Custom finishing is available through several ASSA ABLOY Group brands, contact your local Door Security Solutions Representative for more information.

Electroplating

This traditional architectural finishing process uses electric current to form a thin metal coating over substrates such as brass, bronze, or stainless steel. Inquire about other electroplated finishes not listed in our current offering.

Powder Coating

Add a pop of color to your hardware with special powder coating. Pick a color out of a crayon box, select a fabric swatch or wall paint, and we'll match it. Powder coating is a durable and cost effective option to accentuate your space.
