Rockwood Company History

Rockwood Manufacturing was founded in 1946 by the Gurzenda Family in rural southwestern Pennsylvania. Located in the heart of America's county, the team at Rockwood focuses on the design and manufacturing of quality door hardware for commercial, institutional, and high-end residential buildings.

In our third generation of skilled craftsmen, we develop new products and processes that improve our offering. With strict attention to detail, a selection of top-grade materials, to the application of the finest finishes, the results are durable yet aesthetic products of the highest caliber.

ASSA ABLOY

In 2008 Rockwood Manufacturing Company joined ASSA ABLOY, the global leader in door opening solutions. This partnership significantly increased Rockwood's design and development capabilities and greatly expanded ASSA ABLOY's product offering to our customers. The expansion included the addition of many coordinating products between Rockwood and other ASSA ABLOY Group brands through The Good Design Studio.

When you select a Rockwood stainless steel door pull for your LEED certified building project, you are using a product that is made from a minimum 75% post industrial waste and is 100% recyclable. Additionally, these pulls usually can be refinished to their original appearance any time during the life of the building, eliminating the need for replacement when a renovation is conducted. Because of this, ASSA ABLOY can help to achieve prerequisites and accumulate points in several categories and credit areas of LEED.

ASSA ABLOY is a member of the USGBC and CaGBC

U.S. Green Building Council logo is a trademark owned by the U.S. Green Building Council and is used with permission.

Custom Manufacturing

Design your own hardware! Whether it is a modification of a standard product, a completely unique design, or a custom finish, we will quote your design and offer suggestions for the best mounting applications. We take special pride in our custom products. For more information, please see page 131.

Architectural Finishes

With several architectural finishes to choose from, Rockwood products are finished to the highest quality standards.

	Satin 316 Alloy	US32D316*	—

* Available on select items.

For finish availability by product series, see the Finish Matrix on pages 136-138.

SPECIAL FINISHES DESCRIPTIONS

US32DMS (MicroShield®): ASSA ABLOY Group companies offer MicroShield®, an anti-microbial coating for door hardware. MicroShield uses proven silver ion-based technology from Agion®, a leading provider of antimicrobial solutions, to stem the spread of bacteria and other microbes.

MicroShield® is a registered trademark of ASSA ABLOY Access and Egress Hardware Group, Inc., an ASSA ABLOY Group company.

