To Determine Hand of Door:

Tools Needed:

Included Components

NOTE: Architectural Cover CAN NOT be used for doors swinging over 120° using parallel mount.

NOTES: For special applications a separate door and frame preparation template is packed with these instructions. Use this instruction sheet for installation sequence and closer adjustments only.

- Doors should be hung on ball bearing or anti-friction hinges.
- A separate door stop is recommended.
- Door and frame must be properly reinforced.
- Always adjust spring power before adjusting control.
- Adjust closing time speed between 3 and 7 seconds from 90° to 0°. Greater closing times may be required for elderly or handicapped.
- These door closers should NOT be installed on the exposed side (weather side) of exterior doors.

Closer Adjustments

By law the Americans with Disabilities Act (ADA) may require that door closer installation comply with accessibility guidelines.

The closing force for series 8301 & 8501 door closers is adjustable from a size 1 to a size 6, as outlined in ANSI Standard A156.4. When these series of door closers are installed and adjusted to conform to ADA reduced opening force requirements (5 lbs max.) for interior doors, they may not have adequate closing force to reliably close and latch the door. Power adjustments charted on this page are recommended where possible, to ensure proper door control.

Spring Power Adjustment
(Use 5/16" socket or adjustable wrench for this adjustment)

Adjust Closing Speed Time to between 3 to 7 seconds from 90°. Use of the door by handicapped, elderly or small children may require greater closing time.

Spring Closing Power			Number of Turns Required			
Door	Type of Installation	*	Maximum Door Size			
			34" (86cm)	36" (91cm)	40" (102cm)	48" (122cm)
8101/8301/8501	Interior	Regular Arm Top Jamb	5	8	11	13
		Parallel Arm	7	10	13	16
	Exterior	Regular Arm Top Jamb	7	10	13	16
		Parallel Arm	9	12	15	18

*20 Full (360°) turns maximum available.
Closer is shipped set at mid range setting = 10 turns

Backcheck

Delayed Action
(Optional)

Sweep

Latch

Caution:
Don't completely close valve
