

ATTACK THE TRAIL FROM ANY ANGLE WITH REINFORCED STRENGTH

INTRODUCING THE

ALL-NEW

REALTRUCK® HALO STUBBY FRONT BUMPER

BUILT STRONGER TO TACKLE THE TRAIL

Impact zones reinforced with durable 8-gauge steel—up to 50% thicker than other bumpers—to deflect rocks, ledges, and rugged terrain.

RECOVERY-READY AND OVERBUILT WHERE IT COUNTS

The recovery system that works harder: extra pulling strength of heavy-duty 1-inch-thick recovery shackle mounts; a protective tubular grille guard shields your winch; and a die-cast aluminum hawse fairlead that won't wear down your winch line.

INTEGRATED LIGHTS FOR ANY TERRAIN

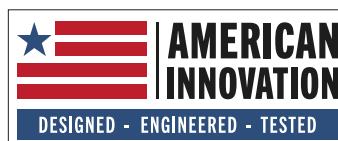

Built-in LED running lights and turn signals sync with your vehicle to boost visibility and signal clarity in rain, dust, and low-light trail conditions.

ENGINEERED TO OUTLAST THE ELEMENTS

Multi-layer protective E-coat and anti-corrosion powder coat tested for 1,000 hours in rugged conditions, and to the same durability standards as your vehicle—so it looks good longer.

BUILT CUSTOMIZABLE FOR BRIGHT LIGHTS AND BIG WINCHES

Designed for customization, including compatibility with most winches up to 13,000 lbs., and enough room for a 20-inch LED light bar and POD lights for expanded capability.
