About the McKinney Line

McKinney is ASSA ABLOY's line of high quality architectural hinges for commercial use. McKinney joined the ASSA ABLOY family of products in 1996. Under the ASSA ABLOY banner, we have greatly expanded the research and development, and manufacturing capabilities of this product line to have the most impact on improving custom hinge manufacturing.

Custom Manufacturing

A variety of materials and hinge types can be custom manufactured in the Berlin, CT plant, including the ElectroLynx® hinges and Power over Ethernet hinges. For more information on custom manufactured hinges, call McKinney.

Innovation

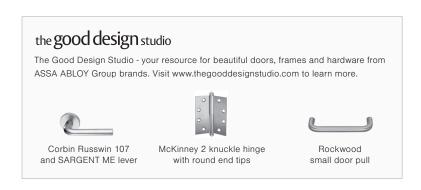

To support today's need for electronic security applications, we have developed a variety of electric hinges used in remote door monitoring and access control systems, and received a patent on the Power over Ethernet (PoE) hinge. In addition, by combining McKinney hinges with other ASSA ABLOY Group products, we can offer StormPro tornado resistant solutions.

Decorative Hinges

The McKinney line of decorative architectural hinges comes with special tips and finishes. Designed to suite with hardware from ASSA ABLOY Group brands, these commercial decorative hinges open up a whole new world of design options for your door openings. See the McKinney Architectural Hinge Brochure for the complete offering.

LEED Certification Contribution

ASSA ABLOY can help to achieve prerequisites and accumulate points in several categories and credit areas of LEED. For further information, please call 1 800 346 7707 or refer to our website www.assaabloydooraccessories.us.

ASSA ABLOY is a member of the USGBC and CaGBC U.S. Green Building Council logo is a trademark owned by the U.S. Green Building Council and is used with permission.

Sales & Support

The McKinney product line is represented by the ASSA ABLOY Door Security Solutions team.

Phone: 1-800-DSS-EZ4U (1-800-377-3948)
Address: 110 Sargent Drive, New Haven, CT 06511

Representative via e-mail by going to www.assaabloydss.com

and clicking on "Sales Support".

Customer Service and Tech Support Representatives are available during regular business hours at 1-800-346-7707 or email customerservice.mckinney@assaabloy.com or techsupport.mckinney@assaabloy.com.

Visit the Architectural Door Accessories website for the most up-to-date catalogs, promo sheets and templates: www.assaabloydooraccessories.us

Order online from the Architectural Door Accessories WebShop: https://accessories.assaabloy.com/
For WebShop assistance call 203-821-5763.

Many popular McKinney products are stocked and ready to ship from warehouses in Ventura, CA and Berlin, CT. In addition, over 400 stock items are included in a 3-day QuickShip Program from the Berlin, CT plant. Details on the QuickShip program are available on the website.

Terms & Conditions

Complete shipment of the order must be accepted by Purchaser within normal lead times. The QUOTE number must be referenced on the order. The QUOTE is null and void if the Purchase Order does not include <u>ALL</u> product lines listed on the QUOTE or if the quantities for an item covered by the QUOTE deviate by <u>10%</u> or more.

Terms are 1% 15 Net 30. A charge of \$50.00 will be made for itemization. A charge of \$25.00 will be made when changes are requested on itemized jobs already processed. No invoice will be rendered for less than \$50.00 net. On non-standard items a 5% over or under run constitutes a complete order.

Freight Policy

For freight policy terms & conditions please click <u>here</u> or see brand price book.

Terms

It is understood that a finance charge may be imposed which is the lesser or one and one-half percent (1 1/2) per month of the highest rate allowed by law on any amount which becomes past due and delinquent. Additionally, the Customer shall be responsible for all collection costs, court costs and reasonable attorney's fees (where allowed by law) in connection with the recovery of any delinquent amount.

Cradit

Acceptance of orders and deliveries thereof shall at all times be subject to our approval of credit.

Shipments

Once in the hands of the transportation company, the Purchaser assumes the risk of loss or damage in transit. All goods are F.O.B. shipping point via the most economical routing, with carrier chosen by us.

Returned Goods

No credit will be issued for returned goods unless such return is authorized. If such authorization is given by us, there will be a minimum handling charge of 45% or \$50.00 which ever is greater, for stock items shipped within a 90 day period from the date of the request.

Cancellations

We are unable to accept cancellations or changes on non-stock and special ordered (s/o) items once processing begins. A charge will be assessed based on manufacturing expense incurred.

Product Warranty

Our products are guaranteed to be free of defects in both workmanship and materials for a period of one year. Any bending, defacing or modification of our product after leaving the factory will void the warranty. Liability shall be limited to the replacement of product or component determined to be defective and shall not include costs arising from removal or reinstallation of product. Cost of replacement shall not exceed original purchase price.

Written notice of damages must occur within the warranty period. A factory generated Return Goods Authorization will be provided as no goods will be accepted without prior approval. These defective goods must be returned to our factory in Berlin, CT, unless specified otherwise. Freight charges must be pre-paid unless noted otherwise.

This guarantee is only valid if the products are specified, applied and adjusted in accordance with the instructions contained in the General Information Section of the McKinney product catalog and on frames and doors that are plumb and square.

Bulk Packed Hinges

We offer bulk packaging on most popular hinges. Hinges arrive ready-to-install with no interior packaging and screws in bulk, which reduces the amount of material to discard. This also saves time, especially on larger installations, as individual boxes do not need to be opened. The packaging is reinforced and holds 48 hinges. In addition, the box is strapped to ensure it arrives intact at its destination.

The program is offered on the hinges listed below in 26D, with other finishes available upon request.

Orders are shipped quickly in 3 days or less.

| No. | Size | Finish | Material | Weight | Bulk Pack Quantity |
|------------|-----------------|--------|----------|--------|-----------------------|
| T2714 | 4-1/2" x 4-1/2" | 26D | Steel | STD | 48 |
| TA2714 | 4-1/2" x 4-1/2" | 26D | Steel | STD | 48 |
| TA2714 NRP | 4-1/2" x 4-1/2" | 26D | Steel | STD | 48 |
| MacPro®: | | | | | |
| MP79 | 4-1/2" x 4-1/2" | 26D | Steel | STD | 48 |
| MPB79 | 4-1/2" x 4-1/2" | 26D | Steel | STD | 48 |
| MPB79 NRP | 4-1/2" x 4-1/2" | 26D | Steel | STD | 48 |

TO ORDER: Add the suffix BP to the part number, for example TA2714 BP 4-1/2 x 4-1/2 26D

Hinge Types

Our broad range of full mortise hinges come in a variety of metals, finishes, sizes, and weights to meet all your load bearing and security applications. They include two, three, and five knuckle styles, swing clear hinges, wide throw hinges, anchor hinges, electric hinges, institutional hinges, and pivots.

ASSA ABLOY hinges conform to Government standards CS9-65 and SDI as well as the following standards approved by the Builders hardware Manufacturers/American National Standards Institute:

ANSI/BHMA Standard 156.1 -

The American National Standard for Butts and Hinges

ANSI/BHMA Standard 156.7 -

The American National Standard for Template Hinge Dimensions

ANSI/BHMA Standard 156.17 -

The American National Standard for Self-Closing Hinges & Pivots

ANSI/BHMA Standard 1156.18 -

The American National Standard for Material and Finishes

Full Mortise Hinges

Our broad range of full mortise hinges come in a variety of metals, finishes, sizes, and weights to meet all your load bearing and security applications. They include two, three, and five knuckle styles, swing clear hinges, wide throw hinges, anchor hinges, electric hinges, institutional hinges, and pivots.

Full Surface Hinges

Choose from regular and swing clear models for heavy weight bearing or standard weight bearing applications in a choice of five knuckle styles are available.

Half Mortise Hinges

Available in a choice of metals, gauges, and sizes for a wide range of door thicknesses. You may specify plain bearing, standard weight bearing, or heavy weight bearing models. Regular and swing clear applications. Five knuckle styles are available.

Half Surface Hinges

Heavy weight bearing, standard weight bearing, and plain bearing hinges are available. Regular and swing clear applications. Five knuckle styles are available.

Security Hinges

Our assortment of electrical security hinges are suitable for a wide variety of control functions. Included are full mortise bearing hinges with either concealed circuitry or concealed switch. In addition, a unique, field-replaceable magnet monitoring hinge, featuring a magnetic reed concealed switch, is available. We also produce full mortise institutional hinges for maximum security installations.

Spring & Specialty Hinges

Included are full mortise single acting hinges. In addition, we produce a variety of hinges for special applications including anchor hinges, wide throw hinges, swing clear hinges, and pocket hinges.

