MICROSHIELD®

ASSA ABLOY Group companies offer MicroShield®, an anti-microbial coating for door hardware. MicroShield uses proven silver ion-based technology from Agion®, a leading provider of antimicrobial solutions, to stem the spread of bacteria and other microbes.

MicroShield® is a trademark of ASSA ABLOY Access and Egress Hardware Group, Inc.

MICROSHIELD® COATING

- Revolutionary finish coating available on all SARGENT product lines, utilizes a silver-based antimicrobial compound from Agion Technologies
- As an integral part of the finish coating, MicroShield lasts for the life of the hardware
- MicroShield coating permanently suppresses the growth of bacteria, algae, fungus, mold and mildew. It is effective against a broad spectrum of bacteria.
- Non-toxic and completely safe. The Agion antimicrobial compound is EPA and NSF approved and FDA listed for use in medical and food preparation equipment.
- Applications: Anywhere there is need for a clean environment (hospitals, laboratories, schools, medical centers, daycare, food processing etc.)

The Agion antimicrobial is not intended as a substitute for good hygiene. Coated products must still be cleaned to ensure the surfaces will be free of destructive microbes. ASSA ABLOY makes no representations or warranties, express or implied, as to the efficacy of the Agion antimicrobial. A copy of the Agion warranty is available upon request. Agion is a registered trademark of Agion Technologies, Inc., Wakefield, MA, USA.

WARNING

This product can expose you to lead which is known to the state of California to cause cancer and birth defects or other reproductive harm. For more information go to www.P65warnings.ca.gov.

Certifications

CERTIFICATION/COMPLIANCE^{1,2}

ANSI/BHMA	Certified to ANSI/BHMA A156.37 Series 1000 Operational Grade 1 and Security Grade 1 with all standard trims. Note: LFIC (Removable) Cylinders and SFIC Cylinders do not meet Security Grade 1 requirements.
ADA 	Meets A117.1 Accessibility Code. Meets BOMA International 4.13.8 Complies with American Disability Act; Consult local authorities
UL-cUL	UL and cUL listed to US and Canadian safety standards as follows: - 7300: A label 4 x 10 single and 8 x 10 double (3-hour fire doors) and lesser class doors - FM7300 and BL7300: A label 4 x 8 single and 8 x 8 double (3-hour fire doors) and lesser class doors Armored front is stamped with letter F and UL symbol to indicate listing.
Positive Pressure	Meets ANSI/UL 10C, Positive Pressure Fire Test of Door Assemblies
California	California State Reference Code (Formerly Title 19, California State Fire Marshal Standard) All levers with returns comply; levers return to within 1/2" (13 mm) of door face

FLORIDA BUILDING CODE LISTED

UL CERTIFICATION DIRECTORY: ZHEM.R21744 – LATCHING HARDWARE^{1,2}

ANSI/SDI A250.13 (2014)	"Testing and Rating of Severe Windstorm Resistant Components for Swinging Door Assemblies"
ASTM E330 (2002)	"Standard Test Method for Structural Performance of Exterior Windows, Doors, Skylights and Curtain Walls by Uniform Static Air Pressure Difference"*
ASTM E1886 (2005)	"Standard Test Method for Performance of Exterior Windows, Curtain Walls, Doors, and Impact Protective Systems Impacted by Missile(s) and Exposed to Cyclic Pressure Differentials"
ASTM E1996 (2009)	"Standard Specification for Performance of Exterior Windows, Curtain Walls, Doors and Impact Protective Systems Impacted by Windborne Debris in Hurricanes"
(TAS) 201 (1994)	"Impact Test Procedures"*
(TAS) 202 (1994)	"Criteria for Testing Impact and Non-Impact Resistant Building Envelope Components Using Uniform Static Air Pressure"
(TAS) 203 (1994)	"Criteria for Testing Products Subject to Cyclic Wind Pressure Loading"*

* Published in the 7th Edition (2020) "Florida Building Code" (FBC), State Product Approval Number FL2998

WINDSTORM CERTIFICATIONS: UL LISTINGS (AVAILABLE ON BL7300 SERIES AND FM7300 SERIES ONLY)^{1,2}

ASTM E300 (2002)	Standard Test Method for Structural Performance of Exterior Windows, Doors, Skylights and Curtain Walls by Uniform Static Air Pressure Difference
ASTM E1886 (2005)	Standard Test Method for Performance of Exterior Windows, Curtain Walls, Doors, and Impact Protective Systems Impacted by Missile(s) and Exposed to Cyclic Pressure Differentials
ASTM E1996 (2009)	Standard Specification for Performance of Exterior Windows, Curtain Walls, Doors, and Impact Protective Systems Impacted by Windborne Debris in Hurricanes
NFPA80	"Standard for Fire Doors and Other Opening Protectives"

WINDSTORM CERTIFICATIONS: UL LISTINGS (AVAILABLE ON FM7300 SERIES ONLY)^{1,2}

FEMA Publication 361 (2021)	"Safe Rooms for Tornadoes and Hurricanes: Guidance for Community and Residential Safe Rooms" investigated with respect to impact and pressure requirements only.
ICC 500 (2020)	"ICC/NSSA Standard for the Design and Construction of Storm Shelters," investigated with respect to impact and pressure testing. Minimum missile impact speeds vary with the design wind speed desired for a particular product. Table 305.1.1 of ICC 500 correlates design wind speed to the minimum missile speeds.

BLAST TESTING STANDARDS: (AVAILABLE ON THE BL7300 ONLY)^{1,2}

UFC 4-010-01 (2020)	Meets UFC 4-010-01 Unified Facilities Criteria - DoD Minimum Anti-terrorism standards
ASTM 2927-12 (2012)	Meets ASTM 2927-12 Response Categories 1 (no damage) and 2 (damage, but operable)

1. Certifications and testing standards are done to meet assembly requirements, in conjunction with doors from ASSA ABLOY Group companies Ceco Door and Curries.

2. Any retrofit or other field modification to a fire and/or windstorm rated opening can potentially impact the fire rating of the opening, and SARGENT Manufacturing Company makes no representations or warranties concerning what such impact may be in any specific situation. When retrofitting any portion of an existing fire and/or windstorm rated opening, or specifying and installing a new fire and/or windstorm rated opening, please consult with a code specialist or local code official (Authority Having Jurisdiction) to ensure compliance with all applicable codes and ratings.

