Pemko Residential Threshold

The global leader in
door opening solutions

Applies to the following products:

142, 145, 213

Installation Instructions:

1. Measure width of door opening from jamb to jamb and stop to stop and mark ends of threshold for trimming.
2. Trim ends of threshold to fit around door jambs and stops. Position flat (or top) portion of threshold directly under door. Lower slope should point to the exterior. Follow steps 1 and 2 to install the pan.
3. Drill pilot holes in floor through pre-drilled holes in threshold.
4. Caulk ends of threshold (important for effective sealing and moisture control).
5. Secure threshold to floor with supplied screws. (When fastening to concrete, use anchors; anchors not included.)
6. Caulk around mounting screws as needed.

Testing/Ratings:

Gasketing material for fire doors intended for application to listed steel frames and/or classified steel covered composite type, and hollow metal type fire doors rated up to 3 hours; wood and plastic covered composite type fire doors rated up to 1-1/2 hours; and wood core type fire doors rated up to 20 minutes. (Thresholds may or may not contain gasketing material).
