

# Imperial Door With QMAX Thermally Enhanced Core

*Our most energy efficient opening available!*

**QMAX** is a new thermally enhanced core for Imperial Series doors. Intended for applications where polyurethane cores are normally specified. The QMAX core is **25% more thermally efficient** than polyurethane and has many sustainability characteristics.

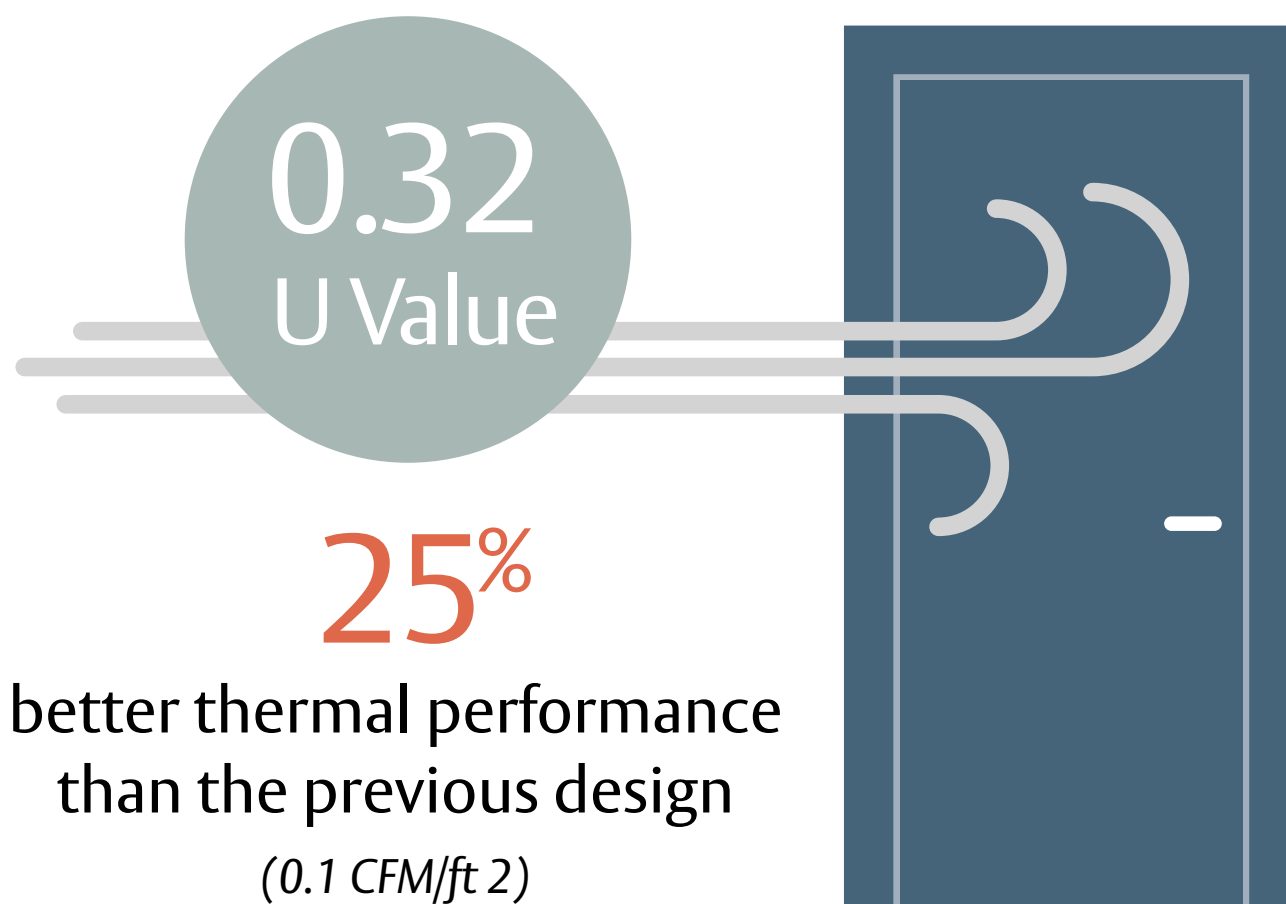

**UL GreenGuard and GreenGuard Gold Certified**  
low-emitting product

## Thermally Enhanced Core

- 25% energy savings over prior core design helps reduce energy consumption
- 100% recyclable with post-industrial and post-consumer recycled content
- 13.6% Carbon footprint reduction
- Environmentally friendly containing no hazardous materials or off-gassing