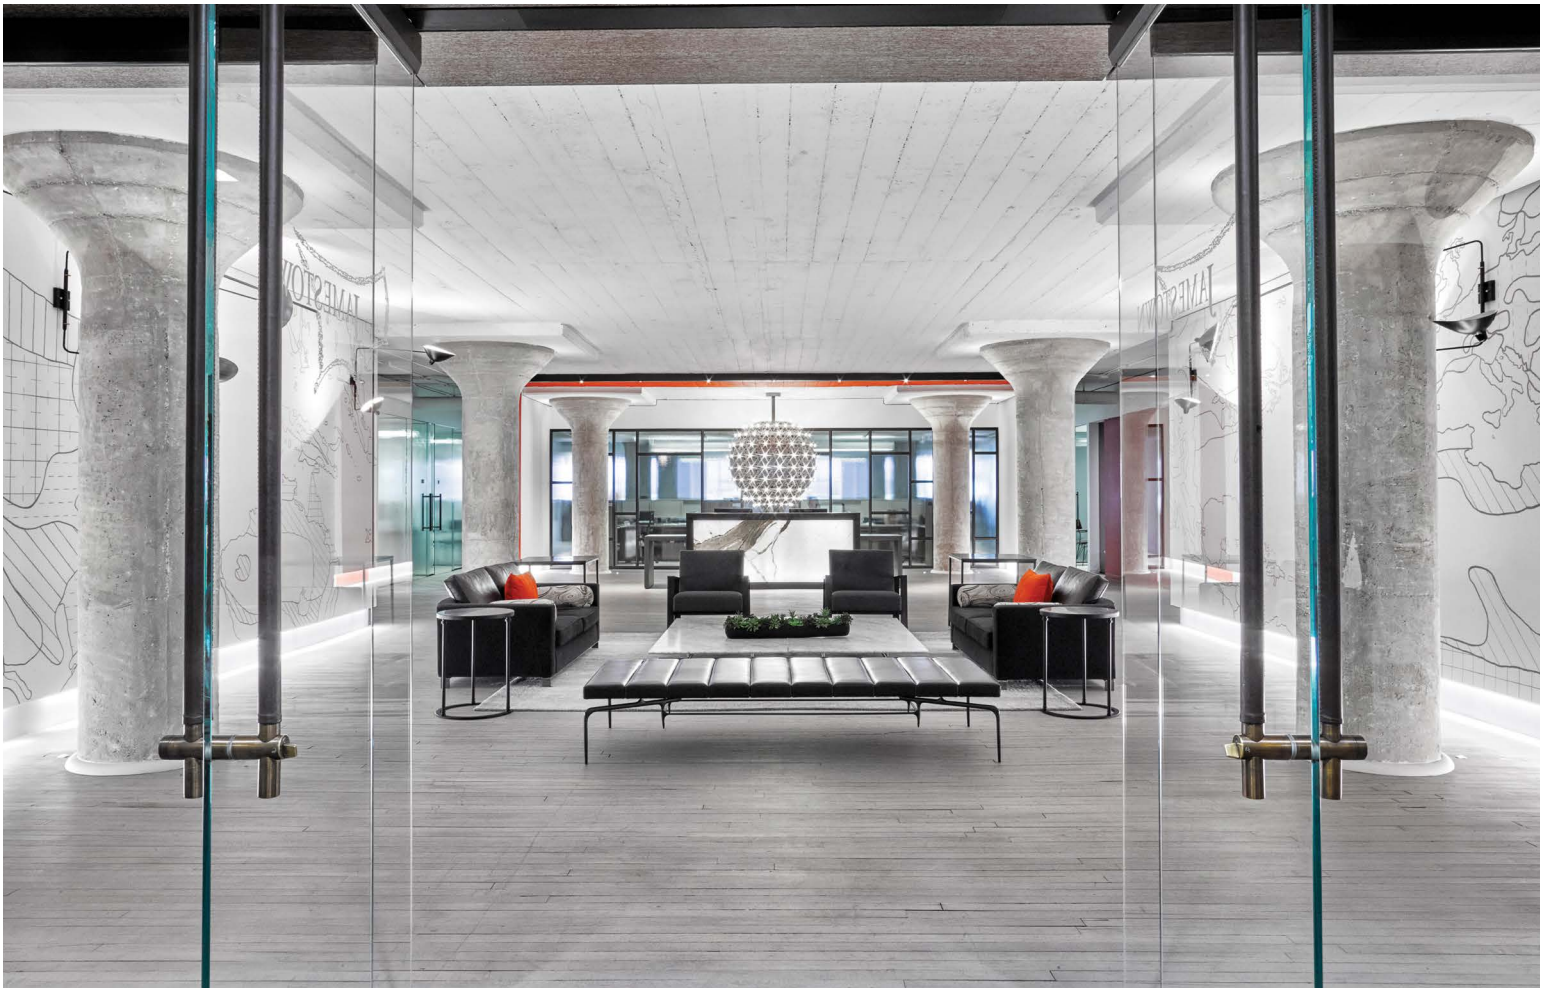

US32316 and US32D316 are made from alloy 316 stainless steel containing molybdenum and extra nickel giving it substantially higher corrosion resistance than the standard stainless steels typically used in door hardware. This finish is ideal for use in coastal, urban, and industrial areas that have harsh environmental conditions.

SPECIAL POWDER COAT FINISH DESCRIPTION

10BE Dark Oxidized Satin Bronze equivalent: This finish provides the richness and warmth of the 10B/613 "living" finish, but maintains its original color and appearance and will not fade or wear over time. The 10BE finish is offered by Corbin Russwin, McKinney Products, Norton Rixson, Rockwood Products, SARGENT and ASSA ABLOY ACCENTRA® (formerly Yale Commercial), providing visual consistency between ASSA ABLOY Group brands.

Black Suede (BSP) is a permanent matte finish that conveys sophisticated elegance. Tested to ANSI/BHMA A156.18 standards, BSP delivers a "suede-like" feel.

The Agion antimicrobial is not intended as a substitute for good hygiene. Coated products must still be cleaned to ensure the surfaces will be free of destructive microbes. ASSA ABLOY makes no representations or warranties, express or implied, as to the efficacy of the Agion antimicrobial. A copy of the Agion warranty is available upon request. Agion is a registered trademark of Agion Technologies, Inc., Wakefield, MA, USA

Finish Tips

STAINLESS STEEL

Stainless steel is one of the most dependable materials used in architecture. There are many types, each with different properties and different levels of corrosion resistance. For most indoor (except chlorine and other harsh chemical exposure) and many outdoor (mildly corrosive) environments, our standard stainless steel performs exceeding well and is best maintained with periodic water washing. If your job site has road salt, marine salt air, industrial, or urban pollution, we recommend the use of molybdenum bearing alloy 316 stainless steel. Specify US32316 or US32D316.

To enhance the corrosion resistance of stainless steel, use the polished finish (US32) in place of the satin finish (US32D). The mirror smooth surface of the polished finish has no rough surface to retain the microscopic dirt or debris that promotes corrosion.

HEAT RESISTANT

Exterior hot and sunny climates call for a finish that is resistant to heat. We recommend our white powder coat finish. This durable exterior finish reflects many of the heat rays and is substantially cooler to the touch than stainless steel or other finishes.

BACTERIAL PROTECTION

MicroShield® (US32DMS) is the ideal finish for hospitals, schools, laboratories, assisted living facilities, public restroom areas, and anywhere there are concerns about controlling bacteria growth and meeting demanding standards of cleanliness. Contact our customer service department for more detailed information.

FINISH SAMPLE DISPLAYS

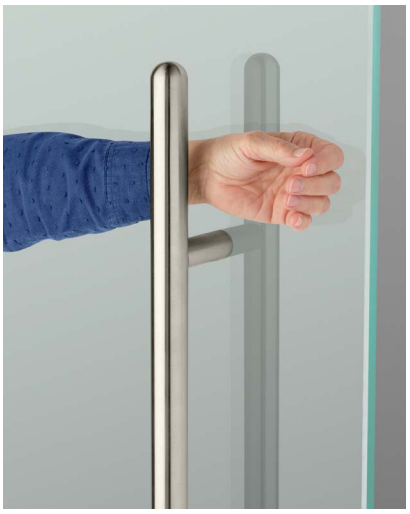

Educational and informative displays are available showing our most popular finishes.

HANDS-FREE OPTIONS

Cut down your exposure to germs while maintaining good design with handsfree options for Rockwood MegaTek and NoriTek Architectural Pulls. You can now configure these popular door pulls with extended posts and/or closer posts, to easily allow for arm to be placed above, below, or through the pull, limiting touchpoints.

Rockwood Hands-Free Door Pulls are part of a continuum of Safer2Open™ low-touch and touchless door hardware solutions from ASSA ABLOY.

