First Class Air™

Maximizing Uptime

Specialized integrated companies delivering aviation aftermarket solutions across the global aircraft lifecycle.

The First Class Way.

Distribution

5M+ parts in inventory for freighter, commercial, and military aircraft

Hard-to-find rotables

MRO & DER Repair

Experts in Cargo Systems, Escape Slides & Rafts, Flight Surfaces, Nacelles, and Structures

Proprietary FAA approved DER repairs

Manufacturing

PMA parts and reverse engineering manufacturing to reduce MRO costs and lead times

FAA PMA-approved component manufacturing

Teardowns

AFRA certified on-site and in-house aircraft teardowns

Teardown management from nose-to-tail

Maximize your aircraft asset value

Exchange Programs

Flexible exchange and loan programs of ready-to-install rotables to minimize downtime

A New Standard In Aviation Aftermarket Solutions

First Class Air brings together a family of specialized aviation companies to support cargo, commercial and regional airlines, military fleets, and business aviation operators.

Specialized Companies

Each First Class Air company focuses on specific aviation capabilities, delivering deep technical expertise while operating as a part of our integrated platform.

Integrated Aftermarket Capabilities

Together we deliver a full range of aviation aftermarket services, including parts distribution and MRO services, specializing in DER, PMA, aircraft teardowns, exchange programs, and supply chain support.

Unified Customer Experience

Customers gain access to a coordinated network of aviation expertise, inventory, and engineering capabilities delivered through a single integrated platform.

The FIRST CLASS Way™

Every First Class Air company operates with a shared commitment to responsiveness, technical expertise, and exceptional customer support. Together, we help aviation operators:

- Reduce aircraft downtime
- Lower maintenance costs
- Extend component lifecycle
- Improve supply chain efficiency

Specialized Companies. Integrated Capabilities.

Cargo Repair™

Cargo Systems MRO

FAA Part 145, EASA and CAA-certified MRO specializing in cargo loading system repair, overhaul, and engineering support for global cargo aircraft fleets.

- Cargo loading systems
- DER development programs
- Component repair and hold programs
- Cargo system troubleshooting support

First Class Air Support™

Global Parts Distribution & Supply Chain Solutions

One of the aviation industry's largest distributors of aftermarket aircraft and cargo system components with more than 5 million parts in inventory.

- Aircraft and cargo system component distribution
- Exclusive distributor of PMA products
- Exchange, loan, and consignment programs
- Aircraft teardown and end-of-life disassembly
- Strategic sourcing of hard-to-find components

Cobalt Aero Services™

Nacelle & Flight Surfaces MRO

FAA, EASA, CAAC and AS9110C certified MRO services for nacelles, thrust reversers, flight control surfaces, and complex aircraft structural components for narrow and wide-body aircraft.

- Nacelle, thrust reverser, and flight control surfaces
- Structural composite and metallic
- Cowlings, ducts, exhaust, and doors
- DER engineering support
- On-wing structural services
- Global response team

Innodyne Systems™

Airframe & Electrical Component MRO

FAA & EASA certified MRO services for nacelles, thrust reversers, flight control surfaces, complex aircraft structural and electrical components for regional and executive aircraft.

- Nacelle, thrust reverser, and flight control surfaces
- Cowlings, ducts, exhaust, and doors
- Structural composite and metallic
- Electrical and electronic components
- DER engineering support

Survival Products™

Emergency Safety Equipment

AS 9100 D / ISO 9001 certified manufacturer and FAA and EASA certified MRO for aviation survival equipment including life rafts, life vests, emergency evacuation slides, and inflatable safety systems used across cargo, commercial, corporate, general aviation and military aircraft fleets.

- FAA TSO-certified survival equipment manufacturing
- Evacuation slide and inflatable system repair
- DER & PMA inflatable replacement programs
- PMA components for evacuation systems including 737 inflatables, cylinders, girt assemblies and portability studs

Global Reach. Local Expertise.

First Class Air supports customers across the globe through strategically located facilities in North America, Europe, and the Middle East. Our global footprint enables responsive support while delivering specialized capabilities close to operators and maintenance organizations.
