

StormPro® Multi-Point Exit Tornado Resistant Assembly UL Classified to ICC500 - 2020

Ceco Door
ASSA ABLOY

NEW
Patented
Field Replaceable
Glass

The new factory installed field replaceable glass option enables the glass and kit assembly to be replaced if damaged without the requirement of replacing the door. The new patented design allows for faster and less expensive repairs to the assembly if only the glass is damaged and requires replacement. This will be the standard for glazed assemblies ordered after June 7th 2023.

Ceco Door StormPro® Multi-Point Exit assemblies include glazed and flush paired openings 5'4" x 6'8" minimum through 8'0" x 8'0" maximum with a required mullion. Single glazed and flush openings are available from 3'0" x 6'8" minimum to 4'0" x 8'0" maximum. These StormPro® assemblies give end-users another option for creating highly functional safe rooms with easy means of egress.

The StormPro® Multi-Point Exit assembly helps shield occupants in a safe room from flying debris. The assemblies are UL classified to ICC-500 2020 and comply with FEMA P320 and P361. StormPro® doors are also fire rated up to and including 3 hours. As with all StormPro® products, the third party Underwriters Laboratory certification labels are applied to each assembly.