Introduction & Features

The SARGENT 7300 Series lock is a multi-point lock system, developed to serve a variety of markets and applications. Its sturdy, heavy-duty steel components firmly secure the door within the frame – at top, bottom, and center latch points – fortifying the opening during an event or to provide increased security to openings where needed. This multi-point locking system comes as a complete assembly integrated with Ceco Door and Curries doors and frames and McKinney hinges.

This product line consists of our FM (FEMA), BL (Blast) and standard multi-point locks.

The FM7300 Series is UL-listed for FEMA P-361 (2021), ICC 500 (2020) and Florida Building Code (FBC) capable of withstanding severe wind speeds and flying debris. This lock consists of concealed vertical rods with top and bottom latching complemented by a mortise lock with a latch bolt and deadbolt at the center of the door and an optional indicator to show the status of the top and bottom latches. The lever rotation retracts the top bolt, the bottom bolt, and center bolts simultaneously. When retracted, the bolts are held in position as the door swings. As the door closes, the holdback feature engages the frame and the top, center, and bottom bolts project simultaneously. With the deadbolt thrown, this system protects room occupants from threatening conditions.

The BL7300 Series is designed and equipped to handle a variety of blast and hurricane applications and environments. Perfect for both internal and perimeter settings, the lock helps to minimize the risk of intentional and unintentional accidents. This lock meets ASTM Response Categories 1 and 2, and meets UFC 4-010-01 DoD Minimum Anti-terrorism Standards for Buildings. This multi-point locking system comes as a complete assembly integrated with Ceco Door and Curries Multi-Solution Opening doors and frames and McKinney StormPro® hinges. It is an ideal solution for both the hardening of buildings and hazard prevention.

The standard 7300 Series offers more economical solution, while maintaining the security benefits of a (3) point latching system. A more versatile product offering, it opens up increased functionality from the SARGENT 8200 Series mortise lock to provide solutions for a variety of applications and expand the user interaction capabilities. See the functions and descriptions section for more detail.

INNOVATION

- Unique and robust multi-point deadlocking system engineered to help save lives
- Integrated with doors, frames and hinges to provide an opening that meets tornado and hurricane shelter guidelines, as well as blast resistance

APPLICATIONS

7300 Series

- Used in cases with higher security needs
- Back of retail, dispensaries and residential facilities

FM7300 Series

- Perfect for community refuge areas where people seek protection from strong wind events
- Community shelters and safe rooms, corporate campuses, schools, healthcare facilities, and government facilities

BL7300 Series

- Petrochemical
- Government/Military
- Museums
- Hurricane environments
- Critical Infrastructure

STRENGTH & DURABILITY

- UL 3-hour fire rating
- Extra heavy-duty steel components secure the door to the frame:
 - Multiple locations: top, bottom, and center latch points
- Heavy-duty sectional trim standard
- Fortified with high-tensile alloy fasteners
- Thru-bolted to door for solid attachment

FEATURES

- Utilizes a standard mortise lock, offering a full range of standard mortise lock mechanical functions and electrified options:
 - See function overview chart on page 13.
 - Three latch points project automatically; fourth latch point with a single motion
 - Dogging option allows the lock to operate as a standard mortise lock with a single latch point (Not available with BL7300 Series)
 - Concealed vertical rods for additional security
 - Available with access control options
 - Inswing and outswing applications
 - Concealed vertical assembly (rods, latches and cassette) pre-installed in openings ordered through Ceco/Curries
 - Seven-year warranty

Specifications

7300 SERIES SPECIFICATIONS

Door	1-3/4" thick door only; 7300 Series requires utilizing Ceco Door Medallion and Curries 747 doors and frames and McKinney® hinges
Mounting	Supplied fasteners are for metal doors with through-bolts for trim
Hand	Handed; specify RHR, LHR, RH or LH
Lockbody	Utilizes standard 8200 Series mortise lock
Top Bolt	Adjustable stainless steel 3/4" square bolt with 11/16" engagement; 5/16" steel reinforcement plate
Bottom Bolt	Adjustable stainless steel 3/4" square bolt with 5/8" engagement; 1/4" steel reinforcement plate
Center Bolts	Latchbolt is stainless steel with 3/4" projection. One piece, anti-friction reversible catch. Deadbolt is one piece hardened stainless steel with 1" projection
Lock Front	1/8" steel mortise front reinforced with 13/64" thick lock edge stiffener
Center Bolt Strike	1/4" thick stainless steel
Backset	Lever: 2-3/4" standard; Rods 5-1/4"
Door Thickness	1-3/4" standard
Maximum Opening	Single door 2'8" x 6'8" up to 4'0" x 10'0" and double doors 5'4" x 6'8" up to 8'0" x 10'0" (Double doors require 2-988 surface bolts)
UL Fire Listed	UL 3-hour fire rating
Trim	Multiple sectional and escutcheon mortise trim with Standard or Studio Collection levers
Cylinder	Multiple mortise cylinders

Note: For Certifications see page 3.

Attention: Doors and frames must be ordered through Ceco and Curries in order for certifications to be met. See Door Specifications above for specific product offerings needed to meet assembly requirements. Mortise cassette and rods come pre-installed in previously specified door. If the device is installed in a non CECO door, the "679Kit" rod kit is also required. We are not responsible for poor installation or problems.

Specifications

FM7300 SERIES SPECIFICATIONS

Door	1-3/4" thick door only; FM7300 Series requires utilizing Ceco Door StormPro® 361 and Curries StormPro® 361 doors and frames. McKinney® StormPro® hinges are required when used as a certified tornado solution
Mounting	Supplied fasteners are for metal doors with through-bolts for trim
Hand	Handed; specify RHR, LHR, RH or LH
Lockbody	Utilizes standard 8200 Series mortise lock
Top Bolt	Adjustable stainless steel 3/4" square bolt with 11/16" engagement; 5/16" steel reinforcement plate
Bottom Bolt	Adjustable stainless steel 3/4" square bolt with 5/8" engagement; 1/4" steel reinforcement plate
Center Bolts	Latchbolt is stainless steel with 3/4" projection. One piece, anti-friction reversible catch. Deadbolt is one piece hardened stainless steel with 1" projection
Lock Front	1/8" steel mortise front reinforced with 13/64" thick lock edge stiffener
Center Bolt Strike	1/4" thick stainless steel
Backset	Lever: 2-3/4" standard; Rods 5-1/4"
Door Thickness	1-3/4" standard
Maximum Opening	Single door 2'8" x 6'8" up to 4'0" x 8'0" and double doors 6'0" x 6'8" up to 8'0" x 8'0" (Double doors require 2-988 surface bolts)
UL Fire Listed	UL 3-hour fire rating
Trim	Multiple sectional and escutcheon mortise trim with Standard or Studio Collection levers
Cylinder	Multiple mortise cylinders

Note: For UL & Windstorm Certifications see page 3.

