

# Factory Prefinished Doors and Frames

## Products Available

Doors  
KD Frames  
Welded Frames

## Available Colors

25 Standard Colors  
Custom Color Match Available

## Advantages of a CURRIES Factory Finished Door and Frame

Superior coverage and durability – the coating applied at the factory is controlled and offers uniform coverage resulting in a smoother finish

A very green solution - Compliance with LEED EQ 4.1 and 4.2 for VOC levels at jobsite. Waste and solvent disposal is controlled at the factory and meet all of the requirements of the EPA

Less mess and clean-up at the jobsite from the painting process

Lower finishing cost as factory finishing is more efficient than jobsite preparation and painting

Factory baked on electrostatic painting is superior to field sprayed, rolled, or brushed on applications used at jobsites

Faster project completion as the painting process at the jobsite has been eliminated

## Test Standards

Meets ANSI A250.3 test procedure for acceptance criteria for steel doors and frames factory applied finished coatings

HAP (Hazardous Air Pollutant) free

Meets ASTM D1308-02 Chemical Resistance Testing for enhanced cleaning

## Discover the Strength and Beauty of Painted Steel

Curries is one of the few manufacturers with the capability to deliver both custom and standard commercial grade factory prefinished doors and frames. With a Curries prefinished product, a building's project manager has more flexibility to complete the job correctly and on schedule. Factory prefinishing also eliminates their concerns with on-site painting: jobsite mess, and dirt in the paint, toxic-smelling fumes, disposal of solvents and other painting supplies. The Curries prefinish is extremely durable and is factory applied in a controlled environment to ensure consistent and high quality results. The beauty of the finish cannot be matched by application of coatings at the job site.

Consider Curries prefinished products for your next project. All factory paints and application processes are in compliance with strict EPA standards both on the state and national levels.

## Product Options

- Doors up to 4'0" x 10'0" leafs
- KD Frames up to 8'0" x 10'0"
- Welded Frames up to 8'0" x 8'0"

***For more information on the Curries Factory Prefinish option, visit our website at [www.curries.com](http://www.curries.com) or contact a Curries Customer Service Professional.***

Curries pre-finish paint is only available with a gloss rating of 5-15% reflectance using a 60° gloss meter (eggshell-like finish). A maximum gloss rating of 20% reflectance is recommended to reduce show through characteristics on steel doors and frames per ANSI-SDI A250.8 and HMMA 802.
