OCULUS COLORSHIFT BI LED HEADLIGHTS

**DIRECT FIT
FOR JL/GLADIATOR!**

Introducing the all-new Oculus™ Bi-LED Headlamp by ORACLE Lighting. Featuring advanced LED projection with 3,200 Lumens of high-quality illumination for enhanced driver visibility in all weather conditions. Light focus is very important for not only driver safety but others on the road who can have their vision obstructed by glare. This is especially significant on lifted Jeeps where the light is in a position to interfere with the vision of other drivers.

PURE WHITE
DAYTIME RUNNING LIGHT