Attention: Doors and frames must be ordered through Ceco and Curries.

See Door Specifications above for specific product offerings needed to meet assembly requirements. Mortise lock and rods come pre-installed in previously specified door.

Specifications

BL7300 SERIES SPECIFICATIONS

Door	1-3/4" thick door only; BL7300 Series requires utilizing Ceco Door and Curries Multi-Solution Opening doors and frames and MCKINNEY® StormPro® hinges
Mounting	Supplied fasteners are for metal doors with through-bolts for trim
Hand	Handed; specify RHR, LHR, RH or LH
Lockbody	Utilizes standard 8200 Series mortise lock
Top Bolt	Adjustable stainless steel 3/4" square bolt with 11/16" engagement; 5/16" steel reinforcement plate
Bottom Bolt	Adjustable stainless steel 3/4" square bolt with 5/8" engagement; 1/4" steel reinforcement plate
Center Bolts	Latchbolt is stainless steel with 3/4" projection. One piece, anti-friction reversible catch. Deadbolt is one piece hardened stainless steel with 1" projection
Lock Front	1/8" steel mortise front reinforced with 13/64" thick lock edge stiffener
Center Bolt Strike	1/4" thick stainless steel
Backset	Lever: 2-3/4" standard; Rods 5-1/4"
Door Thickness	1-3/4" standard
Maximum Opening	Single door 2'8" x 6'8" up to 4'0" x 8'0", Paired doors up to 6.0" x 7.0"
UL Fire Listed	UL 3-hour fire rating
Trim	Multiple sectional and escutcheon mortise trim with Standard or Studio Collection levers
Cylinder	Multiple mortise cylinders

Note: For Certifications see page 3.

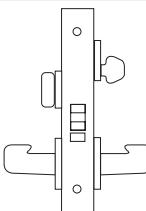

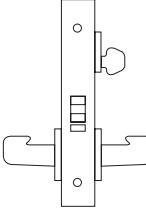

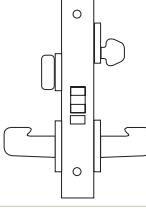

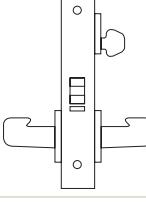

Attention: Doors and frames must be ordered through Ceco and Curries.

See Door Specifications above for specific product offerings needed to meet assembly requirements. Mortise lock and rods come pre-installed in previously specified door.

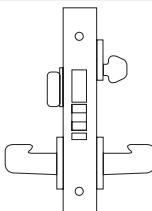

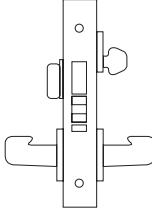

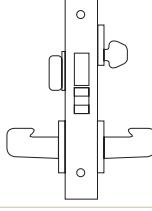

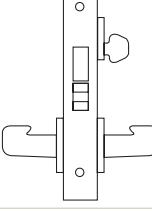

Functions & Descriptions

SINGLE CYLINDER WITHOUT DEADBOLT

Inside/Outside	Series/ Function	Type	ANSI No.	Function Description
	7305	Office or Entry	F04	<ul style="list-style-type: none"> Key outside retracts latchbolt, also locks & unlocks outside trim Trim inside always retracts latchbolt, trim outside remains locked Thumbturn inside locks & unlocks outside trim Auxiliary deadlatch A multi-function lockbody
	7337	Classroom	F05	<ul style="list-style-type: none"> Key outside retracts latchbolt, also locks & unlocks outside trim Trim inside always retracts latchbolt Auxiliary deadlatch A multi-function lockbody
	7356	Office & Inner Entry Lock	—	<ul style="list-style-type: none"> Key outside retracts latchbolt Trim inside always retracts latchbolt and unlocks outside trim Trim outside is locked by thumbturn or key Auxiliary deadlatch

Electrical Functions & Monitoring Options

ELECTRIFIED MORTISE LOCKS WITH STANDARD MONITORING OPTIONS

SARGENT 7300 Series electromechanical mortise locks are designed to handle single opening, stand alone applications, or can be readily integrated into sophisticated access control systems. They meet ANSI/BHMA A156.37 Grade 1 requirements, are UL listed on fire doors, and satisfy industry standards for operating temperature, shock and fire hazard.

FEATURING ECOFLEX® TECHNOLOGY

- Reduces energy consumption up to 92%, as certified by GreenCircle
 - Lower operating costs
 - Assists with load reduction in optimizing energy performance credit in LEED
 - Reduces number of power supplies required
- Field configurable to fail-safe or fail-secure
- Operates from 12-24VDC, offering greater flexibility in system design
- Innovative actuator design provides superior reliability
 - Higher performance and reduced maintenance
 - Ability to have longer cable runs without negatively impacting lock function
 - Reduces risk of voltage drops and eliminates inductive kickback
 - Lower total cost of ownership

ELECTRICAL REQUIREMENTS FOR ELECTROMECHANICAL FUNCTIONS

Voltage: Operates from 12-24VDC Regulated. Full wave rectification installed inside the lockbody.

Current:

- Actuator draw = .015 Amp continuous
- Maximum (2) locks per 1 Amp power supply (1/2 Amp peak current draw)
 - Operating Temp.: Max. 151°F (66°C), Min -31°F (-35°C)
 - UL and CUL listed for use on Fire Doors

Note: Repeated operation at voltage exceeding +/- 10% is not recommended

DX - option — Deadbolt Monitor

- Switch mounted internally in lockbody that indicates deadbolt position
- Available in all deadbolt functions

LX- option - Latchbolt Monitor

- Please contact factory

Description of Functions:

- Fail Safe: Power off, unlocks outside trim
- Fail Secure: Power off, lock outside trim
- Deadbolt projected and retracted by thumbturn only (for non-key override)
- Two switches mounted internally, within lockbody, to monitor lever rotation

HIGH SECURITY MONITORING OPTIONS

Internal End-of-Line Monitoring

Integrated directly into the mortise lock, internal end-of-line resistors monitor the line from the access control panel to the lock. Typically, resistors are installed at the panel or above the door, creating vulnerability between the resistors and the locks. Incorporating resistors within the lock eliminates any risk of undetected tampering or damage, while also reducing installation costs, simplifying specifications, and offering the assurance of a factory installed and tested product.

