

Take Shelter. Hunker Down. Keep Safe.

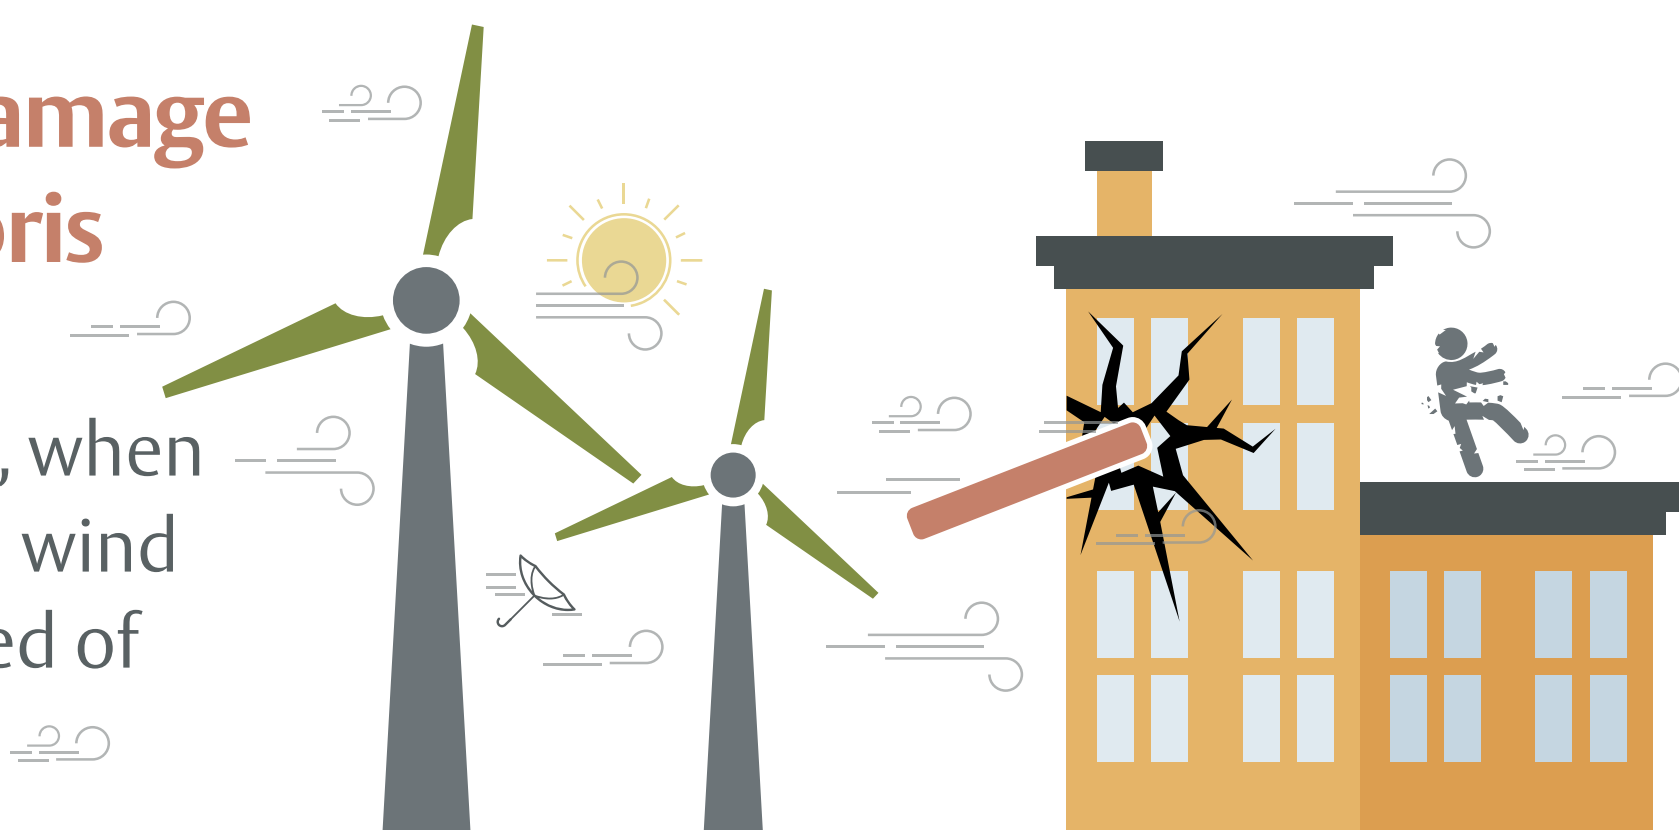

Don't Let the Wrath of Hurricane or
Tornadoes Injure You or Your Colleagues.

StormPro Hurricane and Tornado Protective Products were developed to resist windborne missiles and flying debris associated with hurricanes and tornadoes designed specifically for shelters in Florida and other severe weather prone areas to protect occupants from injury.

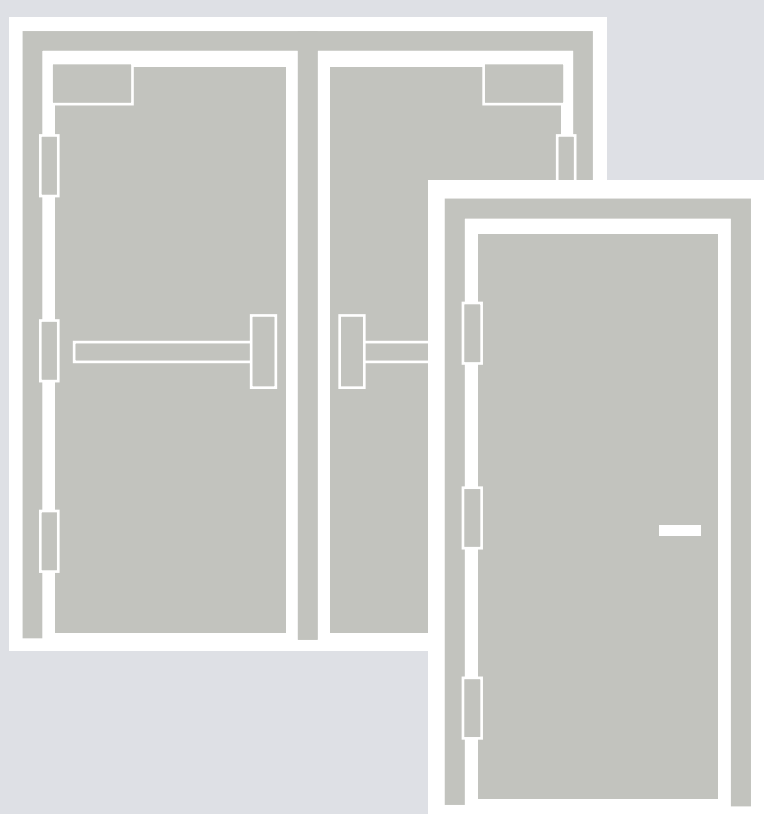

Consider This Damage From Flying Debris

A 2"x 4" wood stud weighing 15 pounds, when carried by a 250mph wind has a horizontal speed of 100mph.

That's enough force to penetrate most common building materials today.

When It's Stormy Out, You Need StormPro

StormPro Hurricane and Tornado —

shelter impact protective systems are Underwriters Laboratories (UL) listed to ICC 500 and approved by the Florida Building Commission (FBC) under FL# 40296