Leather Craftsmanship

Rockwood products use the finest bridle and upholstery leathers, hand-sewn by a talented craftsman. A selection of standard leather colors is available, as well as a plethora of custom colors and threading options. The custom leather covering options are endless. From minor design changes or unique custom creations, we are dedicated to making the door pull of your dreams.

MAINTENANCE

All leather pulls leave our factory with an initial coating of leather dressing. Upholstery Leather has a breathable protective finish that is best cleaned by wiping with a cool damp cloth. For tougher soiling, use a pH balanced soap on a cloth and rinse; always use cool water. Repeat if necessary. Do not use wax, mink oil, saddle soap, or polishes on upholstery leather. Occasional use of a finished leather cleaner, conditioner, and protector is recommended. Clean English Bridle Leather as necessary with a damp cloth and allow to dry. Apply a light coat of leather care product, allow to dry and buff with a soft cloth.

FINISHES

Leather wrapped door pulls are offered in brass, bronze, and stainless steel base materials in a wide variety of architectural finishes.

LEATHER

Rockwood products use 8–10 ounces of hand-colored, vegetable-tanned English Bridle leather, the finest leather in the world, so you can be assured of a beautiful and durable leather door pull.

In addition to our selection of fine English Bridle and Upholstery leathers, you may specify a custom leather application, including color, thread, and stitching. Minimum charges apply for special order leather.

Round Grip

Discover the clean, smooth simplicity of our round grip design, infused with eye-catching elements for added interest. Select the collection that makes your vision a reality. From contrasting, contemporary effects to subtle-toned natural warmth, a variety of size and finish options are available to compliment any door concept.

LEATHER
Expansive selection of high-quality, durable, leather door pulls

WOOD
Naturally unique markings and tones with exotic elegance and alluring warmth

SANTOPRENE™
Pure comfort in high-performance engineered thermoplastic elastomer grips

BLACK ANODIZED
Durability with the high-visibility contrast of satin-black, hard-coat anodized aluminum

GROOVED
Unmatched contemporary fashion in the smooth transition of precision-fitted joints amid solid ends and expertly grooved tubing

SMOOTH
Simple, attractive, with contemporary design elements

KNURLED
Textured designs that produce a better gripping surface while enhancing the aesthetics of your door opening

ACCENTS
Interesting design elements move beyond the commonplace and into the extraordinary

ESSENTIAL
Industry-standard, uncomplicated forms for a basic composition

Architectural Panic Devices

Safeguard your door while emanating flawless design with the Rockwood Panic Device. Incorporating a patented flat security latch, the PDU8500's engraved push area and boundary grooves make exit doors stand out in a crowd. With a selection of cylinder, pull, and finish choices, no concessions are needed.

FEATURES	BENEFITS
Top latching panic device with flat security latch	Provides additional strike engagement that inhibits doors from popping open
Engraved latch lines	Ensures proper installation and alignment with the strike
Dampener in actuator assembly	Suppresses bounce in the door
Engraved push area and boundary grooves	Enhances visibility and tactility for a quick and easy exit
Adjustable stops on strikes include set screws	Minimizes movement of stops and secures them in place
Keyed and non-keyed options	Matches existing key system if required
Optional dogging feature, can be added or removed in field	Depresses and holds device into place, adding convenience during operating hours
Single or Double Fail Safe/ Fail Sure Electric Strikes offered	Keeps doors locked until released
Optional bent end return	Prevents clothing, other items from catching on device during egress
Two-piece versions available	Allows for expedited shipping, easier storage/transport
UL10C 90-minute rating (when specified, select door types only)	Enhances facility fire safety
Optional Request to Exit (REX) functionality	Monitors exit activity, logs when user activates push bar