Select a compatible resistor configuration and add the appropriate prefix to your order string:

- R01 - EOL Mercury and Lenel compatible 1KΩ/2KΩ resistance supervision
- R03 - EOL Software House compatible 1KΩ/2KΩ resistance supervision
- R04 - EOL AMAG compatible 4-state supervision

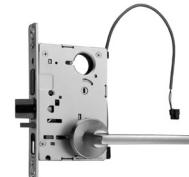

Items of Note:

- All function descriptions are specific to latchbolt and deadbolt operation only.
- The lock must have a deadbolt for a tornado shelter rating.
- Top and bottom rods automatically project when the door is closed and retract when inside or outside lever is turned.
- A dogging indicator can be ordered separately under code 188. A dogging indicator dogs the top/bottom latches so the lock can function as a normal mortise lock. In an emergency, un-dog the rods and the top/bottom latches will engage. Not available on BL version.

WARNING

- **Do not** connect locks to a circuit sharing an additional electromagnetic device as the lock may be damaged
- Transient voltage must be suppressed at the source or before connecting with the lock
- Varistor rated at 35 volts (peak) may be used for transient voltage protection

Note: Opening the lockbody or the actuator replacement in the field by non-authorized personnel voids UL label and lock warranty

ELECTROMECHANICAL FUNCTIONS

No key override with deadbolt			
*Fail Safe	NAC-	BL73	284
Fail Secure	NAC-	BL73	285

Key override with deadbolt			
*Fail Safe	NAC-	BL73	280
Fail Secure	NAC-	BL73	281

*Not offered with FM7300

Access Control Platforms

SARGENT 7300, BL7300, and FM7300 Series multi-point locks can be readily integrated into sophisticated access control systems. They meet ANSI/BHMA A156.37 Grade 1 requirements, are UL listed on fire doors, and satisfy industry standards for operating temperature, shock, and fire hazard.

Below is a list of compatible platforms:

- IN Series (IN120, IN220)
- SN200 (SN200, SN210)

For complete information regarding the compatibility of all 7300 Series multi-point locks with electronic access control devices, reference the individual product catalogs, available in the Partner Area on www.intelligentopenings.com.

SARGENT Electronic Access Control Functions

IN Series		SN Series	
IN120	IN220	SN200	SN210
No Key Override with deadbolt			
Fail Safe	73 BL73	277	284
Fail Secure	73 BL73 FM73		285
Key Override with deadbolt			
Fail Safe	73 BL73	276	280
Fail Secure	73 BL73 FM73		281

Items of Note:

- All function descriptions are specific to latchbolt and deadbolt operation only.
- The lock must have a deadbolt for a tornado shelter rating.
- Top and bottom rods automatically project when the door is closed and retract when inside or outside lever is turned.
- A dogging indicator can be ordered separately under code 188. A dogging indicator dogs the top/bottom latches so the lock can function as a normal mortise lock.
- In an emergency, un-dog the rods and the top/bottom latches will engage. Not available on BL version.

Studio Collection Levers

Studio Collection levers are available in a broad array of designs and finishes allowing for uniformity throughout a facility.

All levers meet ADA compliance for national codes. Visit the online [Decorative Hardware Product Selector](#) to mix and match styles and finishes.

LE1/LE2 Escutcheon Design

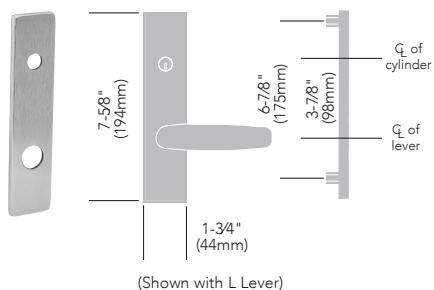

- Cast
- LE1- (2) exposed screws inside
- LE2- (2) concealed screws inside
- LE1 is available with standard & Studio levers
- LE2 is available with standard levers only

**LS Escutcheon Design**

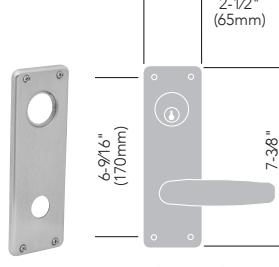

- Forged
- Security trim: cylinder is protected by the escutcheon
- (4) spanner security screws are exposed on inside trim standard
- LS is available with standard levers only

**LE3/LE4 Escutcheon Design**

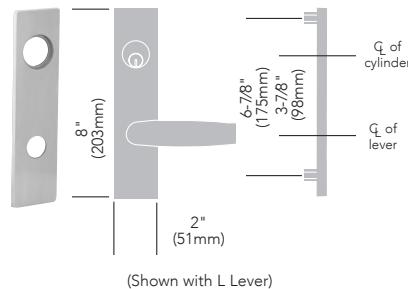

- Concealed cylinder designed escutcheon, exposed barrel only
- Cast
- LE3- (2) exposed screws inside
- LE4- (2) concealed screws inside
- Not available on double cylinder functions
- Only available with #41 size cylinders
 - limited keyway and key system offerings – see "Cylinders" on pages 30-31
- If cylinder is ordered separately, specify 78- for concealed cylinder
- LE3 & LE4 are available with standard levers only
- UL437 not available
- Not available with DG2 & DG3 cylinders

**WT Escutcheon Design**

- Heavy wrought
- Surface mounted both inside and outside
- (4) exposed screws both inside and outside
- WT is available with standard levers only

**LW1 Escutcheon Design**

- Wrought
- (2) exposed screws inside
- LW1 is available with standard levers only

