

# Medeco 4 Freedom Program

*The easiest upgrade you will ever accomplish*

medeco®

The Medeco 4 Freedom program is the easiest way to upgrade to Medeco's newest patented and high security technology. **For current M3 Freedom dealers, no new equipment or coining dies are needed.**

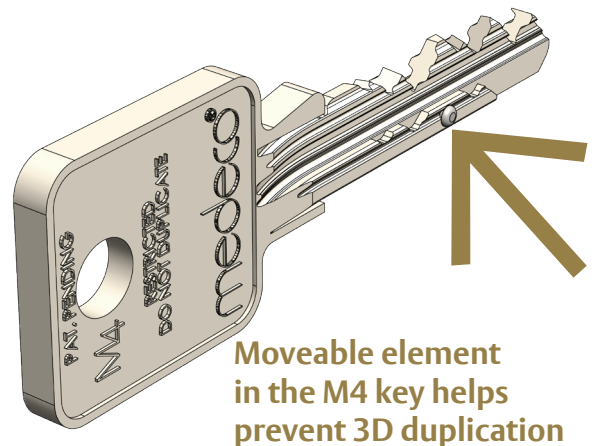

The M4 Freedom Program is for end users who want a restricted system where ID is required to have key copies made.

The Medeco 4 Freedom program also gives you options for patented key control (M4 BiLevel) and high security (Medeco 4) - all using the same key.

**M4 BiLevel cylinders are about half the cost of M4 High Security cylinders.** This gives you the perfect blend of keying the majority of the building with cost-effective, patented cylinders (M4 BiLevel) and certain openings with high security cylinders (M4 High Security) - all using the same M4 key.

## Here's more information about the Freedom program:

- Buy-In: \$1,500 net to dealers
- 200 keyblank minimum
- Nationwide program
- Dealers must obtain identification prior to cutting additional keys
- Keys can be cut at any participating Freedom dealer across the U.S. and Canada
- Authorization cards are tracked electronically and an audit trail is created for every transaction
