged or incorrectly field cut keys must be destroyed.

For AS and AHS, specific randomized security codes will be required for each order unless the systems administrator opts out of this feature. For more information, see the Systems Information Document.

## Keyway Administration and Assignment

All keyways will be noted on the master key system biting list. Corbin Russwin Key System Administration will assign all Access 3 keyways. Keyways will be assigned according to facility type, geographic location and keying system specifications. Unless otherwise authorized, all keys will ship directly to the end user. All master key systems will be registered with Key Systems Administration and all bittings will be factory created.

The first order for any new Access 3 key system must be designed by Corbin Russwin Key Systems Administration and must be pinned at the factory. Subsequent orders for new cylinders may be ordered uncombined (except AHS-High Security) and pinned in the field to existing keysets developed by Key Systems Administration.

## Key Control

Key control will be maintained by complying with the Corbin Russwin Security Policy. For a copy, contact Key System Administration or visit our web site at [www.corbinrusswin.com](http://www.corbinrusswin.com). System information and/or systems-related product will be forwarded directly to the owner, unless otherwise indicated by the owner's appointed administrator.

## Authorized Distributors

Corbin Russwin Access 3 is a system based product and is provided through authorized distribution. An authorized distributor may stock and service products upon specific written authorization from the primary system administrator of the facility. Authorized distributors who carry inventory for a specific facility's system must provide valid receipts and disbursements of all products, specifically key blanks/cut keys. All key blanks in the possession of an authorized distributor must be accounted for. Any defective, incorrectly cut or damaged key blanks must be destroyed. Refer to pages 21-22 for a copy of the SID and more information.

# Mortise Cylinders

## Mortise Cylinders

### For use with the following products:

- ML2000 Series mortise locks (including electrified and EAC devices)
- DL3000 and DL4100 deadlocks
- PED/ED5000, PED4000 and ED7000 exit devices
- All ED5000 cylinder dogging, alarm units, delayed egress cylinders

### Access 3 Mortise Cylinders supplied with:

- Solid brass, 6 pin cylinder, 1-5/32" (29mm) diameter
- New keyway family - see page 15 for available keyways.

	A07	756F56	Corbin Russwin	DL4100 Series Deadlocks
	A62	756F58	Corbin Russwin	Mortise Series Master Ring classroom (55) function and inside of vestibule (42) function mortise locksets. CR900 Series Mullion, CRWS700 Series Mullion (Both KRM)
			DORMA	Mortise Locks
	A92	756F62	Corbin Russwin	Concealed vertical rod exit device outside grip handle operators 01 and 02.

# Rim Cylinders

## Rim Cylinders

For use with Exit Devices and Auxiliary Locking Devices

## Access 3 Rim Cylinders supplied with:

- Solid brass, 6 pin cylinder, 1-5/32" (29mm) diameter
- New keyway family - see page 15 for available keyways.
- Surface mounted collar 422F88 furnished when cylinders are ordered with locking devices.
- Supplied with back plate and 2 breakaway screws.

## Rim Cylinders

# Access 3® Key Systems

## PK-30-AP Pinning Kit

The PK-30-AP Kit is used to pin AP fixed and LFIC cylinders. The heavy duty steel kit prevents pins from mixing.

The kit includes:

- 100 each of bottom pins sizes 0-6
- 100 each of build up pins 1-12
- 100 each of master pins sizes 1-6
- 100 each of top pins sizes 1-10
- 100 each of bump resistant pins sizes 4-10
- 100 tumbler springs – part number 763F617
- 25 KIK/KIL/DB spring cover – part number 756F858
- 25 mortise/rim/LFIC spring cover – part number 756F722
- 10 sidebar – part number 763F565
- Tweezer – part number 239F368
- Access 3 Key gauge – part number 756F937

## PK-30-MASTER Master Pinning Kit

The PK-30-MASTER “Master Kit” includes all pins needed to re-pin AP, AS and AHS cylinders.