Electric Hinges

To meet today's need for greater security applications, ASSA ABLOY developed a variety of electric hinges used in remote door monitoring and access control systems. These ElectroLynx® Hinges use convenient Molex connectors to make installation quick and simple.

Traditional wired connection electric hinges are available with 28 gauge and 18 gauge wires.

Also available are Magnetic Monitoring Hinges and electrified MK100ME Concealed Hinges.

Miscellaneous

ASSA ABLOY provides a standard duty center hung jamb mount pivot set as well as emergency door stops and strikes.

The most up to date templates are available on the website at www.assaabloydooraccessories.us.

Hinge Bearings

We offer a number of bearing choices. Door weight, height, width, thickness and frequency of operation are all factors in determining the proper hinge.

Oil Impregnated Bearing (TA)

One piece, non-ferrous, and self-lubricating bearings ensure even longer-lasting wear and resistance to clogging, corrosion, and hinge failure. This feature is standard and supplied on all five knuckle bearing hinges up to 5" height. All 6" or larger are Ball Bearing hinges.

Ball Bearing (TB)

Ball bearings are available as an option on all five knuckle bearing hinges up to 5". All 6" hinges or larger are ball bearing as a standard.

Concealed Bearing (TCA)

Concealed, anti-friction type bearings are available on all five knuckle bearing hinges, which provide long-lasting wear and consistency of hinge barrel design.

Note: All three and two knuckle bearing hinges are provided with concealed, anti-friction type bearings (designated TA).

Plain Bearing

This is the designation for non-bearing hinges. Knuckles are machined with bearing-like surfaces to move against one another. These are not recommended for high frequency doors or doors with closing devices. These hinges are not approved for use in labeled openings.

McKinney is a brand associated with ASSA ABLOY Accessories and Door Controls Group, Inc. Copyright © 2012-2025, ASSA ABLOY Accessories and Door Controls Group, Inc. All rights reserved. Hinge Knuckles

Our line includes two, three and five knuckle hinges.

Modern Two Knuckle

This model offers the most security in a standard hinge. The bearing hinges have a concealed stainless steel oil-impregnated bearing. Also, an anti-friction bushing in the door leaf provides additional protection against vertical and lateral wear.

- The Moderne two knuckle hinge is available in stainless steel
- · Standard and heavy weight
- · Pins in all bearing hinges are stainless steel
- Standard hinges are packed with all machine and all wood screws

By design, pins are non-rising, non-removable and tamper protected by a flush, non-removable cap at the end of the barrel. A door cannot be removed when in the closed position, thus affording maximum security. Intermediate hinges can be ordered opposite hand and installed upside down, to inhibit removal of the door in an open position.

- Available non-removable door (NRD) hinges have a dowel in the barrel. One NRD hinge can be ordered per set
- · Two knuckle hinges are handed
- Template hinges are made to conform to U.S. Government standards*

Three Knuckle

Bearing hinges have concealed vertical and lateral thrust twin anti-friction type bearings at both joints.

- Pins in all non-ferrous bearing hinges are stainless steel
- Pins in all ferrous hinges are steel
- Pins in all hinges are non-rising type
- Standard hinges are packed with all machine and all wood screws
- Hinges are reversible for right or left hand except anchor hinges and certain electric hinges
- Template hinges are made to conform to U.S. Government standards*

Five Knuckle

Bearing hinges are furnished with either an oil-impregnated bearing (TA)** or ball bearing (TB). (TA is standard unless TB is specified.) Concealed bearings (TCA) are available.

- Pin stems in all non-ferrous bearing hinges are stainless steel
- Pins in all ferrous hinges are steel
- · Pins in all hinges are non-rising type
- Template hinges are made to conform to U.S. Government standards*

PSF - Prison Safety Feature

A ^{7/16}" diameter stud projects from the back of each leaf which slips into a hole in the hinge reinforcing plates in both the door and the frame. This prevents the hinge from being removed even if the screws have been sheared off. This option is available on the HTA786 steel and HTA386 stainless prison hinge only.

SSF - Safety Stud Feature

A stud attached to the face of one leaf rotates into a cavity in the opposite leaf when the door is closed. This option interlocks the two leaves together, preventing the removal of the door even if the pin is removed.

Available on Five Knuckle Hinges

^{**}Refer to our website at www.assaabloydooraccessories.us for additional information regarding ASSA ABLOY bearings.

^{*}Template hinges are made in sizes, gauges, and with screw holes located to conform to ANSI/BHMA A156.7 and U.S. Government standards CS9-65 and SDI. Templates are available on request.

Hinge Tips

Select tips for additional functionality or to add to the decor.

Button Tips (Standard)

Button Tips and plugs are standard on five knuckle hinges.

Flush Pins (Standard)

Flush pins and plugs are furnished on our two and three knuckle hinges.

Hospital Tips

Hospital tips which feature a one-piece non-removable pin with tapered tips. To order this option prefix our hinge number by "HT". The hospital tip feature by design makes the pin virtually non-removable.

Decorative Tips

Decorative tips enhance the design of your interior. Available for the two or three knuckle hinge in flat, round, grooved or lined tip styles. These hinges are designed to suite with doors and hardware from the ASSA ABLOY Group brands.

Ball Tips

Ball Tips, made of solid brass, are available on five knuckle hinges for a more decorative hinge appearance. To order this option add the suffix "BT" to the hinge number.

Steeple Tips

Steeple Tips, made of solid brass, are available on five knuckle hinges for a more decorative hinge appearance. To order this hinge option, add the suffix "ST" to the hinge number.

McKinney®
ASSA ABLOY

Experience a safer and more open world

Hinge Pins

Pins, by design, are non-rising.

Two Knuckle

Pins on bearing hinges are furnished in stainless steel.

Three Knuckle

Pin stems in all non-ferrous bearing hinges are stainless steel. Pins in all ferrous hinges are steel.

Five Knuckle

Pins on all non-ferrous bearing hinges are stainless steel with button tips.

Pins on all ferrous hinges are steel.

Non-Removable Pins

NRP

A set screw is driven into the barrel of the hinge that is inaccessible when the door is in the closed position. To order, add the suffix "NRP" to the hinge number.

NRD

Two knuckle hinges are available with a non-removable pin which features a dowel which is force fitted into the jamb leaf. When the door is hung, the pin is completely concealed and impossible to remove. One doweled hinge is usually furnished per set of three. To order, add the suffix "NRD" to the hinge number.

Options

Round Corner Option

Furnished as $^{1/4}$ " radius unless specified otherwise. $^{5/32}$ " or $^{5/8}$ " may be specified on full mortise hinges. Specify option "RC".

RCT2714

Applications

This section will seek to address different variations of door, frame and wall conditions which you might encounter in hanging the door and the product solutions offered in the McKinney line.

Included are some of the more common conditions and some of the not-so-common conditions. The focus here will

be on the type of hinge to use within a given door/frame/wall condition. The following examples are not intended to cover every possible situation in which a particular type hinge might be used, but only a representative sampling. Consult the factory for any unusual installation requirements not shown here.

Common Applications

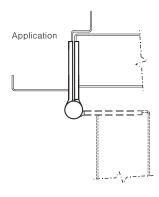

Full Mortise Hinge

The most common application is a flush door/frame/wall condition using a hollow metal frame with a standard hollow metal or wood door which is flush or 1/16" inset from the face of the frame, with a wall which is either flush (or inset from the face of the frame. Recommended to hang door for 180° swing: Full Mortise Hinge. The same hinge could be used with a wood or aluminum frame provided the door/frame/wall conditions are flush.

Note: A fire labeled wood door requires sufficient hinge reinforcement to use this type hinge.

TA2714

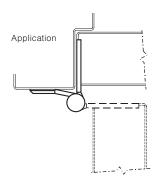

Less Common Flush Door/Frame/Wall Application

Half Mortise Hinge

A hollow metal or wood door with channel iron frame. Recommended to hang door for 180° swing: Half Mortise Hinge.

TA2774

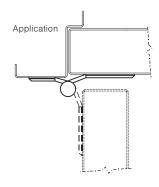

McKinney ASSA ABLOY

Less Common Flush Door/Frame/Wall Application

TA2771

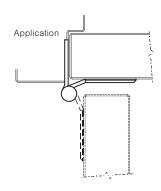

Full Surface Hinge

A fire labeled wood door (without sufficient hinge reinforcement) or a kalamein (metal-clad wood door) with channel iron frame. Recommended to hang door for 80° swing: Full Surface Hinge. On fire labeled wood doors, the door leaf is hung using a back plate with grommet nuts and bolts. Another popular application for this type hinge is a tubular steel gate hung on a channel iron frame.

