

Panic Mating Pull Compatibilities

Experience a safer
and more open world

Please reference the chart below for a complete list of our Rockwood architectural door pulls and which panic device models they are compatible with.

ASSUMPTIONS:

- RM pulls will have custom length posts.
- RM pulls with bent ends will have a custom projection.
- RM pulls mounted independent of the device on the exterior will have a different backset than the device itself and should be placed on the lead edge side of the cylinder housing.
- Posts must be Stainless Steel or Powder Coat finishes with stainless steel base material.
- For RM pulls with collars, the collar must be custom in order to mount the cylinder housing to it.
- RM pulls with a square post can only be used on the PDU8500 series. Square posts cannot be used on glass doors.

Note: Upcharges will be applied, please send in for quote request.