The kit includes:

- 100 each of angled bottom pins sizes 1-6 (L-R-C)
- 100 each of AP bottom pins sizes 0-6
- 100 each of build up pins sizes 1-12
- 100 each of master pins sizes 1-6
- 100 each of top pins sizes 1-10
- 100 each of bump resistant pins sizes 4-10
- 100 tumbler springs – part number 763F617
- 25 KIK/KIL/DB spring cover – part number 756F858
- 25 mortise/rim/LFIC spring cover – part number 756F722
- 10 Sidebar – part number 756F807

# Key Blanks/Key Sections

## For Multiplex Masterkey Systems (CR keyway family shown)

Nickel silver  
Key Bow type 38

### • Ordering example AP Key Blank:

XXXX-6PIN-38-AP

### • Ordering example AS/AHS Key Blank:

XXXX-6PIN-38-AS60

### • Ordering example Hotel Emergency key (Mortise AP Cylinders)

example: Keyway-6Pin-38-E2-AP

### • Ordering example Hotel Emergency key (Key-in-Lever, AS or AHS Cylinders)

example: Keyway-6Pin-38-E6-AS60

## Back Side Stamping & Options

- Key set (VKC1), standard – unless otherwise indicated
- System registry number will be stamped on master keys unless otherwise indicated
- Concealed key control (CKC2) available on cylinders
- Visual Key Control VKC2 is available for level 1 (AP) only
- Visual Key Control VKC3 and Concealed Key Control CKC3 not available

## Keyway Security

Access 3 keyways will be determined by the supervisor of Key Systems Administration. Assignment will be based on the overall system requirements and geographic location to provide maximum protection to the owner. For security reasons, the keyway profiles are not shown.

## Keyway Group

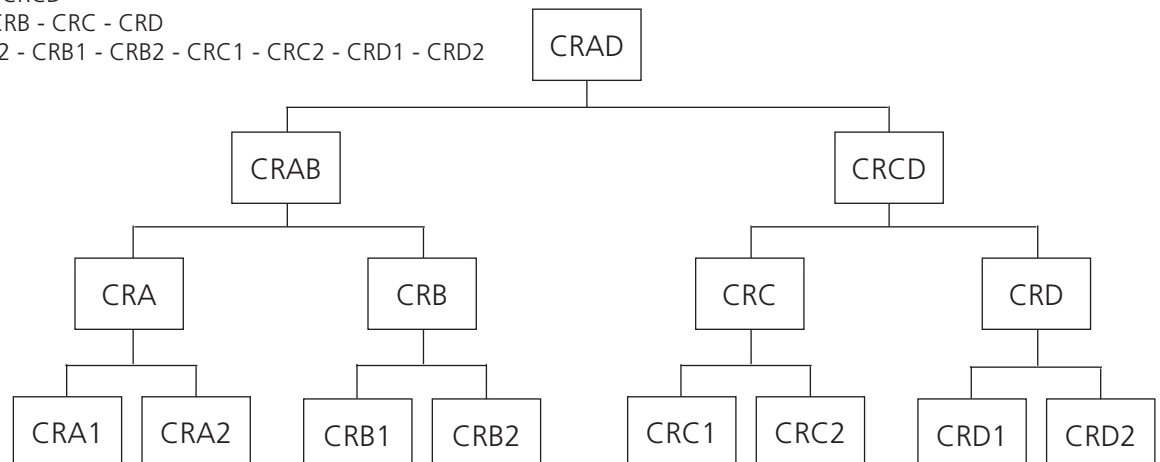

All section – CRAD

Multi-section – CRAB - CRCD

Multi-section – CRA - CRB - CRC - CRD

Keyway – CRA1 - CRA2 - CRB1 - CRB2 - CRC1 - CRC2 - CRD1 - CRD2

Sample Keyway - MB

# Master Keying and Keying Terms

Corbin Russwin requires all orders containing Master Keying details to be submitted using the industry standard Door and Hardware Institute (DHI) ANSI/BHMA format. Key symbols used on a master keyed order require combinations of letters and/or letters and numbers.

For complete details on proper structuring format of key symbols refer to: ANSI/BHMA Standard A156.28, AMERICAN NATIONAL STANDARDS FOR KEYING SYSTEMS; or contact CORBIN RUSSWIN for assistance at 1-800-438-1951.

## Basic Keying Terms

Keys	Abbreviation	Definition
Change key	CK	Individual lock key
Masterkey	MK	Operates any given quantity of cylinders with different key changes
Grand Masterkey	GMK	Operates all individual locks already operated by masterkey(s)
Great Grand Masterkey	GGMK	Operates all locks under the various masterkey(s) and grand master key(s) already established
Construction Master Key	CMK	Operates all cylinders designated for a temporary period during construction
Control Key	CTL	Key to install or remove interchangeable or removable cores
Keyway	KWY	Broaching in a cylinder plug
Key section	KWY	Sidewarding on key to match broaching in plug
Single keyed	SKD	Cylinders operated by their change key only; not operated by any master key

For complete master key system design information and instructions refer to ASSA ABLOY's Master Key System Design Guide.