TA2772

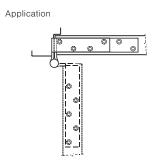

Half Surface Hinge

A fire labeled wood door (without sufficient hinge reinforcement) or a kalamein (metal-clad wood door) with channel iron frame. Recommended to hang door for 180° swing: Half Surface Hinge. On fire labeled wood doors, the door leaf is hung using a back plate with grommet nuts and bolts.

Special Applications

TA792

Anchor Hinge

On high frequency and/or heavy wood or metal doors, additional anchoring of the hinges into the door and jamb may be necessary. This is a common application in schools, hospitals or any other buildings where heavy traffic and unusual strain on the doors, jamb and hinges is experienced. Recommended to hang door for 80° swing: **Full Mortise Anchor Hinge.** Sold in sets of one full mortise anchor hinge and two heavy weight full mortise hinges.

Note: Anchor hinges are handed and sold for either square edge doors on hinge side or beveled (1/8" in 2") edge doors on hinge side. Hand and bevel (McKinney hinges use uses a "5" in front of the item number to indicate 1/8" in 2" bevel. Example: TA5792 should be specified.

Special Applications

Spring Hinge

Some door/frame/wall and even ceiling conditions make door closers impractical. An alternative closing device is the Spring Hinge. Generally, at least two hinges on a door must be spring hinges to provide adequate closing force.

Note: NFPA requires a minimum of two (2) spring hinges on fire labeled doors. With adjustable spring tension on the hinge, the closing speed of the door is determined by the amount of closing force set on the hinge. Spring hinges may not be suitable for applications requiring a closing device with non-critical closing and latching speed adjustments. With respect to meeting ADA requirements for closing devices, carpeting and/or gasketing can interfere with latching.

1502 (Full Mortise Type)

Swing Clear Hinge

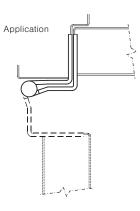

A condition which is common in barrier free openings, and especially in hospitals, is how to remove the door edge from the opening at 90° of swing with flush door/wall/ frame conditions. The solution offered by this hinge is the offset of the hinge barrel to a location along the face of the hinge jamb, thereby removing the door edge and the barrel of the hinge as obstacles in the opening at 90° or more of swing. If the door is beveled on the hinge side, specify the appropriate beveled hinge and handing for your application*.

*Consult individual Swing Clear catalog pages for beveled hinge product numbers.

Electric versions available- QC, CC, CC-18

TA2895

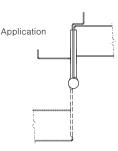

Meets or exceeds ANSI A117.1 - 1986 Providing Accessibility and Usability for Physically Handicapped People

Non-Flush Door/Wall/Frame Applications

TA2798

Wide Throw Hinge

If the door is not flush with the frame, is sitting back in a deep reveal from the face of the frame with or without additional obstacles created by applied trim on the face of the frame or a deeper reveal caused by a projecting wall, and the door is to swing 180°, then a **Full Mortise Wide Throw Hinge** may be used in hanging the door.

Important in this regard is how to calculate the proper width of a wide throw hinge (rounded to the next higher whole number if result is not a whole number: e.g., 6", 7", 8", etc.)

How to Calculate the Proper Wide Throw Hinge Width

 If the door is sitting inside a deep frame reveal with no other obstacles (i.e., projecting trim or wall), add the depth of the reveal (distance from the face of the frame to the face of the door) to the recommended width of hinge used under flush conditions.

Example: A 6" wide (wide throw) hinge would replace a 41/2" wide regular mortise hinge (used under flush conditions) if the depth of the reveal is 11/2".

- 2. If the door is to clear projecting trim or wall and the barrel of the hinge is not obstructed, then calculate as follows:
 - (a) double the size of the door
 - (b) subtract $^{1/2}$ " if the door thickness is less than or equal to $2^{1/4}$ " or subtract $^{3/4}$ " if the door thickness is greater than $2^{1/4}$ "
 - (c) add for the additional depth from the face of the obstruction to the face of the door
 - (d) add for clearance between the door and the face of the obstruction at 180° of swing (generally 1" or more).

If, for instance, you have a 13/4" thick door:

- (a) $1^{3}/_{4}$ " door thickness x 2 = $3^{1}/_{2}$ "
- (b) less 1/2" equals 3"
- (c) plus 3" for the additional depth from the face of the wall to the face of the door equals 6"
- (d) plus 1" for the clearance between the door and the face of the obstruction at 180° of swing equals 7" overall hinge width.

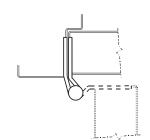

Raised Barrel Hinge

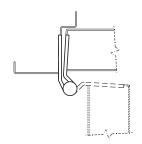

If the door is not flush with the frame but rather is sitting back in a deep reveal from the face of the frame a Full Mortise Raised Barrel Hinge may be used in hanging the door. The solution offered by this hinge is the offset of the hinge barrel away from the hinge jamb. Bevel of door edge should be

Raised Barrel Hinges (RB Prefix) are only available on 5-Knuckle 41/2" x 41/2" Standard and Heavy Weight and 5" x 41/2" Heavy Weight only. The hinges have NRP and are reversible for handing.

Raised Barrel Square Edge Door

Raised Barrel Beveled Edge Door

Pocket Hinge

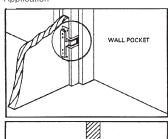

An increasingly popular door, frame and wall condition in corridors is cross-corridor or double egress pairs of doors standing in wall pockets at 90° of swing, so as to be clear of the initial opening and out of the corridor altogether. Solution: Pocket Hinge.

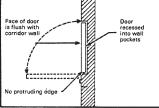

As corridor doors are often fire labeled, the hardware must be approved for use in fire labeled openings. Solution: the McKinney PH-4 Pocket Hinge. UL approved for use on both hollow metal and steel covered composite fire doors rated up to 3 hours and on wood core type fire doors rated 20 minutes.

PH-4

Pivots

Recommended for use on average frequency double acting doors in schools, hospitals, institutions and other public buildings. Not for use on labeled doors and frames.

Quick Reference Chart

| Door, Frame Wall Conditions | Frame Type | Door Type | Hinge Type | Variation of Basic Hinge Type Shown Below (See Note 2) | McKinney Brand Example (See Note 3) |
|--|------------------|---|---------------|---|--|
| Flush* | Wood or Metal | Wood or Metal | Full Mortise | (not applicable) | TA2714 |
| Flush* | Channel Iron | Wood or Metal | Half Mortise | (not applicable) | TA2774 |
| Flush* | Channel Iron | Kalamein or Fire Labeled Wood Door (See Note 1) | Full Surface | (not applicable) | TA2771 |
| Flush* | Metal | Kalamein or Fire Labeled Wood Door (See Note 1) | Half Surface | (not applicable) | TA2772 |
| Flush* | Metal | Heavy and/or High Frequency Wood or Metal | Anchor | Full Mortise | TA792 |
| Flush* | Wood or Metal | Wood or Metal Requiring Alternative Closing Device | Spring | Full Mortise Half Surface | 1502 |
| Flush* | Wood or Metal | Wood or Metal Required to Clear Opening at 90° of Swing | Swing Clear | Full Mortise | TA2895 |
| Deep Frame Reveal | Wood or Metal | Wood or Metal with Maximum Swing of 90° to 110° | Raised Barrel | Full Mortise | RBTA2714 |
| Deep Frame Reveal with or without Trim on the Face of the Frame or a Projecting Wall | Wood or Metal | Wood or Metal with swing to 180° | Wide Throw | Full Mortise | TA2798 |
| Wall Pocket at 90° of swing | Metal | Wood or Metal | Pocket Hinge | (not applicable) | PH-4 |

 $^{^{\}star}$ Includes door and frame conditions of up to $^{1/8}\mbox{\sc "}$ inset.

Notes

- 1. Fire labeled wood door without sufficient hinge reinforcement. Door leaf is hung using back plate with grommet nuts and bolts.
- 2. The four basic hinge types are full mortise, half mortise, full surface and half surface. Variations (i.e. anchor, swing clear, raised barrel, wide throw) are available in the basic types shown above but may not be available in all basic hinge types. Consult individual catalog pages for availability.
- 3. Consult individual catalog pages for available sizes, weights, materials, versions, bearings and finishes. Hinges for doors beveled (1/8" in 2") on hinge side use 5000 series for 3K hinges (e.g. TA5792); use 4000 series for 5K hinges (e.g., TA4895).

Door Weights

The following wood and metal door weights are provided as a convenience to catalog users. They are approximate and will vary slightly among door manufacturers. The weight of the door hardware should be added to the weights listed below. For any thickness not shown, the individual manufacturer's catalog should be consulted.