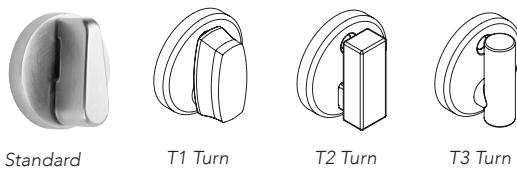

Note: The LS Escutcheon is not available with cylinder options: 10-63-, 11-60-, 11-63-, 11-64-, 60-, 63-, 64-, 70-, 72-, 73-, 65-73-, 65-73-7P-, 73-7P-, 81-, 82-, 83-, 84-, F1-82- & F1-83-

Thumbturn Designs

130KB ROUND BACKPLATE

(Shown with Standard Turn)

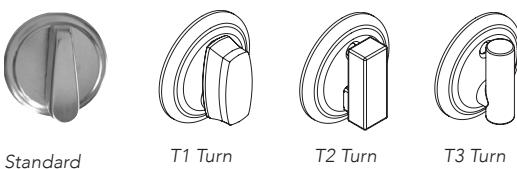

Standard T1 Turn T2 Turn T3 Turn

- Round backplate supplied standard with L, O, LN roses
- Standard turn automatically supplied with sectional trim
- Specify T1, T2, or T3 as an option for decorative turns
- 1-1/2" (38mm) round brass or stainless steel plate

130KT TRADITIONAL BACKPLATE

(Shown with Standard Turn)

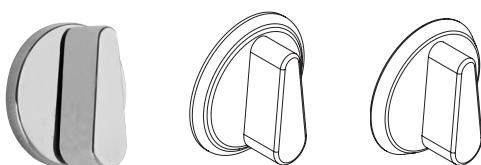

Standard T1 Turn T2 Turn T3 Turn

- Dual radii edge backplate supplied standard with TO and TR roses
- Standard turn automatically supplied with sectional trim
- Specify T1, T2, or T3 as an option for decorative turns
- 1-3/4" (44mm) round brass plate

130LB LARGE ROUND BACKPLATE

(Shown with Large ADA Turn)

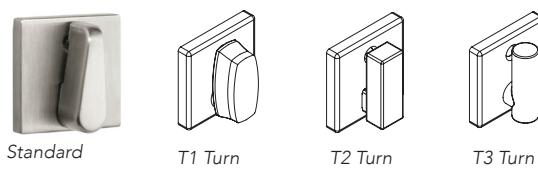

Standard 130LT 130LC

- Available with sectional trim
- 40% larger than standard thumbturn
- Specify LB as an option for ADA turn
- 2" (51mm) round brass, zinc, or stainless steel plate & turn
- 130LT - Traditional backplate, 130LC - Contemporary backplate
- Meets ADA Requirements

130KA SQUARE BACKPLATE

(Shown with Standard Turn)

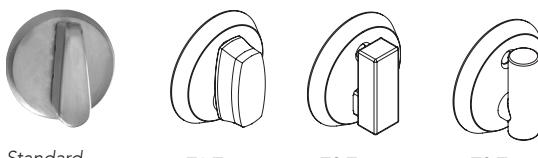

Standard T1 Turn T2 Turn T3 Turn

- Square backplate supplied standard with E, E2, E3, or E4 roses
- Standard turn automatically supplied with sectional trim
- Specify T1, T2, or T3 as an option for decorative turns
- 1-1/2" (38mm) brass or stainless steel plate

130KC CONTEMPORARY BACKPLATE

(Shown with Standard Turn)

Standard T1 Turn T2 Turn T3 Turn

- Beveled edge backplate supplied standard with CO and CR roses
- Standard turn automatically supplied with sectional trim
- Specify T1, T2, or T3 as an option for decorative turns
- 1-3/4" (44mm) round brass or stainless steel plate

Emergency Releases, Indicators & ADA and Handicap Warnings

EMERGENCY RELEASES

184KB Emergency Release

- 1-1/2" (38mm) round brass, bronze, or stainless steel plate
- For 66 and 68 functions only

Studio Collection Emergency Release

- 184KC Emergency Release - Contemporary
- 184KT Emergency Release - Traditional

184KA Emergency Release (used with E rose)

- 1-1/2" (38mm) square brass, bronze, or stainless steel plate
- For 66 and 68 functions only

Emergency Key 14-0057

- Carbon steel
- For 66 and 68 functions only
- Must be ordered separately

INDICATORS

49- Option Occupancy Indicator with Emergency Release

- Ideal for restrooms or conference rooms where easy determination of use needs to be made
- OCC/VAC indicator plate standard, field replaceable Red/White plate included
- Mounts on outside of door
- Not available with escutcheon trim
- Emergency coin operated release standard
- Functions and Roses available:
 - 66, 68 functions with CR, E, L, LN, O & TR roses
- As retrofit, order 185P x finish

185P

50- Option Secured Indicator Rose

- Non-handed with lever and mounting posts field reversible
- VAC/OCC indicator plate standard, field replaceable, red/white plate included
- Mounts on outside of door
- Not available with escutcheon trim
- Available for the following functions:
 - 24, 25 - with rose trim only
- Patent pending design
- For retrofit, order 185S x suffix x finish:
- Suffix Door Thickness
-1 1-3/4" (44mm)

188 Dogging Indicator

- Dogs the top/bottom latches so the lock can function as a normal mortise lock.
- In an emergency, un-dog the rods and the top/ bottom latches will engage.
- Must be ordered with product, see pg 32 for how to order information.
- "Storm Shelter Mode" label is provided for FM7300 Series only
- Not available on BL7300 Series

ADA AND HANDICAP WARNING

Lever Return to Door

- Lever designs J, L, and P
- Lever returns within 1/2" (13mm) of door face or less
- Meets ADA compliance for national codes

Standard Thumturn

- Meets ADA compliance for national codes
- Order as: 130KB, 130KC, 130KT, 130W, or 130KA x finish
- See "Thumturn Designs" on page 22 for design

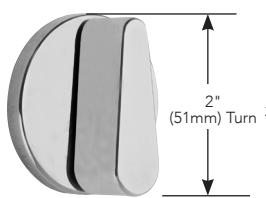

Tactile Handicapped Warning

- Abrasive Coating: options 85-, 86- & 87-
- Milled 1/16" Grooves: options 75-, 76- & 77-
 - B, E, J, L, P, and W Levers - grooves on backside surface of lever
 - F Lever - grooves on top and bottom surface of lever

Keys

- Large key bows are available
- Standard key bows can have attachments added to increase the grip area
- Keys are NOT ADA compliant

N/A	N/A	BN	Brown (leather insert)

[^]Code used to specify Gramercy Series finishes only. Use available finishes list to specify desired finish when ordering.

