VSee AI ROBOT

WORLD'S 1ST AUTONOMOUS TELEHEALTH AI ROBOT

A secure, mobile, AI-enabled telehealth robot that multiplies your staff impact and gives back bedside time.

Immediate Financial & Operational ROI

Optimize staff utilization • Reduce staffing costs • Increase revenue

KEY CAPABILITIES

- Remote physician rounding & consults
- Telestroke & rapid response
- Multisite specialist coverage (ED, ICU)
- Patient check-in & triage
- Medication & supply delivery

VSee AI Robot automates tasks and enables remote clinicians to navigate directly to the bedside without onsite staff assistance, enabling true virtual rounding and rapid response.

SPECIFICATIONS

- 30X optical & infrared night vision
- Advanced LiDAR navigation
- Surgical-grade display
- Programmable drawers
- Secure patient identification

VSee AI WORKFLOW ENGINE

POWER 100+ CLINICAL AI CAPABILITIES

Turn AI Into Care

- AI Copilot - scheduling, coding, clinical decision making
- Pre-Consult AI Intake
- No-Show Prediction - schedule → risk flag
- Early Warning System - vitals → deterioration alert
- Stroke CT Hemorrhage Alert → urgent notification

PLUG AI DIRECTLY INTO CLINICAL WORKFLOWS

- Activate across departments: imaging, scheduling, consults, remote monitoring
- Test new AI tools without rebuilding workflows
- Govern centrally
- No 12-month integration cycles

AN AI CONNECTION LAYER THAT HANDLES:

- Secure EHR, imaging, device, video integration
- Event detection (visit scheduled, CT uploaded, vitals change)
- AI output delivery into dashboards, alerts, notes, billing
- Audit, compliance, governance

Deploy fast. Scale securely. Activate Everywhere.

Our secure AI activation layer is designed to support hundreds of AI modules — so hospitals can trial, deploy, and scale AI tools without traditional IT complexity.

For health systems: faster ROI and better outcomes.
For AI partners: enterprise-ready distribution.