Door Weights* (Based upon 3' 0" x 7' 0" Door Size)

| Hollow Metal Door Weights by Gauge | | Wood Door Weights by Door Thickness | | |
|------------------------------------|-------------------|-------------------------------------|-------|-------------------|
| Door Gauge — | # Per Square Foot | | | # Per Square Foot |
| 20 Gauge Door | 4 | Door Thickness | 13/8" | 13/4" |
| 18 Gauge Door | 5 | Particle/Mineral Core | 4.75 | 5.25 |
| 16 Gauge Door | 6 | Stave Core Wood | 3.75 | 4.25 |
| 14 Gauge Door | 7 | Hollow Core Wood | 1.3 | 1.5 |

^{*} Weights do not include hardware.

How to Determine the Proper Hinge Width

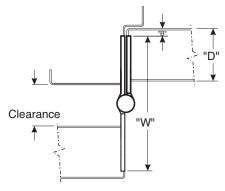

Knowing the door thickness and trim projection, use the following formula for determining minimum hinge width for all full mortise hinges:

- 1. Door thickness
- 2. Backset
- 3. Required Clearance
- 4. Inset

Door thickness - Backset x 2 + Required Clearance + Inset (if applicable) = the proper hinge width

McKinney is a brand associated with ASSA ABLOY Accessories and Door Controls Group, Inc. Copyright © 2012-2025, ASSA ABLOY Accessories and Door Controls Group, Inc. All rights reserved. Reproduction in whole or in part without the express written permission of ASSA ABLOY Accessories and Door Controls Group, Inc. is prohibited.

- D = Door Thickness
- B = Backset
- W = Hinge Width

The table below indicates the trim clearance provided by hinges of specified widths on flush doors, not inset, of standard thickness. For doors of other thicknesses, apply the proper formula.

Trim Clearance

| Door Thickness | Hinge Width | Max Clearance Provided |
|----------------|---------------------------------|------------------------|
| 13/8" | 31/2" | 11/4" |
| | 4" | 13/4" |
| 13/4" | 4" | 1" |
| | 41/2" | 11/2" |
| | 5" | 2" |
| | 6" | 3" |
| 2" | 4 ¹ / ₂ " | 1" |
| | 5" | 1/2 " |
| | 6" | 21/2" |
| 21/4" | 5" | 1" |
| | 6" | 2" |

The hinge widths of half mortise, half surface and full surface hinges are standard, depending on the hinge length. Note that in these hinge types, the amount of clearance available is determined by the amount of offset and not by the hinge width.

Recommended Size of Hinges per Door (Wood or Metal)

| Door Thickness in Inches (mm) | Door Width in Inches (mm) | Hinge Height in Inches (mm) | Hinge Gauge |
|----------------------------------|------------------------------|--------------------------------|-------------|
| 13/8" (35) | Up to 36" (914) | 3 ^{1/} 2" (89) | .123 |
| 13/8" (35) | Over 36" (914) | 4" (102) | .130 |
| 13/4" (44) | Up to 36" (914) | 41/2" (114) | .134 |
| 13/4" (44) | 36" - 48" (914 - 1219) | 5" (127) | .134 |
| 13/4" (44) | Over 48" (1219) | 6" (152) | .160 |
| 2" - 21/2" (51 - 64) | Up to 42" (1067) | 5" (127) HW* | .190 |
| 2" - 21/2" (51 - 64) | Over 42" (1067) | 6" (152) HW* | .203 |

* Heavy Weight hinges should be used on all extra heavy doors or those exposed to high frequency use. Consult the factory for doors wider than 3'0". Five knuckle heavy weight hinges are four bearing. The following gauges of metal may apply:

Heavy weight $4^{1}/2^{11}$ (114) high = .180 gauge

Heavy weight 5" (127) high = .190 gauge

Heavy weight 6" (152) high = .203 gauge

Note: Five knuckle 8" (203) high hinges have six bearings.

Note: On hinge size the dimension shown is the hinge height. Where full mortise or other hinges with two dimensions are used, the first dimension given is always the height. The second dimension is the hinge width when open.

Expected Frequency of Door Operations

| | Expected Frequency* | | |
|-------------------------------|---------------------|-----------|----------|
| Installation Type | Daily | Yearly | |
| Commercial | | | |
| Commercial Store Entrance | 5,000 | 1,500,000 | |
| Office Building Entrance | 4,000 | 1,200,000 | |
| Theater Entrance | 1,000 | 450,000 | _ |
| School Entrance | 1,250 | 225,000 | High |
| School Restroom Door | 1,250 | 225,000 | |
| Store or Bank Entrance | 500 | 150,000 | |
| Office Building Restroom Door | 400 | 118,000 | |
| School Corridor Door | 80 | 15,000 | 9 |
| Office Building Corridor Door | 75 | 22,000 | Average |
| Store Restroom Door | 60 | 18,000 | Á |
| Residential | | | |
| Entrance | 40 | 15,000 | |
| Restroom Door | 25 | 9,000 | Mo |
| Corridor Door | 10 | 3,600 | ĭ |
| Closet Door | 6 | 2,200 | |

^{*} One cycle = one complete opening and closing.

Note: We recommend that bearing hinges be used on all above categories other than "Residential".

Recommended Number of Hinges per Door 3'0" Wide (Wood or Metal)

| Door Height in Inches (mm) | # of Hinges Per Door |
|----------------------------|----------------------|
| Up to 60 (1524) | 2 |
| 60 - 90 (1524 - 2286) | 3 |
| 90 - 120 (2286 - 3048) | 4 |

McKinney is a brand associated with ASSA ABLOY Accessories and Door Controls Group, Inc. Copyright © 2012-2025, ASSA ABLOY Accessories and Door Controls Group, Inc. All rights reserved. Reproduction in whole or in part without the express written permission of ASSA ABLOY Accessories and Door Controls Group, Inc. is prohibited.

Note: An additional hinge is required for each additional 30".

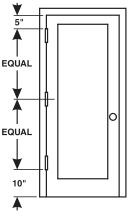

Underwriters' Laboratories Requirements

The requirements of the Underwriters' Laboratories, Inc., for fire door hardware are determined by door label, which in turn is established by the location of the opening. The following are the classifications of Underwriter's Laboratories, Inc.

| Door Situation | Location |
|----------------|--|
| Class A | Fire Walls |
| Class B | Vertical Shafts |
| Class C | Corridor & Room Partitions |
| Class D | Exterior Walls (severe fire exposure) |
| Class D | Exterior Fire Escapes (severe fire exposure) |
| Class E | Exterior Wall (moderate fire exposure) |
| Class E | Exterior Fire Escapes (moderate fire exposure) |

On all public and some private heavy construction three hinges are required for each door. This practice is standard under U.S. Government specifications and is required under most building codes and Fire Underwriters' specifications.

Three hinges assure proper door alignment and enable other hardware to function properly. There is less door warping and less hinge wear. On light wood doors the alignment problem is as great as on heavy doors so less than three hinges should never be considered.

The top of the top hinge should be 5" from the jamb header.

The bottom of the bottom hinge should be 10" from the finished floor.

The center of the center hinge should be equidistant from the other two hinges.

EXCEPTION:

The McKinney Anchor Hinge mounts at the very top of the door. On doors over 7'6" high, four hinges are required.

Table 1 Reference NFPA-80

Table 6.4.3.1 2022 Builders Hardware Mortise, Surface, and Full-Length Hinges, Pivots or Spring Hinges for Swinging Doors

Mortise and Surface Hinges, Pivots or Spring Hinges for Swinging Doors. Doors up to 60" (1.52 m) in height shall be provided with two hinges and an additional hinge for each additional 30" (0.76 m) of door height or fraction thereof. The distance between hinges shall be permitted to exceed 30" (0.76 m). Where spring hinges are used, at least two shall be provided.

| Maximum Do | oor Size | Minimum Hir | nge Size | |

Note: Table 6.4.3.1 lists the most common applications of hinges, spring hinges and pivots. Consult the door and hardware manufacturer's specific listings for applications not addressed in this table.

