

Take Shelter. Hunker Down. Keep Safe.

Don't Let the Wrath of Tornadoes Injure You or Your Colleagues.

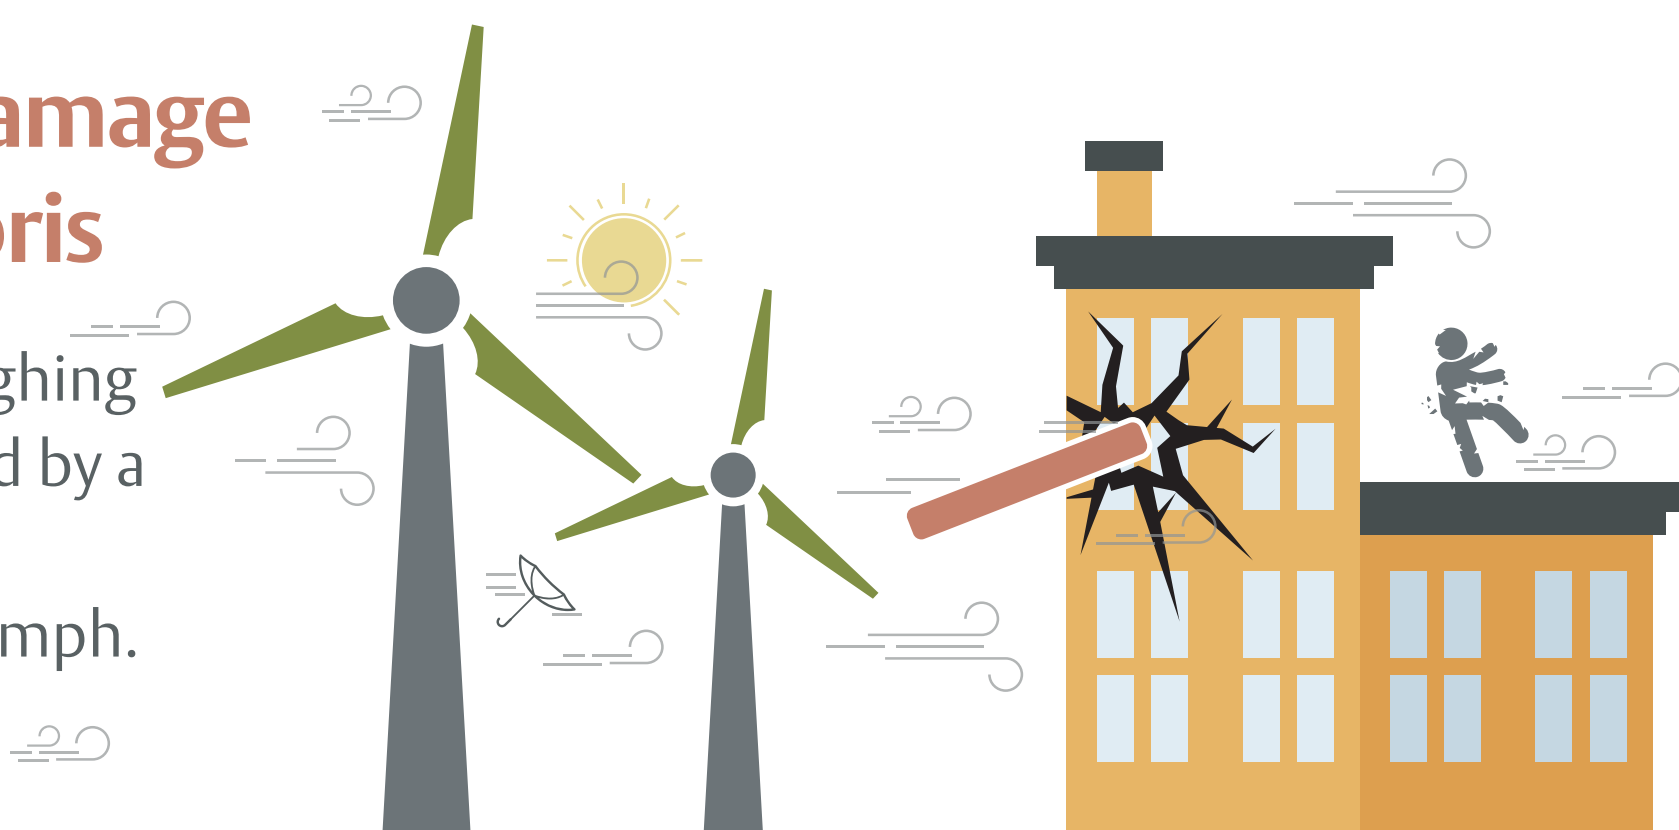

Our Tornado Resistant Openings

were developed to resist windborne missiles and flying debris associated with tornadoes, and designed specifically for shelters to protect occupants from injury.

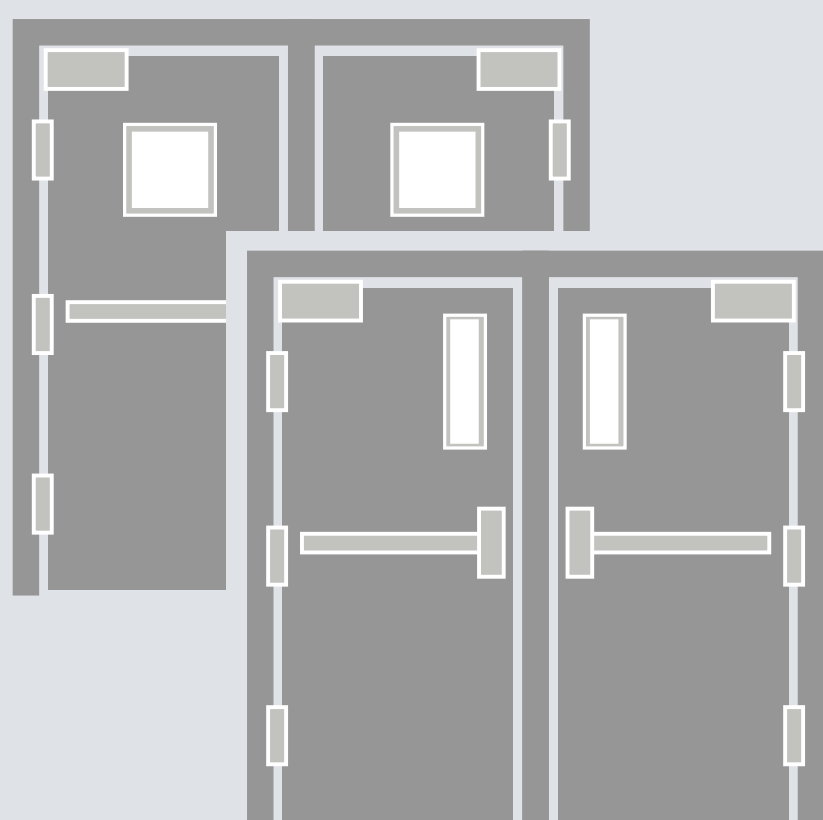

Consider This Damage From Flying Debris

A 2"x 4" wood stud weighing 15 pounds, when carried by a 250mph wind has a horizontal speed of 100mph.

That's enough force to penetrate most common building materials today.

When It's Stormy Out, You Need StormPro

StormPro 361 and StormPro 320 — assemblies have been successfully tested in accordance with ICC 500, and 3rd party UL classified to ICC 500 standards.

Available with Field Replaceable Glass Assemblies —

- 4"x25" and 10"x10" glass
- Factory installed field replaceable glazing on commercial assemblies ordered after June 7th 2023 with 3-sided frames
- 90 minute UL fire rating

StormPro Tornado Shutter —

designed for safe rooms that require natural lighting from windows during normal, non-threatening conditions and are 3rd party UL tested and classified to ICC 500 and meets FEMA guidelines.
