

New and Improved Hockey Puck Padlock

medeco
ASSA ABLOY

Experience a safer
and more open world

The re-imagined Medeco Hockey Puck Padlock has more flexibility and expanded retrofit cylinder capability

This stainless steel padlock is the go-to choice wherever shackle attacks are a concern. New flexibility also increases Medeco's already robust retrofit capability.

The new padlock design now accepts industry standard cylinders - Large Format Interchangeable Core (LFIC) and key-in-levers.

Available in several Medeco technologies, the new hockey puck provides a solution that helps keep the padlock attached to the opening it's meant to protect. Pre-machined holes in the back allow for flexible mounting options. When combined with a mounted hasp the padlock remains attached, preventing the loss of the padlock.

The 304 stainless steel body provides the highest combination of drilling resistance, cutting resistance, and weatherability.

The shackle-less design with a hidden bolt provides the highest level of protection against bolt cutter attacks. Adding a Medeco high security cylinder enhances security even further.

It's available in flat back and step back versions.

Features:

- Body width: 2 7/8"
- Shackle: 3/8" diameter
- Requires a key to re-lock
- Stainless steel body resists bolt cutter attacks
- Flat-back design
- Accepts 6-pin cylinders
- Completely field-serviceable, and can be rekeyed in case of lost or stolen keys.
- 2-year warranty

Benefits:

- Can be keyed and masterkeyed into new and existing systems
- To prevent loss of the padlock, pre-machined holes allow for easy mounting options
- Accepts industry-standard LFIC and key-in-knob cylinders
- Shackle-less design with a hidden bolt for a high level of protection against bolt cutter attacks
- Robust retrofit cylinder capability
- Ultimate weather resistance
- **Made in the USA**

Applications:

- Gaming machines/gaming padlocks
- Vending machines
- Service vehicles/vans
- Storage cabinets/containers and shipping containers
- Gates

The ASSA ABLOY Group is the global leader in access solutions. Every day we help people feel safe, secure and experience a more open world.