- 6.4.3* Builders Hardware.
- **6.4.3.1** Hinges and pivots. Hinges, spring hinges, continuous hinges, and pivots shall be as specified in individual door and hardware manufacturer's published listings or Table 6.4.3.1.
- **6.4.3.1.1*** Doors up to 60 in. (1.52 m) in height shall be provided with at least two hinges.
- **6.4.3.1.2** Doors in excess of 60 in. (1.52 m) shall have an additional 30 in. (0.76 m) of door height or fraction thereof, or in accordance with the manufacturer's published listing.
- 6.4.3.1.3 The distance between hinges shall be permitted to exceed 30 in. (0.76 m).
- 6.4.3.1.4 Where spring hinges are used, at least two shall be provided.
- 6.4.3.1.5 All hinges or pivots, except spring hinges, shall be of the ball bearing type.
- **6.4.3.1.5.1** Hinges or pivots employing other antifriction bearing surfaces shall be permitted if they meet the requirements of ANSI/BHMA A156.1, Standard for Butts and Hinges.
- **6.4.3.1.5.2** Spring hinges shall be labeled and shall meet the requirements of ANSI/BHMA A156.17, Standard for Self Closing Hinges & Pivots, Grade 1.
- **6.4.3.1.6** Hinges 4-1/2 in. (114mm high and 0.180 in. (4.57mm) thick) shall be permitted for use on wide and heavy doors or doors that are subjected to heavy use or unusual stress.
- 6.4.3.1.7 Fire doors with hinges of lighter weight that are not of the ball bearing type shall be permitted under the following conditions:
- (1) They are part of a listed assembly.
- (2) They meet the test requirements of ANSI/BHMA A156.1, Standard for Butts and Hinges.
- (3) They have been tested to a minimum of 350,000 cycles.

Reproduced with permission of NFPA from NFPA 80, Standard for Fire Doors and Other Opening Protectives, 2022 edition. Copyright© 2021, National Fire Protection Association. For a full copy of NFPA 80, please go to www.nfpa.org.

Hand of Doors

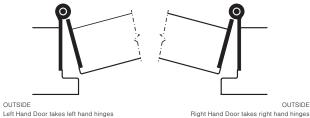

All doors are handed - right or left. The following illustrations indicate clearly this "handing" as it is understood within the hardware industry.

Hand of door is determined from the outside.

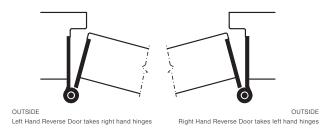

When standing on outside of door and hinges are on the right, it is right hand. When hinges are on the left, it is left hand.

A double acting door opens from you and toward you, therefore it is not called reverse like a single acting door.

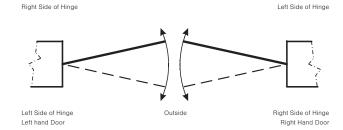

Regular Doors Opening In

Reverse Doors Opening Out

Double Acting Doors

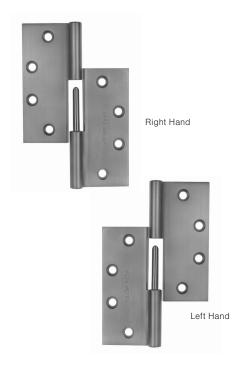

Hand of Hinges

All doors are handed – right or left. The following illustrations indicate clearly this "handing" as it is understood within the hardware industry.

A simple method of determining the hand of all loose joint hinges is to open the hinge full with the countersunk screw holes in view. If the hinge can be held by the right hand leaf and it does not fall apart, it is a right hand (RH) hinge. If the hinge must be held by the left hand leaf to keep it from falling apart, it is a left hand (LH) hinge.

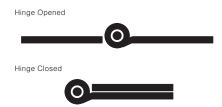

The hand of hinges may be specified by suffixing the symbols RH or LH to the catalog number.

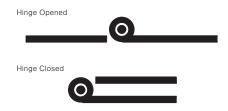

Hinge Swaging

Swaging is the slight offset in the hinge leaves which permits them to close to a parallel position as the door closes.

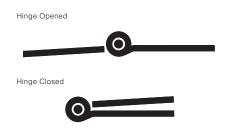

Full Mortise

All hinges for full mortise applications are swaged. Normal swaging on standard and heavy gauge hinges provides a clearance of $^{1/}_{16}$ " when the leaves are parallel.

Full Surface

Hinges for full surface applications are not swaged. Blank hinges are for full surface welded application and are always furnished "flat back" unless specified otherwise when ordered.

Beveled Door

Hinges for beveled door applications have one leaf swaged at an angle of $3^{1/2}$ ° ($^{1/8}$ " in 2") to maintain proper door and frame clearance when doors are beveled on the hinge side. Specify handing on these hinges.

Hinge with One Leaf Swaged

One Leaf Swaged

When only one leaf is swaged, the non-swaged leaf is approximately 1/16" shorter as a standard. For all hollow metal door and frame applications, both leaves must be the same width. On your order, specify "Leaves must be equal".

Hinge with One Leaf Swaged Flat

One Leaf Swaged Flat

When only one leaf is swaged flat, the non-swaged leaf is approximately 3/32" shorter as a standard. For all hollow metal door and frame applications, both leaves must be the same width. On your order, specify "Leaves must be equal".

Screws and Fasteners

Templated Screw Holes

Our hinges are manufactured with templated screw hole locations and tolerances which conform to the American National Standards Institute (ANSI/BHMA A-156.7). We publish a complete listing of templates which list the overall hinge size, material gauge and exact screw hole location. The most current templates are found on our website www.assaabloydooraccessories.us. These templates should be consulted prior to any door or frame preparation.

Machine and Wood Screws

Shown:

- 1. Phillips Head Machine Screw
- 2. Torx Head Machine Screw
- 3. Machined Safety Torx Screw
- 4. Torx Head Wood Screw
- 5. Phillips Head Wood Screw
- 6. Oval Phillips Head Machine Screw with Grommet Nut

Note: Original Self-tapping Torx Screw (MK22209) should be used on installations where customer requires self-tapping screw (some installations might have drilled holes while others might require holes to be drilled)

New Machined Safety Torx Screw (MK22208) should be used on installations where the door and frame are already drilled and tapped.

Finishes

McKinney hinge product finishes meet or exceed the American National Standards for materials and finishes (ANSI/BHMA - A156.18 and BHMA 1301).

Every effort is made to furnish finishes which do comply with the U.S. Standard. However, we cannot guarantee that our finish will match other manufacturers' finish. Where a special finish or a matched finish is required, a sample must be submitted with the order.

MicroShield®

ASSA ABLOY Group companies offer MicroShield®, an antimicrobial coating for door hardware. MicroShield uses proven silver ion-based technology from Agion®, a leading provider of antimicrobial solutions, to stem the spread of bacteria and other microbes.

MicroShield® is a registered trademark of ASSA ABLOY Access and Egress Hardware Group, Inc.

The Agion antimicrobial is not intended as a substitute for good hygiene. Coated products must still be cleaned to ensure the surfaces will be free of destructive microbes. ASSA ABLOY makes no representations or warranties, express or implied, as to the efficacy of the Agion antimicrobial. A copy of the Agion warranty is available upon request. Agion is a registered trademark of Agion Technologies, Inc., Wakefield, MA, USA.

| Stainless Steel | WSP | White Suede Powder Coat |
| Stainless Steel | CPC | Clear Powder Coat |
| Stainless Steel | 32DBIO | MicroShield Agion Antimicrobial |

Note: May not be available on MacPRO or Rescue Hardware.

Product Maintenance & Care

The McKinney line of hinges are manufactured in compliance with all applicable federal and ANSI specifications.

The following are general maintenance tips for providing long life and proper finish appearance.

Hinges must be free swinging without any binding. To align the hinges to prevent binding the use of shims is recommended, if required. If the hinges begin to make noise, remove any binding conditions, grease or lubricate all moving parts, re-mount the hinge and re-adjust the hinge with the proper shims.

The hinges come "greased" from the factory, but should be checked on a regular basis for lubrication. ASSA ABLOY recommends that hinges used in commercial, high frequency applications or in extreme environmental conditions be lubricated annually to ensure long life and quiet operation.

To lubricate our standard hinge, remove the pin and apply a generous coating of lithium grease and reinsert the pin by driving it completely down to the shoulder of the pin head.

Hinges sized properly for the door weight, door size and frequency of use will last for a considerable period of time without maintenance. Hinge screws should be periodically inspected for tightness.

Steel hinges are intended for use on interior applications only. Brass and Stainless steel hinges can be used for either interior or exterior. All steel will eventually rust and all brass will eventually tarnish. To slow down the corrosion/tarnishing process, a clear coat of lacquer is applied on the top surface of the steel or brass materials and the finish surface. Plated finishes receive a clear coating of lacquer to protect against atmospheric conditions.

McKinney stainless steel hinges are made with 304 stainless steel material. Stainless steel is corrosion resistant, but not corrosion proof. Because there is at least 10.5% of chromium in stainless steel hinges, oxidation can occur which could leads to the appearance of "red rust". This red rust could be caused from atmospheric conditions, when hinges are exposed to moist or marine environments, chemical conditions, such as being exposed to high chloride chemicals cleaners, or contact with steel, copper or other foreign materials. Never use steel wool to clean stainless steel hinges. Period cleaning is recommended to avoid seeing red rust on the hinges. We recommend using a general purpose stainless steel cleaner.