**The following codes and definitions have been established for specifying cylinder and key stamping for Access 3 cylinders and keys:**

**Note:** All keys will have a key section code. For determining the actual key section contact the factory.

Quick Code	Definition
VKC0	No keyset, registry number, nor bitting stamping on any keys. Includes master keys and change keys. (Keys will be tagged.)
VKC1	Master keys stamped with their keyset symbol and registry number. Change keys stamped with their keyset symbol. (Standard for AP, AS and AHS.)
VKC2	Master Keys stamped with their keyset symbol and registry number. Change keys stamped with their keyset symbol. Cylinders stamped with their keyset symbol on the face of the plug. (Not available for AS and AHS.)
VKC3	Master Keys stamped with their registry number. Change keys stamped with their bitting. Cylinders stamped with their keyset symbol on the face of the plug. (Not available for AS and AHS.)
CKC2	Master keys stamped with their keyset symbol and registry number. Change keys stamped with their keyset symbol. Cylinders stamped with their keyset symbol in a concealed location.
CKC3	Master keys stamped with their registry number. Change keys stamped with their bitting, keyway* and system. Cylinders stamped with their keyset symbol in a concealed location. (Not available for AS and AHS cylinders.)

# Construction Master Keying

## Construction Master Keying (Lost Wafer Design)

Corbin Russwin master keyed Access 3 cylinders can be ordered with the convenience of construction master keying.

Construction master keying simplifies the process when the building gets turned over. With this feature, the cylinder is master keyed with a special construction feature in one of the chambers. The plug is prepped in two places along both sides of the same chamber containing the construction feature. This allows the construction master key to be used during the construction phases.

It is highly recommended that all construction keys are collected and accounted for once the project is complete to protect the integrity of the key system.

Orders to existing key systems that require additional construction master keys are to be specified and ordered separately.

Orders with construction master keying will have all change keys shipped separately from hardware.

Construction master keying is not available with hotel function cylinders or large format interchangeable cores. If construction keying is required for LFIC, specify temporary construction cores, CTAHD or CT6AHR/B/G. See page 5 for complete options.

Cutaway cylinder showing construction master key being used, putting the wafer below the shear line while key is turned. Note the two empty "donut" holes on either side of the chamber.

Change key inserted in cylinder putting the wafer at the shear line.

As **change key** rotates, construction wafer falls into "donut" hole in the side of plug. Only construction wafer will fall due to hole through its center. This voids the construction feature.

Change key rotated to position for extraction.

Construction master key inserted after wafer is trapped. Driver now extends into plug chamber. Construction master key, if used, will not rotate.

# SimpleK Master Key System and Key Management Software

## SimpleK

SimpleK is a flexible and intuitive software program that streamlines and simplifies the complexities of managing master key systems, keys, and facilities. It combines all tools needed by locksmiths, facility managers, security officers, and anyone else involved in the key management processes.

The software provides total key control with audit trails, outstanding keys, overdue keys, tools for the rekeying process, and more. SimpleK software allows you to import maps and floor plans to see who has access to each individual door, the associated keys, and hardware on the opening.

SimpleK allows you to manage keys and keying systems of all sizes and types. This includes: Medeco, Corbin Russwin, ASSA ABLOY ACCENTRA™, SARGENT, ASSA, ABLOY, Schlage®, Best®, and many others.

### Features:

- Advanced tools for locksmithing and key control
- Manage all key systems (unlimited number of records)
- Robust import tools to bring current data into SimpleK
- Interactive floor plans
- Master key system design and expansion
- Key requests, approvals, issuances, and returns workflow
- Cylinders and core pinning (verifies key interchange)
- Door-Key association visualization and rekeying solution
- Easily identify keys, access, and hardware on openings
- Visibility to audit trails and outstanding/overdue keys

### SimpleK – Standard Edition

# Architectural Specifications

## Part 1 – General

### *Keying Schedule;*

- The keying schedule is just as important as the hardware schedule
- The key meeting requirements;

### **Who attends**

Example; "Upon approval of the finish hardware schedule meet with the owner's representative to determine the project's keying requirements. In attendance shall be a Certified Key System Specialist".

### **Administrative documents should be reviewed and executed at this meeting.**

#### *Delivery, Storage and Handling;*

- The delivery & storage of the permanent cylinders, cores, keys, key control software.

#### *Extra Material;*

- Consideration should be given to include additional permanent cylinders, key blanks and key cutting equipment, etc.

