

Lead Time Updates

MCKINNEY | PEMKO | ROCKWOOD

March 30 - April 12, 2026

ASSA ABLOY is committed to 100% customer satisfaction. Below are the most recent changes applied since last week's factory lead times for the Accessories brands of McKinney, Pemko, and Rockwood, so you can know what to expect when placing your order.

We will attempt to deliver your order sooner than these dates if line capacities and parts availability allow it. Orders with unusually large quantities or atypical configurations may be subject to longer lead times.

We recommend our distributors separate the long lead time products into separate orders. By doing this, you will receive our standard lead times on the balance of your order, and you will not experience a delay in the shipment of these products.

Please note that individual items within the same product category may have different lead times.

Improved lead times are listed in green, and extended lead times are shown in red.

Brand	Changes
McKinney	NOTE: There are many changes to McKinney lead times. Please click on the brand name to the left to view the most recent lead time sheet.
Rockwood/ Glass Solutions	No changes from previous week (Click the brand name to see the lead time sheet)
Pemko	Pemko DSH/ERS Hinge Models are at 6-10 weeks

*All individual lead time sheets will be updated every other week. Either click the brand name in this document or access ASSA ABLOY Connect to view the brand lead time documents.
