

MEDECO 4 DND DISTRIBUTOR PROGRAM

THE EASIEST WAY TO GET CYLINDERS INTO THE FIELD

WHAT IS THE MEDECO 4 DND PROGRAM?

Medeco 4 DND is one of Medeco's most popular key control programs. It's designed for locksmiths who want to offer high security products to their customers, but who don't want to invest all that's needed for high security.

For distributors, it's an easy, no-hassle, high-security program that can be sold quickly and digitally without any contracts or red tape.

Being part of the M4 DND program provides two levels of security – M4 High Security and a patented key control option (M4 BiLevel).

(See back side for more details on both technologies.)

WHAT IS THE DND PROCESS?

- End user presents card to participating locksmith
- Locksmith swipes card through card reader. (No more old school carbon copies!). Data is captured and stored, ready to be submitted.
- Locksmith places order with distributor
- Distributor accesses portal to get keying information, cuts keys, and then ships to locksmith

HOW IS THE DND PROGRAM MANAGED?

M4 DND is managed through a digital portal that uses an electronic card reader for authorization. Here's a quick overview of how M4 DND works:

- Distributor cuts keys and then ships them to locksmith
- Key blanks are only sold to authorized DND distributors
- Authorization cards are tracked electronically and an audit trail is automatically created for every transaction

WHY M4 DND?

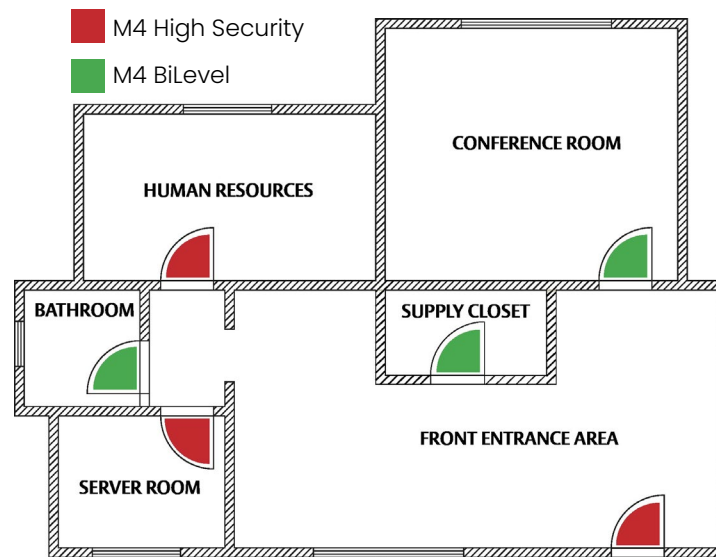

- ✓ NO CONTRACT
- ✓ NO PAPER VOUCHERS
- ✓ NO BUY-IN
- ✓ NO RED TAPE
- ✓ NO EQUIPMENT
- ✓ FASTER TURNAROUND

ASSA ABLOY

MEDECO 4 DND AND BILEVEL

Features of M4 High Security:

- UL 437 listed for protection against drilling, picking, and other forms of physical attack
- Patent protected through 2040
- Helps protect against 3D key duplication
- Massive master keying capacity
- ANSI/BHMA A156.30 & 156.5 rated — meets or exceeds criteria for strength and durability, key control and surreptitious entry resistance
- Can incorporate M4 BiLevel cylinders into the same system for blend of high security and patented cylinders

Features of M4 BiLevel:

- Lower price point
 - Patent protected through 2040
 - Uses same key as M4 High Security
 - Can be its own standalone key system
 - Helps protect against 3D key duplication
 - Can integrate with M4 High Security Cylinders
- Example:** Put M4 High Security cylinders on exterior doors, and then use M4 BiLevel on interior doors for patented key control and to save money. The same M4 key works all openings.