## Part 2 – Product

### *Keying: (Corbin Russwin Access 3)*

All cylinders shall be Access 3 by Corbin Russwin. Provide utility patented cylinders that require the use of a patented controlled key. Provide bump resistant fixed core mortise and rim cylinders standard. Except where otherwise specified all locksets, exit devices and cylinders shall be of the same manufacturer. Provide recessed cylinder collars for all mortise and rim cylinders. Establish a new multilevel factory designed secured master key system for this project that will meet the owners requirements for this project and future expansion. All keying shall be done at the factory where permanent records will be established and maintained. Manufacturer to have a minimum of 10 years experience designing secured master key systems and have a published security policy.

Provide a 6 pin multilevel master key system which is comprised of patented controlled keys, security and high security cylinders that can all be operated by ONE key of the highest level. Geographical exclusivity shall be provided for all security and high security cylinders. Provide certified cylinders meeting ANSI/BHMA A156.5-2014 Grade 1. Provide mortise, rim, LFIC and key-in-lever cylinders certified to UL437 where specified.

Provide construction master keying for all fixed core cylinders. Provide temporary keyed cores for all large formatted interchangeable core cylinders. Permanent keys and cores are to be delivered directly to the owner or owner's representative. Provide nickel silver keys with industry standard Visual Key Control stamping on the bow only for each permanent cut key. Furnish keys in the following quantities.

- 1 each top master key for the system(s)
- 4 each Change keys per cylinder or 10 keys per keyed alike group
- 2 each Control keys (if required)
- 2 each Master keys per master key group and/or selective master key
- 2 each Construction control keys (if required)
- 12 each Construction keys
- Provide 1 copy of bitting list to the owner

Where specified AP; provide utility patented controlled keyway cylinders that are furnished with patented keys that are only available from authorized distribution. Provide bump resistant fixed core mortise and rim cylinders standard. Where specified AS; provide utility patented controlled keyway and side bar locking incorporating unique angled bottom pins that provide end users with geographical exclusivity. Cylinders shall be constructed to provide protection against bumping and picking. Where specified AHS; provide utility patented controlled keyway and side bar locking incorporating unique angled bottom pins that provide end users with geographical exclusivity. Cylinders shall be constructed to provide protection against bumping, picking and drilling. Provide mortise, rim, LFIC and key-in-lever cylinders certified to UL437.

### *Specified manufacturer Corbin Russwin Access 3 Key Control*

- Specify Simple K software.

## Part 3 – Execution

Care should be taken to identify the required process of turning over a patented locking system to the owner.

# System Information Document Explanation

## Access 3® and Pyramid System Information Document

System: \_\_\_\_\_AP \_\_\_\_\_AS / AHS \_\_\_\_\_Pyramid

NOTE: System Information Document required for all new systems; see reverse for additional document requirements.

*IMPORTANT: Corbin Russwin Access 3 Product is available with a "0" cut depth for AP systems **only** and it is not available for use in an AS or AHS security level product. If there is a possibility to elevate the AP system to AS or AHS, any master keying expansion requests should be discussed with a Corbin Russwin Key Records team specialist.*

☐ **"OPT-OUT" Option (System Type AS & AHS Only):** By selecting this option I elect not to use the randomized security codes and agree to substitute them with a Letter of Authorization.

# System Information Document

## Access 3® AP and Pyramid Required Administrative Documents:

- Mandatory; all new systems will require a completed System Information Document (orders can not be entered without this document). The fully executed original document will be kept on file at Corbin Russwin.

## Access 3 AS & AHS Required Administrative Documents:

- Mandatory; all new systems will require a completed System Information Document (orders can not be entered without this document). The fully executed original document will be kept on file at Corbin Russwin.
- Subsequent order requirement: A specific randomized security code will be required for each order unless "Opt-Out" has been authorized by the systems administrator.
- If the "Opt Out" option is **NOT** selected
  - o A correct system specific (randomized) security code must be included with each subsequent order.
    - Security codes are specific to each order.
  - o If the shipping address is other than the one listed on the System Information Document, a Letter of Authorization signed by one of the recorded authorized representatives of the facility is required.
  - o Letter of Authorization must contain the same shipping address that appears on the customer's Purchase Order.
  - o Letters of Authorization will not be kept on file at factory.
  - o Without the proper security code, Letter of Authorization, or if the shipping address is other than what's listed on the System Information Document, the order cannot be processed.
- If the System Administrator elects not to use security codes as part of the authorization process, the "Opt Out" option can be authorized by the system administrator.
  - o If the "Opt Out" option **IS** selected
    - A system-specific security code is not required.
    - Letter of Authorization must be signed by one of the facility's authorized representatives.
    - If the shipping address is other than the one listed on the System Information Document, a Letter of Authorization will be required.
    - Letter of Authorization must contain the same shipping address that appears on the customer's Purchase Order.
    - Letters of Authorization will not be kept on file at factory.