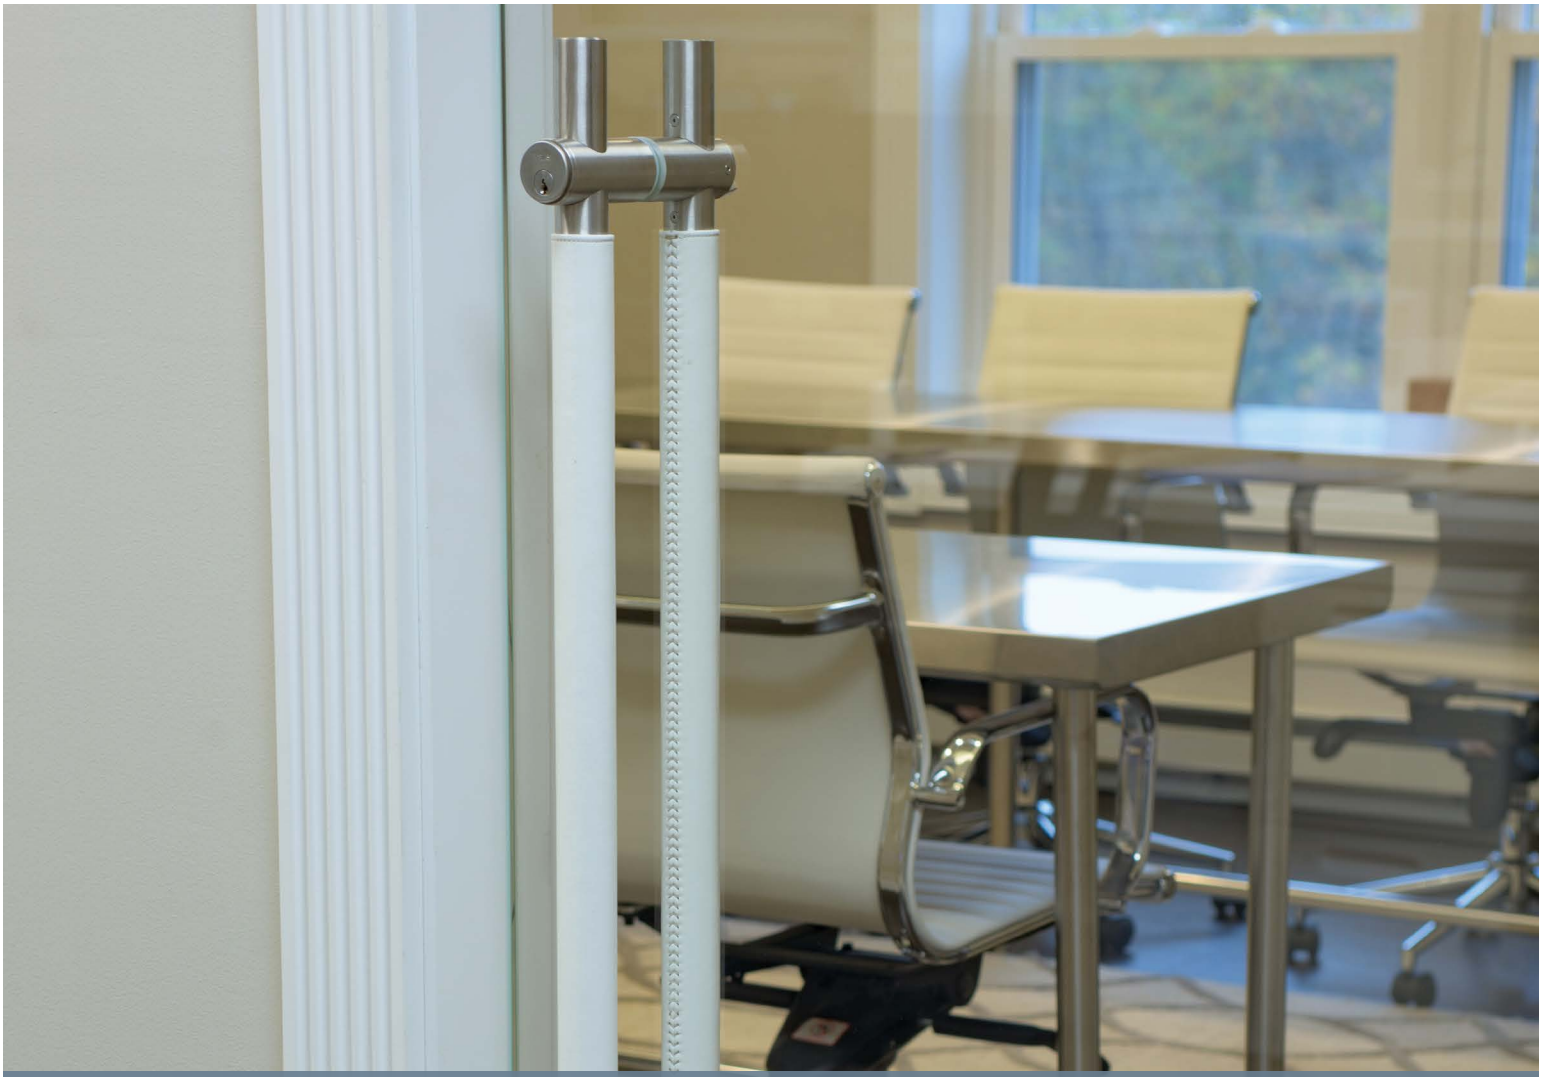

APPLICATIONS:

- Large Conference Rooms
- Large Hotel, Office, and University Meeting Rooms
- Casino, Restaurant, Stadium Banquet Rooms
- Retail Storefront Doors
- Security Vestibules
- Cross-Corridor Doors

Locking Pull System

Add beauty and convenience to your locking application. Flawlessly integrate the contemporary style of Rockwood's PostMount or GeoMetek door pulls with an easy-to-install deadbolt or flat latch locking system. Manufactured for strength and durability and designed with clean and appealing lines, these systems offer perfectly simple, elegantly flexible solutions.

FEATURES

- Key operated from outside; turn piece on inside
- Multiple cylinder options
- Door types: Glass, Wood, and Metal
- Multiple locking options: down, up, or both
- Standard bolt latch
  - Bolt location: 2" from face of door to centerline of bolt
  - Bolt has $^{13}/_{16}$" travel with fine adjustment
- Patented flat latch option
  - Flat latch location: $2^{1}/_{8}$" from face of door to centerline of latch
- Horizontal push/pull bar option
- Available in brass, bronze and stainless steel
- Dummy versions available
- Single motion egress versions available (SMU9000)

