

PEMKO LEAD TIMES

MARCH 16 - 29, 2026

In our continuing effort to keep you informed, the following is a general guideline for our factory lead times. The lead times are based on inventory availability that may be restricted by global supply chain latencies. Expected ship dates on items that are out of stock will be determined at the time of acknowledgement.

While we are committed to meeting 100% on-time delivery, there are factors which may affect shipment. Some include exceptionally large orders, climate and non-conforming material. Any deviation from the acknowledged order ship dates will be communicated to the customer.