Many anti-bacterial cleaners used to clean and sanitize door hardware contain high levels of chlorides which will cause corrosion if not properly rinsed off. For additional corrosion protection, we recommend ordering stainless steel hinges with a clear powder applied over the base metal, (CPC).

Hinges that come painted or plated are in accordance with ANSI/BHMA finishing standards and ASTM B-117 salt spray standards.

Caution should be used when installing the hinges to avoid damage to the painted or plated finish. To remove dirt, the use of a soft damp cloth free any chemicals can be used. Abrasive cleaners or lacquer thinners should not be used to clean the surface of the hinges. To do so will void any warranty of that product.

Five Knuckle Standard Weight Swing Clear Series (Reversible)

TA2395

TA2895

Swing Clear Hinges create barrier free openings by moving the hinge barrel and door edge out of the way.

- · Recommended for use on standard weight, medium frequency doors in schools, hospitals or other public buildings
- Hinge allows for maximum clearance for passage of beds, tables or other equipment through the doorway
- Meets ADA Requirements and ANSI A117.1-1986
- · Pressed steel jambs require no special reinforcing
- Pin is held in place by an NRP set screw, which allows the hinge to be reversible
- For Beveled Edge, where doors are beveled on hinge side, specify TA4895 or TA4395
- For available finishes see page 28

Three Knuckle Heavy Weight Anchor Hinges Series -Concealed Door Closers

Anchor hinge sets are used on doors where high traffic, abuse, or other door hardware place an unusual strain on the door, jamb, and hinges.

- Recommended for use on high frequency and/or heavy wood or metal doors in schools, hospitals or other public buildings where heavy traffic is experienced
- For use with concealed door holders or door closers
- Set includes one anchor hinge and two 5" x 41/2" full mortise hinges
- Sets require handing and are packed with all machine and all wood screws
- The pin is inserted from the bottom of the barrel on the anchor hinge, and is held in place by an NRP set screw
- · Anchor plate for door header only, permits use of holders and closers concealed in the top of the jamb
- · For Beveled Edge, where doors are beveled in hinge side, specify TA5391 or TA5791
- TA391 available in 32D
- TA791 available in 26D

Anchor hinge sets are used on doors where high traffic, abuse, or other door hardware place an unusual strain on the door, jamb, and hinges.

- Recommended for use on high frequency and/or heavy wood or metal doors in schools, hospitals or other public buildings where heavy traffic is experienced
- For use with concealed door holders or door closers
- Set includes one anchor hinge and two 5" x $4^{1/2}$ " full mortise hinges
- · Sets require handing and are packed with all machine and all wood screws
- The pin is inserted from the bottom of the barrel on the anchor hinge, and is held in place by an NRP set screw
- · Anchor plate for jamb header only, permits use of holders and closers concealed in the top of the door
- For Beveled Edge, where doors are beveled in hinge side, specify TA5393
- TA393 available in 32D

Approved for NFPA 80 fire rated openings

For electrification, a fourth hinge is required. Please see the electrified hinges and order separately. QuickConnect (QC), Concealed Circuit (CC), and Magnetic Monitoring (MM) options are available.

Three Knuckle Heavy Weight Anchor Hinge Series - With 4" Door Leg

Anchor hinge sets are used on doors where high traffic, abuse, or other door hardware place an unusual strain on the door, jamb, and hinges.

- Recommended for use on high frequency and/or heavy wood or metal doors in schools, hospitals or other public buildings where heavy traffic is experienced
- Set includes one anchor hinge and two 5" x 4¹/₂" full mortise hinges
- Sets require handing and are packed with all machine and all wood screws
- The pin is inserted from the bottom of the barrel on the anchor hinge, and is held in place by an NRP set screw
- Anchor plate for jamb and door header permits use of surface applied holders and closers
- For Beveled Edge, where doors are beveled in hinge side, specify TA5394 or TA5794
- TA394 available in 32D
- TA794 available in 26D

Five Knuckle Standard Weight Half Mortise Series (Reversible)

Half Mortise Bearing Hinges are for greater frequency and weight than the Plain Bearing hinges.

- · Recommended for use on average frequency and/or medium weight wood or metal doors in schools, hospitals or other public buildings where medium traffic is experienced
- The hinges may be used on channel iron jambs
- The jamb leaf is applied to the surface of the jamb with machine screws. The door leaf is mortised into the edge of the door
- The pin is held in place by an NRP set screw, which allows the hinge to be reversible
- For Beveled Edge, where doors are beveled in hinge side, specify TA4374 or TA4774

Standard Weight Spring Hinge

Recommended for standard weight, medium frequency doors in place of door closers in apartments, hotels, motels, office buildings, etc.

- Full mortise single acting spring hinge
- Spring hinges are an alternative to door closing devices. For maximum performance it is recommended to use all spring hinges on the door.
- This non-handed spring hinge series is adjustable and tension can be added or reduced by means of a hex key that is provided
- Caution: Use of gasketing for smoke or sound protection, wind conditions or unbalanced air pressure, twisted or misaligned frames or doors, door bottoms, improper latch adjustment may prevent doors from latching. Additional spring hinges may be required.
- For available finishes see page 28

MacPro® Adjustable Spring Hinge

MacPro offers contract grade hinges to get the job done right. They are a key player in very competitive jobs, especially in the retrofit arena.

- Recommended for standard weight hinge applications requiring self-closing control, such as apartments, hotels, motels, dormitories, office buildings, etc
- · Spring hinges are an alternative to door closing devices. Generally two hinges on the door must be spring hinges to provide adequate closing force NFPA requires a minimum of two (2) spring hinges on labeled doors
- MPS679 Set of two MPS60 spring hinges and one MPB79 full mortise butt hinge
- · MacPro templated hinges are made to conform to ANSI/BHMA 156.1, 156.7, 156.17
- MPS60 Finishes available: P Prime Coat, 15, 26D, 10BE and BSP
- MPS679 available in 26D

Approved for NFPA 80 fire rated openings

Full Surface Double Acting Door Spring

Simplified method of closing doors.

- This economical series is designed to be surface applied to the door and frame
- · Coil springs made of high grade steel wire
- · Adjustable tension, no special tools required
- · Wrought steel brackets prevent breakage
- · All 450 Series are finished in BSP and are packed with 1x12 wood screws

Single Acting 6" Hinge

Allows the door to automatically return to the closed position.

- Supports one-way door movement
- Barrel design matches older single-action spring pivot hinges
- Adjustable spring tension brings door back to the closed position
- For wood doors
- Non-template, non-hold open
- Commercial grade
- Not compatible with other hinge types; does not align with standard full mortise hinges
- · Packed with all wood screws
- Offered in the finish Prime (P) & Black (B)

6100

Specifications for 6100

| 1001 6" | 75 | 2' 8" | 107 | 3' 0" | 7' 0" |

^{*} Minimum height for weights shown. Hinge capacity decreases as door height decreases. Refer to 6 x 41/2 1001 for 13/4" thick stock hollow metal doors.

Approximate Dimensions in Inches

| A Length of Door Flange (size of hinge) | 3" | 4" | 5" | 6" |
|---|-------------------------|--|--|-----------------------------|
| B Minimum Thickness of Door | 3/4" | 7/8" | 11/8" | 11/4" |
| C Maximum Thickness of Door with Chamfering | 1" | 11/4" | 11/2" | 13/4" |
| D Maximum Thickness of Door without Chamfering for Metal Doors | ^{7/} 8" | 11/8" | 13/8" | 13/4" |
| Door Specifications | | | | |
| Minimum | $^{3}/_{4}$ " x 2'2" to | $^{7}/_{8}$ " x 2'2" to | $1^{1}/_{8}$ " x $2^{1}4$ " to | $1^{1}/_{4}$ " x 2'6" to |
| Maximum | 1" x 2'0" | 1 ¹ / ₄ " x 2'0" | 1 ¹ / ₂ " x 2'2" | $1^{3}/_{4}$ " x $2^{1}4$ " |

It is recommended that three hinges be used on door sizes as indicated above.

The center hinge should be installed as close as possible to the top hinge for maximum support.

Double Acting Spring Hinge

Recommended for use on stock hollow metal or wood doors that are 13/4" thick.