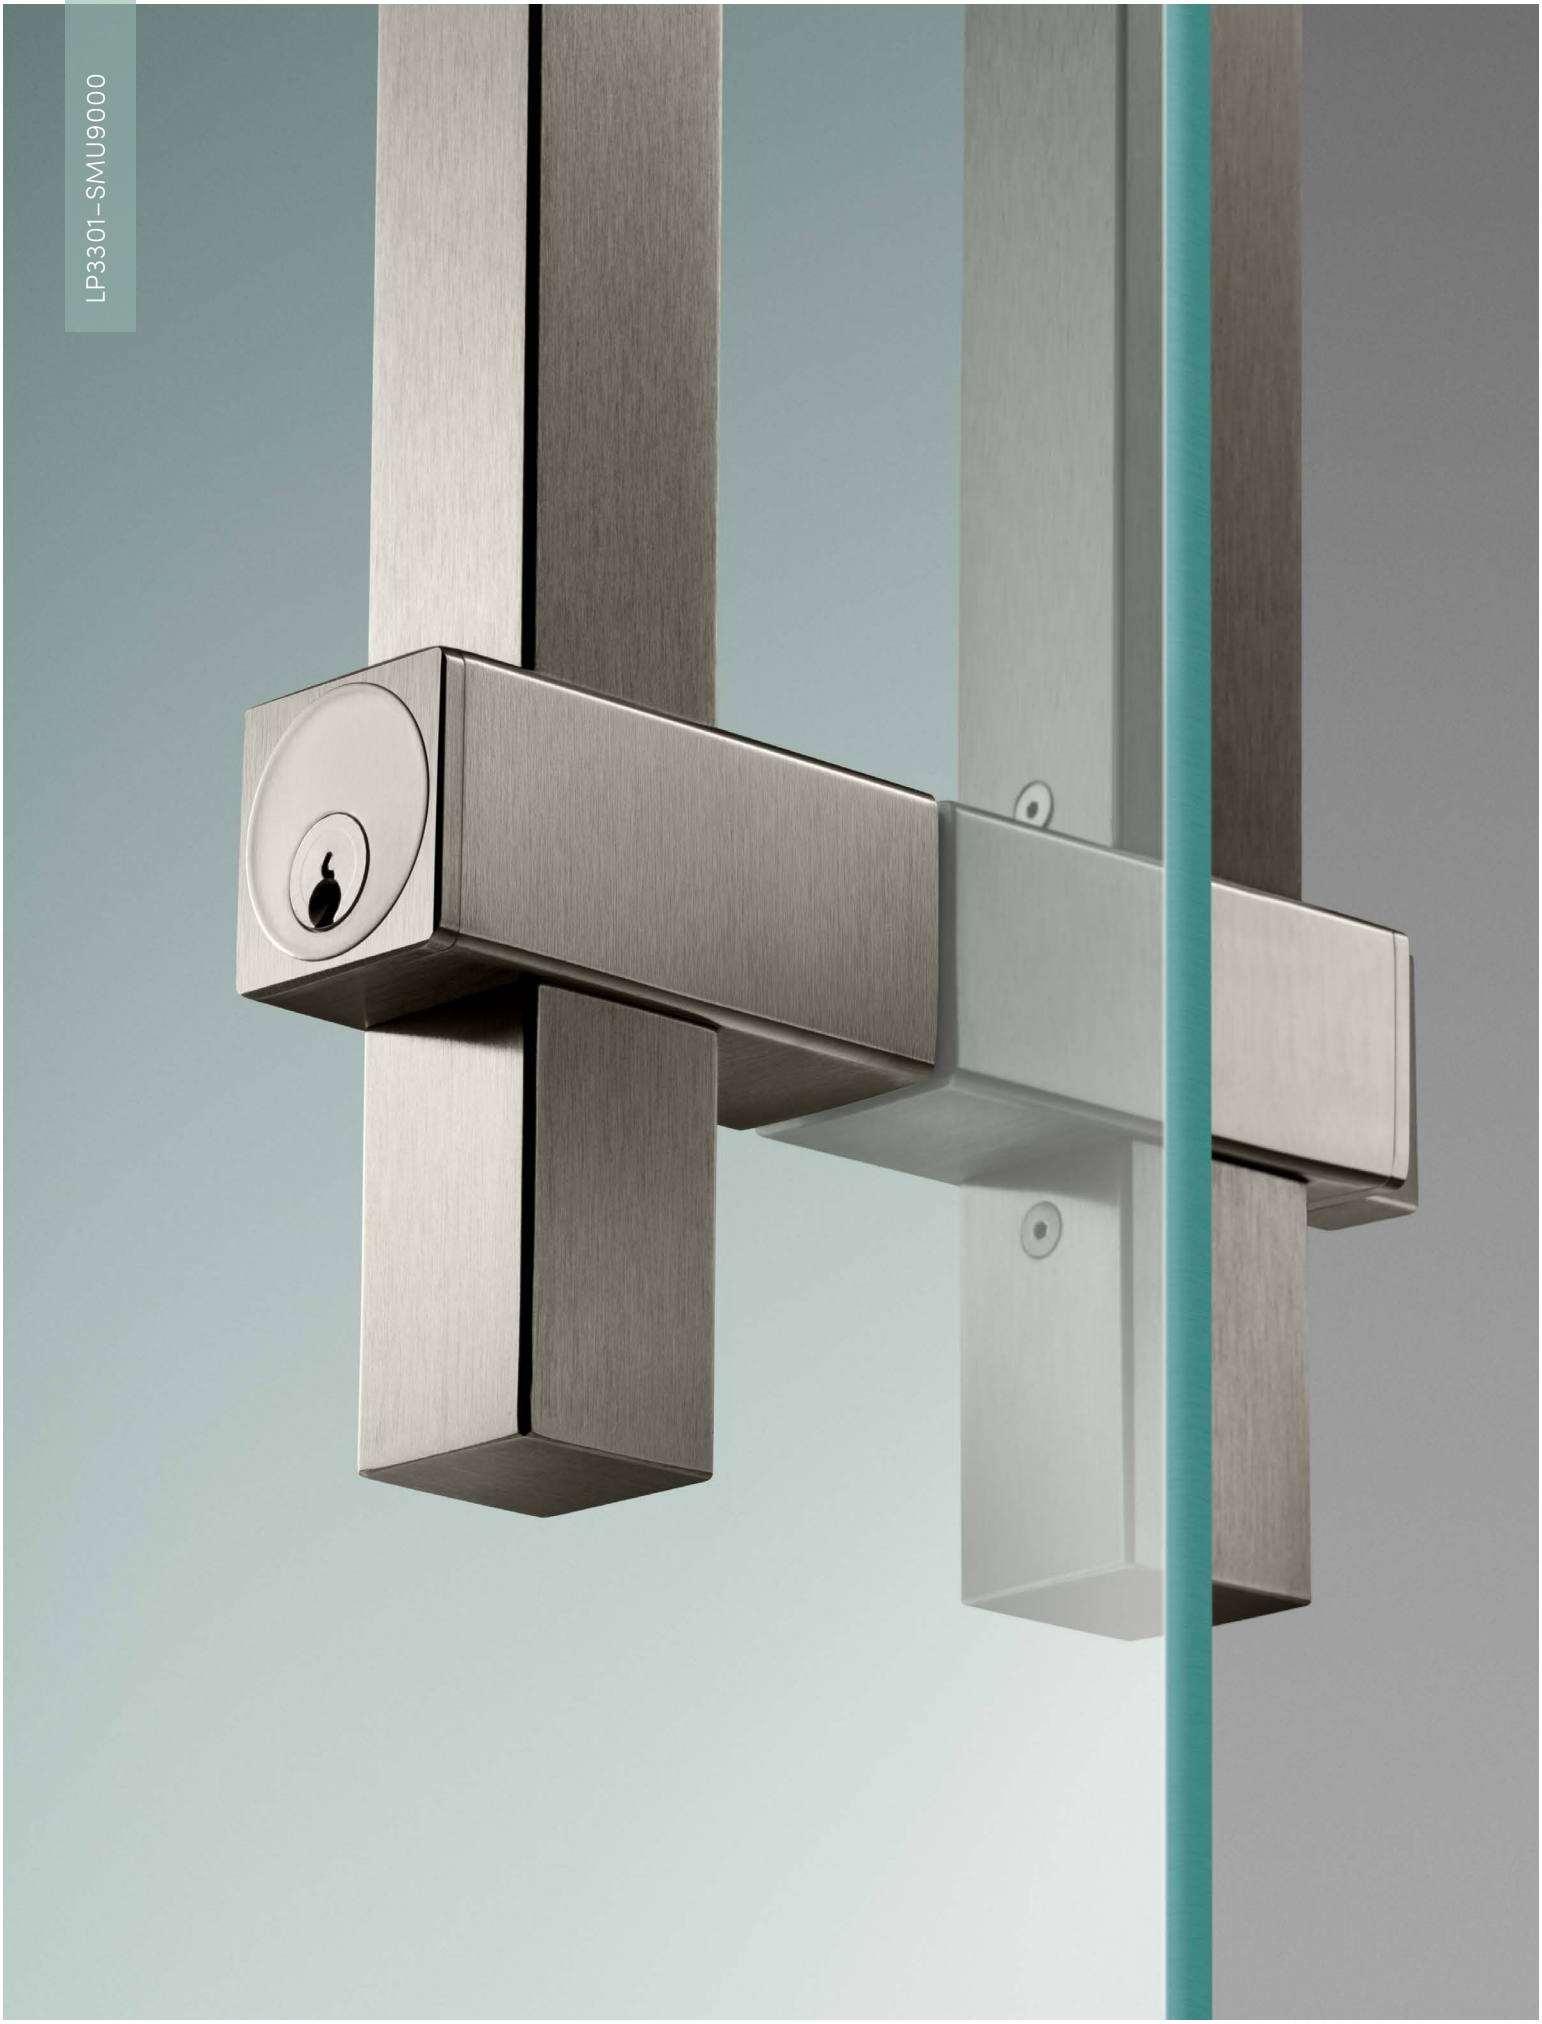

BENEFITS

- Cylinder and thumbturn location eliminates physical strain when locking and unlocking
- Bolt concealed inside pull provides a clean, streamlined look
- Simple door preparation allows for faster installation
- Requires only 2 holes for half height pulls, 3 holes for full height
- Suites with popular Rockwood door pulls, Corbin Russwin and Sargent lever handles, creating a continuum of design
- Offers flexibility in custom sizes for a variety of applications

For complete locking pull details, please view the following brochures:

Locking Pull Systems Brochure

SMU9000 Single Motion Flat Latch Device Brochure

LP3301/SB3301 Series

POST MOUNT - ROUND

This basic post mounted pull is a clean and simple design. The simplicity adds contemporary beauty to standard entrance doors. For complete details view our locking systems brochure.

FL3301/INSFL3301 Series

POST MOUNT FLAT LATCH - ROUND

Our basic, post mounted pull design that features a patented flat latch for enhanced opening security.

LP3401 Series

NEOMAX WITH GRIPZONE - ROUND

This beautiful bright and brushed two-tone finish provides a "wear" area for gripping the pull. This minimizes the appearance of small scratches caused by rings and keys.

LP6061 Series

ENGLISH BRIDLE LEATHER - ROUND

Authentic J & E Sedgwick & Co. Ltd. bridle leather imported from Walsall, England is hand sewn by a talented craftsman. Typically used for saddles and equestrian products, this smooth durable leather is suitable for both interior and exterior applications.

LP6161 Series

UPHOLSTERY LEATHER WRAPPED - ROUND

Supple yet durable leather makes a discriminating statement. Available in two standard colors and a palette of others on special order.

LP6440 Series

GEOMETEK UPHOLSTERY LEATHER WRAPPED - SQUARE

Beautifully crafted, the GeoMetek and Upholstery Leather combination produces an elegant composition. The leather is tightly wrapped and neatly sewn on the back and is offered in a plethora of custom colors.

