6. Install screws by hand or low-torque screw gun-DO NOT OVERTIGHTEN
7. Optional: glazing setting blocks

GENERAL NOTES

1. ASSA ABLOY Door Group / SGG-Attack Resistant Retro-fit Kits and/or retrofit sidelights and/or retrofit borrowed lights must be used with the Attack Resistant component materials as supplied: AADG Kits, SGG5 Glass, approved and tested installation components only - NO SUBSTITUTIONS.
2. ASSA ABLOY Door Group and School Guard Glass are committed to providing the safest and most robust means and methods for attachment into complete factory installed OEM Attack Resistant assemblies as well as the repair, partial replacement, or enhancement of existing doors and frames. We have independent testing parties regularly test our installation procedures and products as well as the frames and glass it is installed into. However, please be advised that it is possible that not all existing doors, frames, or hardware on your project have been tested to our standards. Furthermore, if doors, windows or hardware are old, of inferior quality, broken or partially broken, then they may not meet the testing outcomes that new materials meet. Our products will not cause your existing products to be less secure but existing products that are defective may reduce the ability of our products to meet their full potential."

The ASSA ABLOY Group is the global leader in access solutions. Every day, we help billions of people experience a more open world.

ASSA ABLOY Opening Solutions leads the development within door openings and products for access solutions in homes, businesses and institutions. Our offering includes doors, frames, door and window hardware, locks, perimeter fencing, access control and service.