GRAMERCY LEVER DESCRIPTIONS & AVAILABLE FINISHES

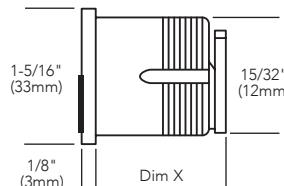

Lever Designation	Lever Description	Available Finishes (AS ORDERED)
RAG	Grooved Insert	3030, 2929, 2930, 3029, 3E3E, BSBS or WWS
RAL	Leather Insert	30BK30, 30BN30, 29BK30, 29BN30, 3EBK3E, BSBKBS, WSBKWS, 3EBN3E, BSBNBS or WSBNWS
RAM	Satin Metal Insert	2930 only (SEE NOTATION)
RAS	Santoprene Insert	30BK30, 29BK29, 3EBK3E, BSBKBS or WSBKWS
RCM	Raised Band	2930, 2929, 3030, 3029, 3E3E, BSBS or WWS
REM	Plain	2930, 2929, 3030, 3029, 3E3E, BSBS or WWS
RGM	Two Grooves	2929, 3030, 3E3E, BSBS or WWS

Notes for Two-tone finishes:

- 2930 Finish: grip of lever is 32D, balance of lever is 32. Rose/escutcheon and lock finish will be 32
- 3029 Finish: grip of lever is 32, balance of lever is 32D. Rose/escutcheon and lock finish will be 32D

Cylinder Lengths (Dim X)

Cylinder No.	41	42	43	46
Dim X Length Under Cylinder Head	1-1/8" (29mm)	1-1/4" (32mm)	1-3/8" (35mm)	1-3/4" (44mm)

DG1, DG2, DG3 – Degree Series

- Utility patented, bump resistant and requires the use of a patented key
- All three locking mechanisms within the same system operated with just one key
- See Degree Key System Catalog for available options

40 Series Type Cylinder

- Cylinder body: Solid brass
- Cap: Brass, bronze, or stainless steel
- All functions take a standard cam
- Standard cam 13-0664

10- Option Signature Series

- The protected system offers the building owner full control over duplication of keys. Highly pick-resistant cylinders
- 10-63- Option - signature cylinder with large format interchangeable cores

11- Option XC Key System

- Patented system works with existing SARGENT keyway adding increased security
- 11- XC standard cylinder
- 11-63- large format interchangeable core
- 11-73- small format interchangeable core

F1-82- and 82- Option KESO

- The system offers the building owner full control over duplication of keys
- Highly pick-resistant cylinders
- Expanded levels of masterkeying
- F1-83- & 83- Option - Keso removable core
- 84- Option - Keso construction core cylinder

51- Option Old Style Removable Core

- Available for **existing systems only** Permanent Removable Cores
- Control key used to remove core, must request control key separately

60- or 70- Option Plastic Construction Core

- For doors that do not require key locking during the construction period
- Operate with coin or flat screwdriver
- For use with LFIC (removable) (60- Option) or SFIC (70- Option) core

63- Option Large Format Interchangeable (Removable) Core

- Allows immediate removal of the core.
- Virtually unlimited key changes
- Available 10-63-, 11-60-, 11-63- & 11-64-
- For disposable core, see 60- Option
- 64- Option- LFIC 6-pin construction core
- Control key used to remove core, must request control key separately

7300B Interchangeable Core

- Small Format Interchangeable Core
- SARGENT interchangeable core cylinders and masterkey systems are available for increased security through quick change of keying. It is unnecessary to remove a cylinder
- SARGENT 7300B interchangeable cores are available in SARGENT 4A and 4B keyways, as well as the following standard competitor keyways: A, B, C, D, E, F, G, H, J, K, L, M
- For disposable core, see 70- Option
- 65-73 Option — 6-pin small format interchangeable cores-uncombined
- 65-73-7P Option — 7-pin small format interchangeable cores-uncombined
- 70- Option — small format interchangeable disposable core
- 72- Option — small format interchangeable construction core
- 11-72- construction core provided for use with 11-7300 cylinder housing
- 11-70- temporary plastic core prepared to accept 11-7300 core
- 73- Option — 6-pin small format interchangeable core, SARGENT 4A, 4B keyways
- 73-7P Option — 7-pin small format interchangeable core, SARGENT 4A, 4B keyways
- Control key used to remove core (provided separately)

120 Series Mortise Turn Piece Cylinders

- Finishes: 4, 10B, 10BE, 32D, BSP
- Turn lever: Brass or bronze
- Cap: Brass, bronze, or stainless steel
- Must be ordered separately
 - 124- Turn Piece
 - 125- Turn Piece
 - 126- ADA Turn Piece
 - 127- Detachable Turn Piece

**78- Option Exposed Barrel**

- Standard for use only with SARGENT escutcheon trims LE3, LE4
- Available 6-pin standard or 7-pin optional
- NOT available with 50-, 60-, 70- or other specialty or higher security options
- See "Cylinder Requirements & Cams" on page 27 for cam required
- Plug finishes: 4, 15 (similar to 26 finish)

**21- Option Lost Ball Construction System**

- The SARGENT construction keying system protects the building owner by providing temporary masterkeying during the construction period

IKA Rosette with sectional trim

- Used with mortise cylinders
- Furnished standard with the E, E2, E3, and E4 roses
- Brass, bronze, or stainless steel
- 1-1/2" (38 mm) Square, includes compression spring
- Projection from door:

1KA-1	5/16" (8mm) - standard
1KA-2	7/16" (11mm)
1KA-3	9/16" (14mm)
1KA-4	11/16" (16mm)
- Finishes: 3, 4, 10, 10B, 10BE, 10BL, 20D, 26, 26D, 32, 32D

**1KB Rosette with sectional trim**

- Used with mortise cylinders and No. 90 blocking rings when cylinders project from door
- Furnished standard with L, O, LN, CO, CR, TO, and TR roses
- Brass, bronze, or stainless steel
- 1-1/2" (38mm) diameter, includes compression spring
- Finishes: 3, 4, 10, 10B, 10BE, 10BL, 20D, 26, 26D, 32, 32D
- Projection from door:

1KB-1	5/16" (8mm) - standard
1KB-2	7/16" (11mm)
1KB-3	9/16" (14mm)

**No. 97 Rosette**

- Standard for cylinders ordered separately from hardware
- Brass, bronze, or stainless steel
- 1-11/16" (43mm)
- 9/32" (7mm) projection, includes compression spring
- Finishes: 3, 4, 10, 10B, 10BE, 10BL, 20D, 32, 32D

**No. 90 Blocking Ring**

- Used with 1KB rosettes as spacer when mortise cylinder projects from face of door
- Brass, bronze, or stainless steel
- Finishes: 3, 4, 10, 10B, 10BE, 10BL, 20D, 26, 26D, 32, 32D

For complete cylinder information, see Cylinders & Components, Signature, Keso, Keso F1 or XC catalogs.