LP7901 Series

GEOMETEK SMOOTH - SQUARE

This series offers a streamlined profile and crisp lines. The square pull complements the shape of the opening creating symmetrically balanced design.

SMU9000 Series

POST MOUNT SINGLE MOTION - ROUND

This innovative series offers single motion egress for quick, intuitive operation, paired with our patented flat security latch. For complete details view our product brochure.

Sliding and Closet Pulls

Practical and modern style applications for sliding and closet doors. Our collections inspire visions of industrial sensibility, rustic charm, or seamless beauty. These pulls come in a variety of custom sizes and finishes to meet any application need.

Custom Door Pulls

Are you looking for door hardware that is different, funky, or suites with other components in your facility and is not shown in our current offering? The ASSA ABLOY custom hardware program offers a myriad of options to turn your dreams into beautiful reality.

First impressions are everything

Door pulls are the gateway into a building. Whether you're looking for drama or elegance, ASSA ABLOY Rockwood door pulls can be highly customized, making your ideas come to life. Made with top-notch quality materials including various metals, leather, and wood, we use a selection of manufacturing processes to produce your custom design.

CUSTOM MACHINING

Computer controlled machining techniques including water jet cutting and milling enable precision fabrication and the efficient production of designs.

CORPORATE IDENTITY

Incorporate your company logo on a door opening through computer aided etching or engraving. These durable marking techniques are readily available to add that finishing touch.

CUSTOM CASTING

Working with a variety of pattern makers, we can produce the exact design you compose. Castings provide a unique surface texture and can be economical when you have more than a few to make.

CUSTOM BENDING

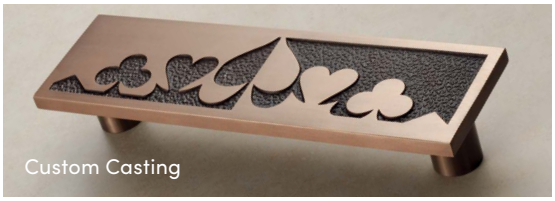

A variety of bent shapes are displayed in our standard product line, however, we can bend a radius of your choice on any material you select.

CUSTOM MATERIALS

Our leather craftsmanship expresses our attention to detail as each leather door pull is hand stitched. We apply equal expertise to our door pull fabrication by using the finest bridle or upholstery leather, in any custom color you desire.

Wood adds an element of warmth to your opening. We offer a selection of premium species including Mahogany, Canary and Walnut. Paired with numerous metal finishes, including custom colors, the options are endless.

Technical Information

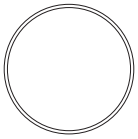

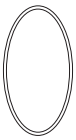

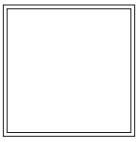

Long door pulls naturally have a small amount of flexing between mounting points that are spaced far apart. The following guidelines will help determine when a mid-post is required, or when altering the location of the mounting posts (by moving them closer together) should be considered to minimize flexing of the grip. A rigid grip is ideal for long door pulls and is particularly important on all glass doors which inherently flex. The mid-post will keep the mechanical joints and fasteners in a sturdy position.

The recommendation for adding a mid-post to long door pulls is based on a theoretical pull load of 30 foot pounds maximum, to open the door. This is a greater than the typical force required to open an average door. The maximum amount of deflection of the grip that might be encountered, is 3/8". The conditions on your job site can vary due to door weight, wind loading, closer settings, locked doors being aggressively pulled, and other circumstances. ASSA ABLOY proposes adding a mid-post to heavy or hard-to-open doors, which will create a more stable and durable installation.

On long pulls, post can be positioned closer to each other and farther away from ends as a strategy to avoid mid-post if door condition permits.

POST MOUNTED PULLS, SHAPES, AND SIZES

Shape	Material	Material Size	Maximum CTC
Round 	Stainless Steel	1"	70"
		1 1/4"	90"
		1 1/2"	110"
	Brass/ Bronze	1"	57"
		1 1/4"	73"
		1 1/2"	87"
	Aluminum	1"	66"*
		1 1/4"	90"*
		1 1/2"	115"*
Oval 	Stainless Steel	1" x 1 1/2"	100"
		1" x 1 7/8"	119"
Flat Oval 	Stainless Steel	3/4" x 1 1/2"	93"
Square 	Stainless Steel	3/4" x 3/4"	62"
Rectangular 	Stainless Steel	1/2" x 1 1/4"	86"
		3/4" x 1 1/2"	110"
	Brass/ Bronze	3/4" x 1 1/2"	89"
Rectangular 	Stainless Steel	1/2" x 1 1/4"	52"
		3/4" x 1 1/2"	75"
	Brass/ Bronze	3/4" x 1 1/2"	60"

* The maximum length of anodized aluminum pulls is 87" due to our tank size. Longer aluminum pulls are available in satin finish and clear coated or powder coat paint.
* The maximum length to powder coat a pull is 118".
* Exception: RM4850 - 1 1/4" Maximum CTC is 60" Brass/Bronze and 84" Stainless Steel.

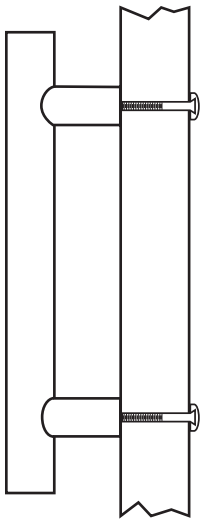

FASTENING SYSTEMS

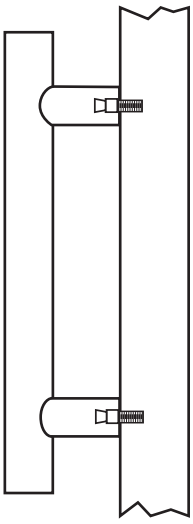

Rockwood pulls attach using three basic fastening systems. These mounting systems firmly secure the pull to the door.