- Door flange designed to fit standard 4¹/₂" x 4¹/₂" template mortise
- 1001 6x4¹/₂

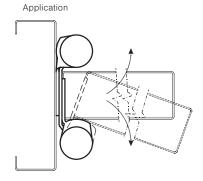

- · Jamb flange surfaced applied to jamb
- Do not use on doors with hinge edge beveled
- Non-handed, non-template
- · Packed with all machine screws and half wood screws
- US26D only

| 1 1 | |
|-----|------------|
| • | ASSA ABLOY |
| | |

| No. | ANSI Cross Reference | Base Material |
|------|----------------------|---------------|
| 1001 | K81151 | Steel |

Specification Schedule for Door 7' High or More

| | Max Doo | r Weight Lbs.* | Locksid | le Clearance* |
|------------|---------|----------------|--------------------------------|--------------------------------|
| Door Width | 2 Each | 3 Each | Flat Edge | Round Edge |
| 2'0" | 96 | 145 | 1/4" | 1/ ₁₆ " |
| 2'2" | 89 | 135 | ³ / ₁₆ " | ¹ / ₁₆ " |
| 2'6" | 77 | 125 | ³ / ₁₆ " | ¹ / ₁₆ " |
| 2'8" | 72 | 115 | 1/8" | ¹ / ₁₆ " |
| 3'0" | 64 | 105 | 1/8" | 1/ ₁₆ " |
| | | | | |

It is recommended that three hinges be used on door sizes as indicated above. These listed weights include a margin of safety. Minimum clearance required on edge of door and frame on lock side. Hinge side clearance, allow 1/4" per door because of jamb flange and hinge body not being mortised. The center hinge should be installed as close as possible to the top hinge for maximum support. Hinge capacity decreases as door height decreases.

^{*} Minimum height for weights shown. Hinge capacity decreases as door height decreases.

Gravity Double Acting Pivot Hinge

Enables the door to open in both directions and automatically return to the center position.

- Recommended for use on double acting saloon doors
- · Mounted to top and bottom of each door
- Door weight closes the door no spring
- Ideal for heavy-duty applications and high-traffic areas
- Hold-open feature that keeps door at a 90-degree angle (H8007)
- · Constructed from heavy-duty commercial grade steel
- US26D finish only
- Easy to install

8007 H8007

Specifications for 8007/H8007

| Base Material | Steel |
|------------------|----------------|
| Door Thickness | 7/8" to 1-5/8" |
| Door Weight Lbs. | 50 |
| Door Width | 30" |
| Door Height* | 5'0" |
| | |

^{*} Maximum height for weights shown. Hinge capacity decreases as gate height decreases.

Non-Adjustable Double Acting Spring Pivot Hinge

Allows swinging door to self-return to center.

- Two parts, door top pivot and door bottom jamb bracket
- Bottom jamb bracket fits doors 1-1/4" wide or larger
- Anti-friction bearing
- Non-handed
- · Provides reliability and strength to the door
- Ideal for swinging doors, half doors, restaurant kitchen doors, and courtroom doors

Specifications for 4007

| Base Material | Zinc |
|------------------|--------------|
| Door Thickness | 1" to 2-1/2" |
| Door Width | 36" |
| Door Weight Lbs. | 75 |
| | |

^{*}Door width and weight are maximums.

Jamb Mount Pivot Set

Recommended for installations on average frequency double acting doors in schools, hospitals, institutions and other public buildings.

- Used in conjunction with CSS-9 Combinations Strike and Stops and DS-6 Emergency Door Stops
- Thrust steel ball bearing in bottom pivot, oil impregnated bronze bearing in top pivot
- Center Hung
- · Mortised into side jamb
- Full mortise top pivot
- Non-handed
- 15/32 radius heel edge of door
- Maximum Door Weight (interior or exterior) up to 125 lbs 3'6" x 8'0"
- All EP-5J Pivot sets are packed with 14 x 1¹/₂" wood screws and ¹/₄-20 x ⁵/₈" machine screws
- Ferrous base pivot set polished and plated 26D

Combination Strike and Stop

Recommended for installations on hospital or nursing home bathroom doors along with our EP-5J. This unit allows center hung or 1/8" inset doors to be opened in both directions without damaging the frame.

- Manufactured for use with cylindrical or bored locks
- · Cannot be used with deadbolts
- Can be manufactured for the following mortise locks:
 - Sargent 7900 and 8200 (no deadbolt function)
 - Corbin Russwin ML2000 (no deadbolt function)
- ASSA ABLOY ACCENTRA™ 8800 (no deadbolt function)
- When ordering, specify lock model and function
- Available in offset or center hung latch bolt location for frame sizes $5^{3/4}$ ", $5^{7/8}$ " and $6^{3/4}$ "
- Custom units available for frame sizes 3¹/₂" to 10" consult factory for availability
- For use on 13/4" thick doors
- · All Combination Strike and Stops are packed with 1/2 x 8-32 machine screws
- Available in brass material polished and plated 26D
- Please provide order form for all CSS-9 orders

CSS-9 Center Hung

Emergency Door Stop

Recommended for installation with our EP-5J pivot in schools, hospitals, institutions and other public buildings. This unit allows center hung or 1/8" inset doors to be opened in both directions without damaging the frame.

- Used to convert double acting doors hung on center pivots to single acting doors
- Emergency release allows door to swing open in the opposite direction
- · Mortise only on frame
- · Latch releases with a touch of the finger
- · Second touch of lever returns latch to original position
- · Available in brass material polished and plated 26D

DS-6

Double Lipped Strike

Recommended for installations on hospital or nursing home bathroom doors along with our EP-5J and DS-6 Emergency Stop. This unit allows center hung or $\frac{1}{6}$ " inset doors to be opened in both directions without damaging the frame.

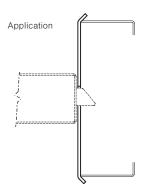

- · Manufactured for use with cylindrical or bored locks
- · Cannot be used with deadbolts
- Can be manufactured for the following mortise locks:
 - Sargent 7900 and 8200 (no deadbolt function)
 - Corbin Russwin ML2000 (no deadbolt function)
 - ASSA ABLOY ACCENTRA™ 8800 (no deadbolt function)
 - When ordering, specify lock model and function
- · Available in offset or center hung
- Latch bolt location for frame sizes 5³/₄ and 6³/₄"
- Custom units available for frame sizes 31/2" to 10". Consult factory for availability
- For use on 13/4" thick doors
- All Combination Strike and Stops are packed with 1/2 x 8-32 machine screws
- · Available in brass material polished and plated 26D

ElectroLynx® Hinge (QC option)

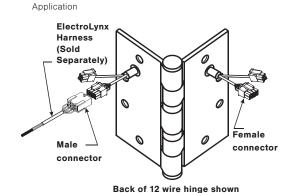

Each hinge features concealed plug connectors that eliminate the need for separate or exposed wiring. Standard connectors make installation quick and simple. Brass eyelets add protection and durability.

- · QC option is available on standard and heavy weight full mortise bearing hinges as well as swing clear and wide throw hinges
- Electric hinges allow a constant flow of current from the power source through the hinge to electrified door hardware
- · No external wires can be seen, eliminating tampering and improving the aesthetics of the door opening
- · Materials: Brass, stainless steel, and steel
- For 4 amp continuous @ 24 volts AC or DC per circuit, 28 gauge multi-strand wires are used
- An 8 position connector is used for QC4 and QC8 wire hinges. An 8 position and a 4 position connector is used for QC12 wire hinges
- Hand of hinge must be specified on two knuckle hinges
- Can be used in conjunction with MM option on most full mortise hinges. QC12 x MM not recommended for wood or solid core doors
- Full Mortise QC hinges are available in most BHMA and McKinney powder coat finishes
- · Wires are coordinated to work with other ASSA ABLOY Group brands electro-mechanical hardware

*Electric hinges should be installed in the center position on the door. Installation instructions are packed with each hinge.

*Hinges are factory tested and specially packaged to minimize against damage during shipment.

ElectroLynx® Retrofit Cables

If you are not ordering ASSA ABLOY Door Group doors with the ElectroLynx® cable pre-installed in the door, you must order an ElectroLynx® retrofit cable to go between ANY hardware and the hinge.

- Includes 3" cables to go from the hinge to an exit device
- Includes a cable that is up to 15' that goes up and around a full lite metal door

QC-C1500P Shown

Custom lengths available.

MacPro® Electric Hinges

MacPro® Electric Hinges connect the power source to electrified door hardware such as locking hardware and exit devices. They are ideal for new construction as well as retrofit 6 and aftermarket applications. The MacPro Electric Hinges feature center exit wires allowing them to replace existing electric hinges with center exit wires.

- MacPro Electric Hinges are easy to install with ElectroLynx® Quick Connect (QC) or Concealed Circuit (CC) connection options
- · Once installed, the wires are concealed to increase security and prevent tampering
- Available in standard and heavy weight
- Brass eyelets on the portal holes prevent chafing, giving the hinge an extended service life
- UL Listed
- Concealed Circuit (CC) is available as CC4 or CC8
- ElectroLynx® Quick Connect (QC) is available with QC4, QC8 or QC12

Concealed Circuit Electric Hinge (CC option)

McKinney Concealed Circuit (CC) electric hinges allow a constant flow of current from the power source through the hinge to electrified door hardware. No external wires can be seen, eliminating disruption of power due to tampering or disconnection, and improving the aesthetics of the opening.