	11-64-	Hardware provided with keyed construction core to accept XC- LFIC (removable), permanent core ordered separately	42, 43, 46
XC- Small Format Interchangeable Cores	11-70-7P-	Hardware to accept XC- SFIC (7-pin) XC- permanent cores, disposable plastic core provided	43 & 46
	11-72-7P-	Hardware to accept XC- SFIC (7-pin keyed construction core provided) cylinder permanent core ordered separately	43 & 46
	11-73-7P-	Hardware provided with XC- small format 7-pin interchangeable core (Includes masterkeying, grand masterkeying)	43 & 46
	11-65-73-7P-	Hardware provided to accept XC- uncombined 7-pin SFIC (permanent) core — (packed loose)	43 & 46
Construction Key System	21-	SARGENT lost ball construction keying for conventional, XC, and Signature Series (N/A with 63- or 73-)	—

Note: Interchangeable core and removable core cylinders do not meet Security Grade 1 requirements

Cylinder Options (continued)

CYLINDER OPTIONS (CONTINUED)

Categories	How to Specify	Detailed Description	Cylinder Sizes Available
Large Format Interchangeable Core	60-	Hardware to accept SARGENT permanent LFIC (removable core), disposable plastic core provided (permanent cores ordered separately)	42, 43, 46
	63-	Hardware provided with LFIC (removable core) cylinder - (Includes masterkeying, grand masterkeying)	42, 43, 46
	64-	Hardware provided with Keyed construction core to accept LFIC (removable) permanent core (ordered separately)	42, 43, 46
Small Format Interchangeable Cores	70-	Hardware to accept 6- or 7-pin SFIC permanent cores, disposable plastic core provided	43 & 46
	72-	Hardware to accept 6- or 7-pin SFIC (keyed construction core provided) cylinder (permanent core ordered separately)	43 & 46
	73-	Hardware provided with 6-pin SFIC (Includes masterkeying, grand masterkeying)	43 & 46
	65-73-	Hardware provided to accept uncombined 6-pin SFIC (permanent) core — (packed loose for field keying)	43 & 46
	65-73-7P-	Hardware provided to accept uncombined 7-pin SFIC (permanent) core — (packed loose for field keying)	43 & 46
	73-7P-	Hardware provided with small format 7-pin interchangeable core (Includes masterkeying, grand masterkeying)	43 & 46
Keso & Keso F1	81-	Hardware provided with housings to accept Keso (83) & Keso F1 (F1-83-) removable cores (permanent cores ordered separately)	172-173,176
	82-	Hardware provided with SARGENT Keso security cylinder	71-73,76
	F1-82-	Hardware provided with SARGENT Keso F1 security cylinder (patented)	71-73,76
	83-	Hardware provided with SARGENT Keso security removable core cylinder	172-173,176
	F1-83-	Hardware provided with SARGENT Keso F1 security removable core cylinder (patented)	172-173,176
	84-	Hardware provided with SARGENT Keso construction cores (permanent cores ordered separately)	172-173,176
Additional Security	BR-	Bump resistant cylinder (available with conventional & conventional XC cylinders only)	—
Less Cylinder	LC-	Less cylinder – SARGENT supplies standard blocking rings for 1-1/8" cylinders (for longer cylinders order collars/rings separately)	—
Schlage Keyways	SC-^	Schlage C keyway cylinder, 0 bitted	#41 Only
	SE-^	Schlage E keyway cylinder, 0 bitted	#41 Only

Cylinder Length	SARGENT Cylinder Sizes	Keso Cylinder Sizes	Keso R/C Cylinder Sizes
1-1/8"	#41	#71	N/A
1-1/4"	#42	#72	#172
1-3/8"	#43	#73	#173
1-3/4"	#46	#76	#176

How To Order

HOW TO ORDER 7300 SERIES MULTI-POINT LOCKS

Options*	Series	Function	Roses/ Escutcheons	Trim	Aux Control	Finish	Hand	Door Height**
For all available options see pages 29-32	7300 FM7300 BL7300	Page 8-15	Pages 18, 21, 22	Levers — pages 16, 17, 19	188	Page 24	RHR	Pages 5, 6, 7

* Multiple options can be selected.

** Door height can be specified to 1/8" increments.

ORDERING EXAMPLES

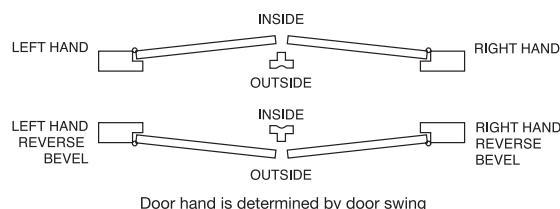

Series	Function	Roses/ Escutcheons	Trim	Aux Control	Finish	Hand	Door Height**
7300 Series Multi-Point Lock	7318	LN	L		26D	RHR	120"
FM7300 Series Multi-Point Lock	FM7324	LE1	MD	188	32D	LH	96"
BL7300 Series Multi-Point Lock	3-BL7339	CO	A		10BE	LHR	7'

* Multiple options can be selected.

** Door height can be specified to 1/8" increments.

Note: This product is part of a complete tornado assembly and must be used with a Ceco Door or Curries door. Concealed vertical rods, top & bottom latches, and the lockbody cassette will be factory installed. All other hardware components are shipped directly to the customer and must be installed by a factory trained installer.

DOOR HANDING

*Multiple options available

7300 SERIES FORTIFIED MULTI-POINT DEADLOCKING SYSTEM

Three-Point Locking System

Three-Point deadbolt locks are engineered for use on inswing and outswing door applications. Concealed, fortified steel construction secures the door to the frame at top, bottom, and center latching points. All three latching points shall be activated with one single motion when the lock is closed and retracted with one single motion for egress.