Optional base plates can be added for aesthetic or functional purposes. The larger diameter base plates add stability to the fastening system, which is beneficial for glass or wood door applications.

* Offset Pulls are subject to finish availability.

** The maximum length of anodized aluminum pulls is 87" due to our tank size.

Finishes are subject to availability upon length of pull.

NOTE: Pulls with GripZone offer and additional aesthetic look, not a tactile feel. The grip zones are satin, the post and end sections are polished. US10B finish is not available on GripZone pulls.

NOTE: Where solid bronze material is not available, we will use a brass as a base material.

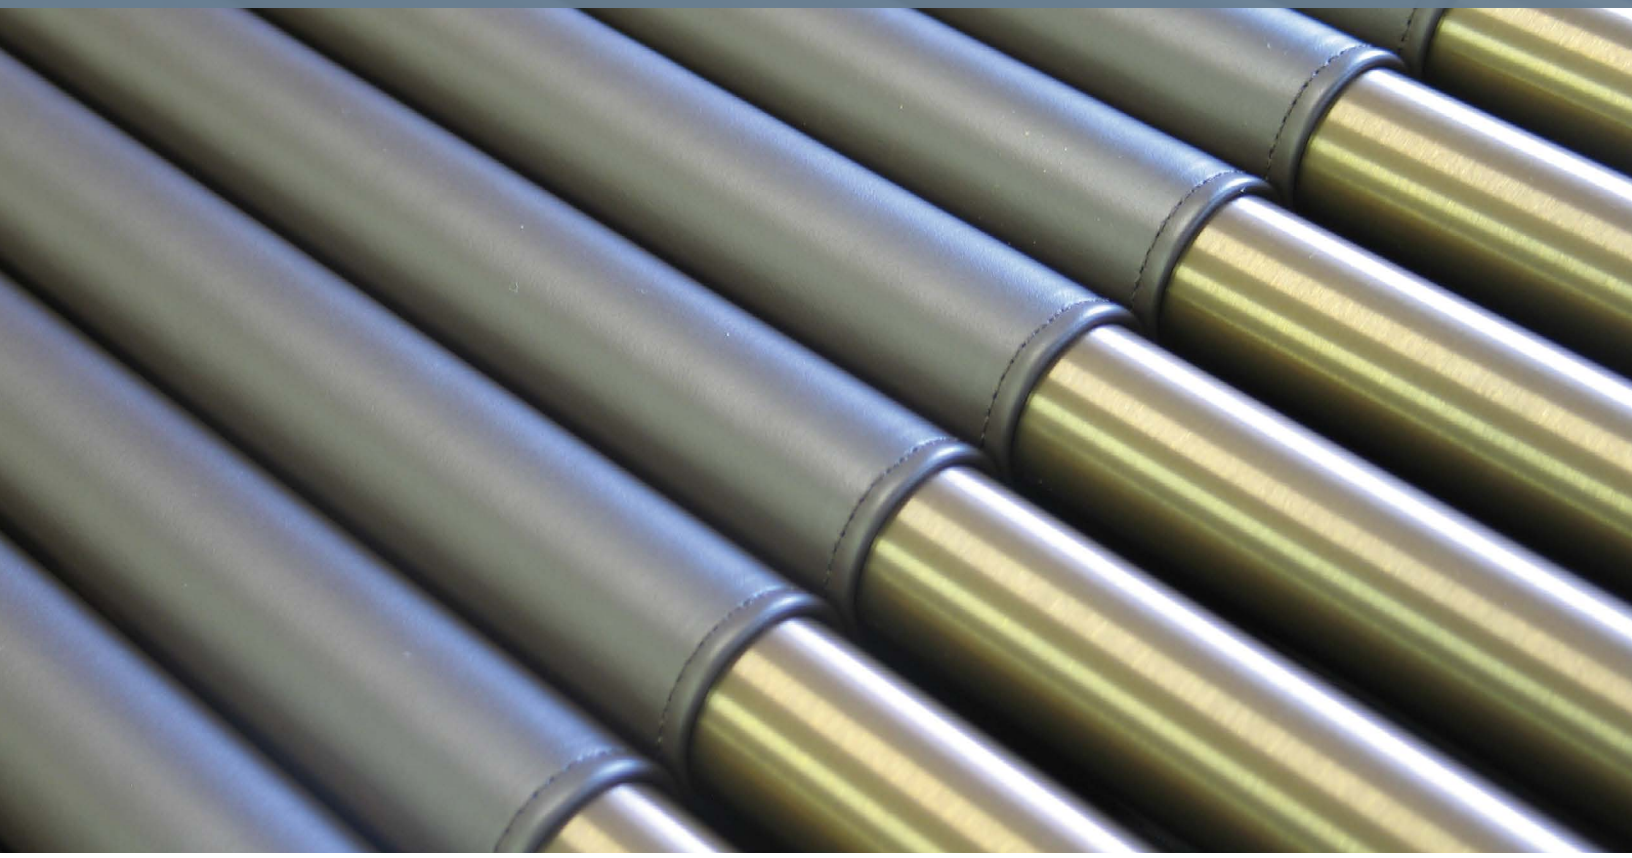

Notes

The ASSA ABLOY Group is the global leader in access solutions. Every day, we help billions of people experience a more open world.

ASSA ABLOY Opening Solutions leads the development within door openings and products for access solutions in homes, businesses and institutions. Our offering includes doors, frames, door and window hardware, mechanical and smart locks, access control and service.
