

Medeco 4 DBK Program

Key duplication is entirely under your control, allowing for recurring revenue

The Medeco 4 Dealer Based Keyway (DBK) Program restricts key duplication to the original DBK distributor to that provided the system to the end user. It's a fantastic source of recurring revenue.

The Medeco 4 DBK program also gives you options for patented key control (M4 BiLevel) and high security (Medeco 4) - all using the same key.

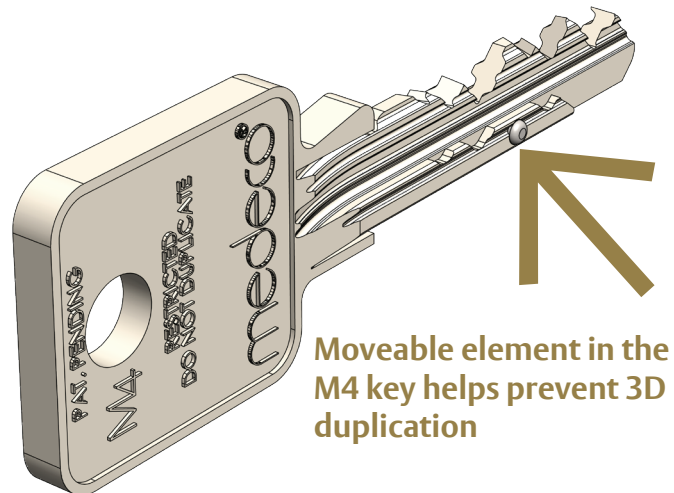

M4 BiLevel cylinders are about half the cost as M4 High Security cylinders.

This gives you the perfect blend of keying the majority of the building with cost-effective, patented cylinders (M4 BiLevel) and certain openings with high security cylinders (M4 High Security) - all using the same key system.

Here's more information about the DBK program:

- Buy-In: \$6,000 net to dealers
- 250 keyblank minimum
- For current Freedom and Gotham dealers no new equipment or coining dies are needed
- Key duplication is restricted to only the original DBK distributor that provided the system to end users
- Allows dealer to manage and maintain key systems for end users
- Dealers must obtain identification prior to cutting additional keys