1. The 7300 Series locking system is part of an integrated door, frame, and hardware assembly listed to the following standards:
 - a. ANSI-BHMA listed to A156.37 Grade 1 for multi-point locks:
 - i. Lever torque to retract all bolts less than 28 in.lb.
 - ii. Cycle tested to 800,000 cycles
 - b. NFPA 80 and NFPA 101 life safety requirements
 - c. UL10B or UL10C, 3-hour fire rated openings
2. Latchbolt construction:
 - a. Center Bolt: one piece, 3/4" throw anti-friction stainless steel latch and one piece, 1" throw, hardened stainless steel deadbolt; 2-3/4" backset standard
 - b. Top and Bottom Bolt: 3/4" x 3/4" square stainless steel latchbolt with 3/4" projection
3. Locks must be able to accommodate sectional rose and lever trim to match the design style and architectural finishes as the balance of the lockset and latches specified:
 - a. 9 roses available
 - b. 54 levers available
 - c. 16 finishes available
4. Locks shall be available in both mechanical and electro-mechanical functions.
5. Independent top and bottom bolt projection shall be field adjustable :
 - a. From the center mortise pocket
 - b. While the door is hung:
 - i. Does not require taking the door down to adjust
6. Bottom strike shall be offset and reversible to accommodate alignment issues due to rough opening tolerances
7. Must be available with access control options for higher or everyday use and traceability:
 - a. IN series (IN120, 220)
 - b. SN (SN200, SN210)

Architectural Specifications

FM7300 SERIES FORTIFIED MULTI-POINT DEADLOCKING SYSTEM

Three-Point Locking System

Three-point deadbolt locks are engineered for use on inswing and outswing door applications at ICC 500 (2020) and FEMA P-361 (2021) storm shelter and safe room locations. Concealed, fortified steel construction secures the door to the frame at top, bottom, and center latching points. All three latching points shall be activated with one single motion when the lock is closed and retracted with one single motion for egress.

1. The FM7300 Series locking system is part of an integrated door, frame, and hardware assembly listed to the following standards:
 - a. UL listed to FEMA P-361 (2015) for inswing and outswing pair and single doors
 - b. UL listed to FEMA P-320 (2014) for inswing and outswing pair and single doors
 - c. UL listed to ICC500 (2014/2020) for tornado shelters for inswing and outswing pair and single doors
 - d. ANSI-BHMA listed to A156.37 Grade 1 for multi-point locks:
 - i. Lever torque to retract all bolts less than 28 in.lb.
 - ii. Cycle tested to 800,000 cycles
 - e. NFPA 80 and NFPA 101 life safety requirements
 - f. UL10B or UL10C, 3-hour fire-rated openings
2. Latchbolt construction:
 - a. Center Bolt: one piece, 3/4" throw, anti-friction stainless steel latch and one piece, 1" throw, hardened stainless steel deadbolt; 2-3/4" backset standard
 - b. Top and Bottom Bolt: 3/4" x 3/4" square stainless steel latchbolt with 3/4" projection
3. Locks must be able to accommodate sectional rose and lever trim to match the design style and architectural finishes specified in the balance of the lockset and latches:
 - a. 9 roses available
 - b. 54 levers available
 - c. 16 finishes available
4. Locks shall be available in both mechanical and electro-mechanical functions.
5. Independent top and bottom bolt projection shall be field adjustable:
 - a. From the center mortise pocket
 - b. While the door is hung:
 - i. Does not require taking the door down to adjust
6. Bottom strike shall be offset and reversible to accommodate alignment issues due to rough opening tolerances
7. Must be available with access control options for higher or everyday use and traceability:
 - a. IN Series (IN120, 220)
 - b. SN (SN200, SN210)
8. Must be available with rod-dogging indicator option:
 - a. Operated by single-point latching for non-emergency or normal use of the space
 - b. Holds rods in retracted state
 - c. Day-to-day operations with mortise lock only
 - d. Indicator to show status

Architectural Specifications

BL7300 SERIES FORTIFIED MULTI-POINT DEADLOCKING SYSTEM

Three-Point Locking System

Three-point deadbolt locks are engineered for use on inswing and outswing door applications. Concealed, fortified steel construction secures the door to the frame at top, bottom, and center latching points. All three latching points shall be activated with one single motion when the lock is closed and retracted with one single motion for egress.

1. The BL7300 Series locking system is part of an integrated door, frame, and hardware assembly listed to the following standards:
 - a. Blast 6.16 psi Category I / Hurricane 150 psf and 50 fps
 - b. Blast 9.74 psi Category II / Hurricane 150 psf and 50 fps
 - c. ANSI-BHMA listed to A156.37 Grade 1 for multi-point locks:
 - i. Lever torque to retract all bolts less than 28 in.lb.
 - ii. Cycle tested to 800,000 cycles
 - d. UL10B or UL10C, 3-hour fire-rated openings
2. Latchbolt construction:
 - a. Center Bolt: one piece, 3/4" throw, anti-friction stainless steel latch and one piece, 1" throw, hardened stainless steel deadbolt; 2-3/4" backset standard
 - b. Top and Bottom Bolt: 3/4" x 3/4" square stainless steel latchbolt with 3/4" projection
3. Locks must be able to accommodate sectional rose and lever trim to match the design style and architectural finishes specified in the balance of the lockset and latches:
 - a. 9 roses available
 - b. 54 levers available
 - c. 16 finishes available
4. Locks shall be available in both mechanical and electro-mechanical functions.
5. Independent top and bottom bolt projection shall be field adjustable:
 - a. From the center mortise pocket
 - b. While the door is hung:
 - i. Does not require taking the door down to adjust
6. Bottom strike shall be offset and reversible to accommodate alignment issues due to rough opening tolerances
7. Must be available with access control options for higher or everyday use and traceability:
 - a. IN Series (IN120, 220)
 - b. SN (SN200, SN210)

The ASSA ABLOY Group is the global leader in access solutions. Every day, we help billions of people experience a more open world.

ASSA ABLOY Opening Solutions leads the development within door openings and products for access solutions in homes, businesses and institutions. Our offering includes doors, frames, door and window hardware, mechanical and smart locks, access control and service.