- Allows operation of devices requiring power such as electric locks, electric strikes, and electric latch retraction exit devices
- Wires are contained within the hinge invisible and tamperproof
- Available with most two, three, and five knuckle bearing hinges
- Available with 4, 8 or 12 wires
- Materials: Standard and heavy weight, brass, steel, and stainless steel
- Four amp continuous @ 24 volts AC or DC per circuit 16.0 Amps intermittent duty (pulse) for 300 milliseconds
- CC option has 28 gauge wire
- CC-18 option has 2 18 gauge wires and the remainder 28 gauge wire. Available 2,4,6,8 and 10 wire
- Can be used in conjunction with MM option on most full mortise hinges. CC12 x MM not recommended for wood or solid core doors
- Optional Mortar guard MG-16 available
- Hinges are supplied with 8" (305) leads as standard.
 Extra lengths are available at additional cost

Note: Two knuckle style is handed.

ElectroLynx® Power over Ethernet (PoE) Hinge

The McKinney ElectroLynx® PoE Quick Connect hinge provides for the passing of Ethernet data through the door opening. Installation is a snap with the friendly "plug and play" connectors which allow power to be linked from the incoming source through the door to the electrified hardware. PoE data is bidirectional.

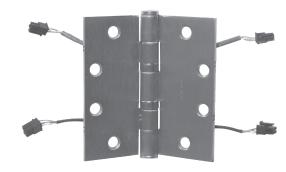

- Brass eyelets add protection and durability to the PoE hinge which features common wire colors coordinated to work with intelligent Power over Ethernet electromechanical hardware from SARGENT and Corbin Russwin
- The PoE hinge should be installed in the second from bottom hinge position on the door. Once installed, it will give no outward indication of its function and will transfer power and data efficiently and reliably, as long as the wire capacity is not exceeded
- All PoE hinges are factory tested and specially packaged to minimize damage during shipment. Installation instructions are packed with each hinge. Along with the PoE hinge, mating PoE door and frame side harnesses are required to complete the opening. The required PoE harnesses must be ordered separately
- Specify suffix PoE

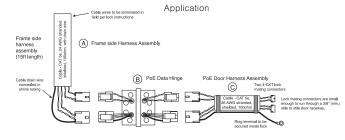

Available on:

ElectroLynx® Power over Ethernet (PoE) Harnesses with RJ-45 Connectors

Connecting ASSA ABLOY Group brands Corbin Russwin and SARGENT next generation Power over Ethernet (PoE) enabled hardware is quick and easy with new ElectroLynx® harnesses from McKinney. Molex connectors connect the hinge to the harness, and a standard RJ-45 connector connects the harness to the electrified door hardware.

The following hardware uses the RJ-45 connectors:

- Corbin Russwin IN220
- Corbin Russwin Access 700 PIP1
- SARGENT IN220
- SARGENT Passport 1000 P1

Harnesses are available with the RJ-45 connector attached or loose in the package. The harnesses range in length from 30" up to 156" with custom lengths available (consult factory).

Magnetic Monitoring Hinge (MM Option)

The McKinney Magnetic Monitoring Hinge is the only system on the market that permits field replacement of magnet and switch. It is a simple, dependable system which defies detection, yet is readily accessible for inspection and easy adjustment.

- MM Electric Hinges should be installed in the center position on doors with three hinges or the second hinge position from the bottom on doors with four hinges
- Neither switch nor operating magnet are attached to the hinge. Non-attachment feature reduces
 the chance of damage during installation. Installation instructions packed with each hinge. All MM
 Electric Hinges are individually factory pre-tested
- The MM feature is available on most two, three and five knuckle full mortise standard and heavy weight hinges. Consult the individual catalog pages for this option feature
- For low voltage (48 volt maximum) .25 Amps AC or DC non-inductive load
- Magnetic reed concealed switch impervious to dirt and moisture
- Can be used in conjunction with QC option on most full mortise hinges up to QC12. QC12 x MM not recommended for wood or solid core doors
- Can be used in conjunction with CC option on most full mortise hinges up to CC12 Wire. CC12 x MM not recommended for wood or solid core doors

Junction Box for Electric Hinges

Recommended for use with our Concealed Circuit Hinges to protect wires. Unit to be installed in middle hinge location.

- Knock-out holes on both ends for wires to pass through
- · Removable cover plate from end brackets
- · Guard supplied assembled for use with electric hinges
- Fits hinge reinforcements for 4¹/₂" or 5" contract grade hinges
- 20 gauge galvanized sheet steel, furnished in 2C finish

StormPro Tornado Resistant Hinges

Built to withstand the extreme wind speeds and flying debris associated with severe weather conditions.

- McKinney StormPro hinges are part of the integrated unit when used with StormPro tornado resistant assemblies from Ceco Door and CURRIES, along with other StormPro hardware by ASSA ABLOY Group brands
- ASSA ABLOY StormPro Assemblies Meet UL Certification for Fire, ICC 500-2014 and FEMA Guidelines
- Use for the common flush door/frame/wall application
- Fire rated thru 3 hours
- · Packed with stainless steel machine screws

Pocket Pivot Hinges

Recommended for applications where use of the full width of the corridor is required, such as cross corridor and smoke and fire doors as well as patient room doors.

- Full Mortise Pocket Pivot Hinge
- Designed to give a flush appearance to the corridor when the door is open
- Recessed into a pocket in the corridor wall
- For single and cross-corridor doors
- Allows the door to lay against the wall with no projection into the opening
- No gap between the door and frame
- When combined with a floor closer, this application has minimum visible hardware and clearances
- Meets material and performance requirements of NFPA-80 and ANSI A-156-1
- Meets or exceeds ANSI A117.1 1986
 Providing Accessibility and Usability for Physically Handicapped People
- Investment cast steel base material (Finish 26D)
- Two thrust bearings for vertical loads
- · Roller bearing for lateral support
- Listed for both hollow metal or steel covered composite fire doors rated up to 3 hours
- · Listed for wood core type fire doors rated 20 minutes
- Non-handed

Raised Barrel Full Mortise Standard and Heavy Weight Hinges

Raised Barrel Hinges are recommended for use where the door is set in a deep reveal.

- · Standard weight raised barrel hinges are recommended for use on average frequency and/or medium weight wood or metal doors where the door is set in a deep revealed frame
- Standard weight raised barrel hinges are supplied with a no hole bottom plug and the pin is held in place by an NRP set screw which allows the hinge to be reversible. Specify RB-TA4714/RB-TA4314 for doors beveled on hinge side
- Heavy weight raised barrel hinges are recommended for use on high frequency and/or heavy wood or metal doors where the door is set in a deep revealed frame
- · Heavy weight raised barrel hinges are supplied with a no hole bottom plug and the pin is held in place by an NRP set screw which allows the hinge to be reversible. Specify RB-T4A4786/RB-T4A4386 for doors beveled on hinge side
- · Door leaf mortised into door
- · Frame leaf may be mortised or surface applied
- Reversible Hinge

Slip-In Full Mortise Type 1 and 2 Standard Weight Bearing Hinges

Recommended for use on average frequency and/or medium weight aluminum doors with aluminum frames in schools, hospitals and other public buildings where medium traffic is experienced.

Type 1

- One leaf has standard punching and countersinking and the other leaf is drilled and tapped so it can be inserted through a slot in the door or frame.
- Both leaves are specially swaged to provide 3/16" clearance between leaves when parallel
- Hinges are handed, indicate hand when ordering.
 LH shown, RH opposite

Type 2

- Both leaves are drilled and tapped so they can be inserted through a slot in the door and frame
- Both leaves are specially swaged to provide 5/16" clearance between the leaves when parallel
- · Hinges are non-handed

Full Mortise Interim Hinges

Recommended for installations where door and frame are prepped for two different size hinges.

- For new or retrofit installations
- An equal amount is trimmed from the top and bottom of the leaf
- Interim hinges are supplied with a no hole bottom plug and the pin is held in place by an NRP set screw which allows the hinge to be reversible
- Available in both standard (TA2714; TA2314) and heavy weight (T4A3786; T4A3386)
- For finishes see page 28

Residential Spring Hinges

Designed for light weight, self-closing doors.

- Made out of residential grade material making it a perfect fit for multi-family housing and similar applications
- Used as an alternative to door closing devices
- · Generally two spring hinges must be used in order to provide the force needed to close the door
- The 3½" hinge is available as the 1552 stainless steel version or the 1502 steel hinge which is offered in a variety of finishes
