

# Contain It: Keep Radiation Out of Sensitive Areas

The Lead-Lining Your Doors Require

**Fleming's full line of high-quality,** lead-lined doors and frames achieve effective radiation protection — reliably containing radiation in sensitive areas.

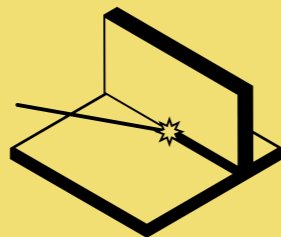

## Your Lead-Lined Options

Lead sheets — from 1/32" to 1/4" thickness

Vertically steel stiffened doors for added strength and durability

Continuously welded, seamless door edge and lead lined frame

Standard 16-gauge steel (14-18 gauge available)

## Where Do You Need Lead

Microwave transmission rooms

Airports

Medical schools

X-ray and imaging rooms

Defense, military and security environments

Nuclear power plants
