

# KRM200FWS

## Mullions

### Installation Instructions

#### Tools Required:

Measuring Tape  
Pencil  
#7 Drill and 1/4"-20 Tap  
Concrete Drill 3/8" diameter  
1/2" Drill  
Punch  
Hammer  
#3 Phillips Screw Driver  
5/64" Allen Wrench  
3/16" Allen Wrench

**Attention:** Before starting the installation make sure that

- You have the correct product
- Doors are properly installed and hinge screws are secure

1. Attach the top retainer to the top jamb.
  - a. Mark the centerline of the top retainer on the top jamb.
  - b. Close the doors and keep door leaves tight to the stops.
  - c. Fold the supplied template 80-7401-0206-000 along the creased line and locate it on the top jamb using the centerline marked. Attach it to the frame and doors with self adhesive strips supplied.
  - d. Mark drill and tap holes required.
  - e. Install the top retainer using (4) four 1/4-20 x 5/8" flat head screws.
2. Locate the bottom retainer on the floor. **Attention:** Do NOT attach the retainer to the floor at this point.
3. Cut the mullion body to size.
  - a. Measure the distance (H) between the inside surface of the top retainer and the top of the bottom retainer surface as shown.
  - b. Cut off bottom of the mullion body to desired length (L) using the following formula  $L = H - 1/16"$  (1.6)
4. Position the mullion body into the bottom and top retainers and locate it vertically. Mark the bottom retainer location on the floor (Bottom retainer still free to move). **Attention:** Make sure that the mullion surface is engaged with the doors and mullion is plumb to door face and frame.
5. Install the bottom retainer.
  - a. Remove the mullion body from the retainers and put it aside.
  - b. Align bottom retainer with previous markings from Step 4.
  - c. Use a punch and hammer to mark hole locations on floor.
  - d. Drill (2) 3/8" (9.5) dia. holes in floor to a min. depth of 2-5/8" (66.7).
  - e. Mount the bottom retainer to the floor with supplied (2) 3/8" fasteners.

### 6. Installation of Cylinder

- Depress latchbolt and hold fully retracted.
- Carefully thread cylinder with cylinder ring into lock assembly until it bottoms out.
- Unscrew the cylinder orienting keyway at bottom.
- Release latch bolt. Note: If latch bolt is not fully projected, loosen cylinder an additional 1-2 full turns.
- Tighten set screw with 5/64" Allen Wrench through access hole in side of mullion.
- Check operation of cylinder and lock assembly.

**NOTE:** Key only turns counter clockwise.

### 7. Install the mullion body.

- Place mullion body onto bottom retainer and pivot into opening.
- Tighten bottom retainer set screw with 3/16" Allen Wrench to prevent mullion rattle.

### 8. Install exit devices according to the manufacturer's instructions.

### 9. Fire rated Rim and SquareBolt® Exit Devices

After exit devices and strikes have been assembled, install Interlock

Brackets with #10-24 x 3/4" screws as shown in illustration below.

## Interlock Installation

Interlock Bracket Required for Fire Rated SquareBolt® and Rim Exit Device with Mullion.

- Position strike Interlock Bracket in place, as shown. Locate bracket holes.
- Prepare Interlock Bracket mounting holes and mount with (4) 10-24 x 3/4" screws (and SNG's when applicable).
