## Medeco Intelligent Key Cabinet Solves Problem for Sewer District

medeco®

ASSA ABLOY

Experience a safer  
and more open world

A municipal sewer district in Kentucky required a secure key storage cabinet with tracking capabilities. The employees need keys to operate padlocks for lockout-tagout purposes, and individuals removing keys from the cabinet must be accountable for adhering to correct safety procedures. Additionally, traceability is crucial in case a key is not returned.

After exploring options, the Medeco Intelligent Key Cabinet (IKC), specifically the 96-key unit, emerged as an ideal solution. ASSA ABLOY's staff engaged with the municipal sewer district to discuss the product, its features, implementation, and setup. The customer found the product and service highly impressive, particularly highlighting the benefit of remotely accessing the check-out/check-in log, a feature they hadn't initially considered.

Following this positive assessment, the product was ordered and seamlessly installed without any issues. The customer expresses great satisfaction with the implemented solution.