## Superior Energy Efficiency

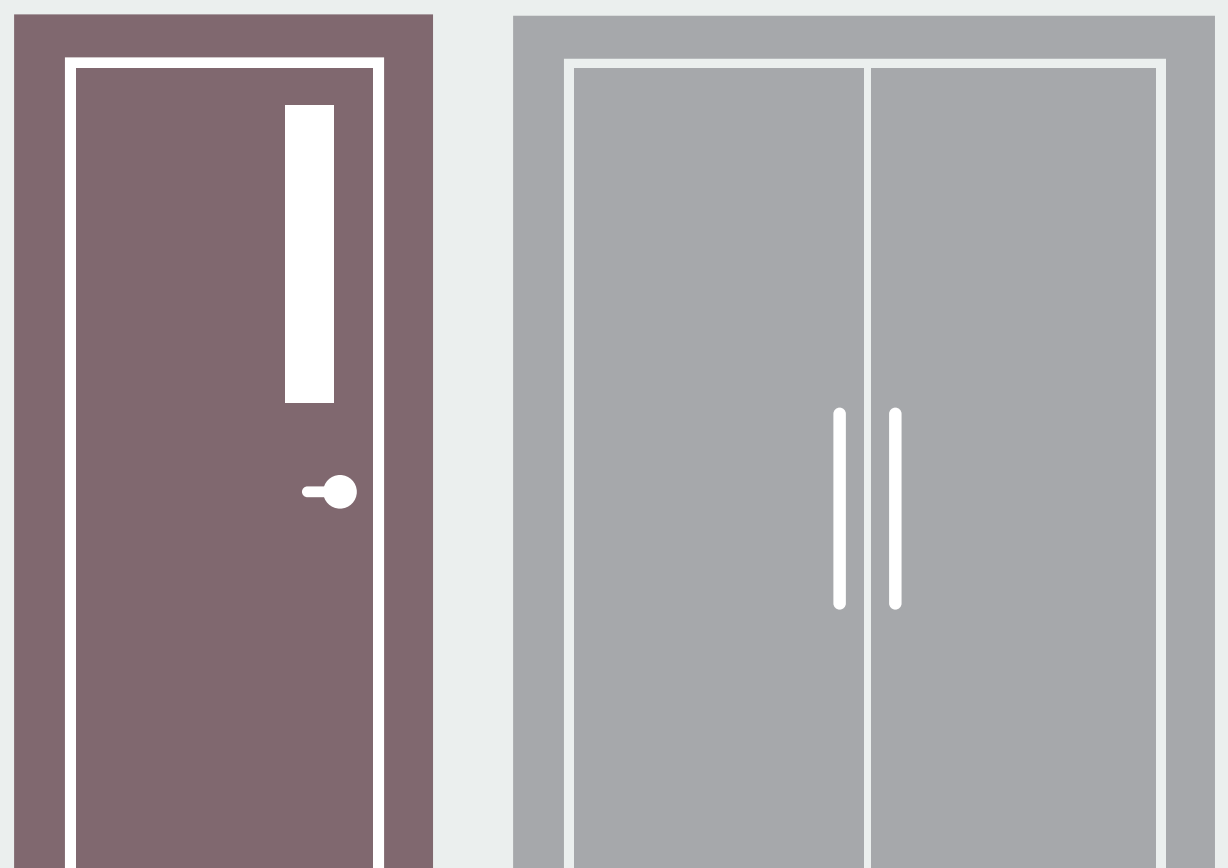

Provides enhanced performance when paired with the **Mercury 3 Thermally Broken Frame** (0.32 U-Value\*)

\* Tested U-Value per SDI-113 application of ASTM C1363, NFRC 102 and ASTM 1199 and prior test history

## Singles and Pair Sizes

Singles up to 5'0" x 10'0" and 10'0" x 10'0" pairs maximum size
