

The all-new **Golf**

Beautifully dynamic

The all-new Golf features a clean design with narrow LED headlights and a leaner front grille. The imposing bumper gives the Golf a stronger presence on the road, as it sits lower to the ground for more responsive performance.

Make yourself at home

Feast your eyes on the all-new digital cockpit - a perfect example of Volkswagen's signature ergonomic & functional interior design.

As you ease into the adjustable driver's seat, you'll notice there are far fewer buttons to navigate on the dashboard, allowing you to focus on what really matters.

Create the perfect mood

Enhance the character of your Golf by illuminating the interior with 10 soft lighting colours.

With the R-Line, you can even choose from 30 different colour options.

All-round good choices

Our wheel range has been designed to coordinate perfectly with your chosen model.

Ventura 17" alloy wheels compliment the Golf, whilst the R-Line sports Bergamo" 18 alloy wheels.

Meet your new bodyguard

The Golf puts new technology on the road with the push of a button. Travel Assist provides driving comfort* of the highest quality by supporting you in monotonous or tiring driving situations.

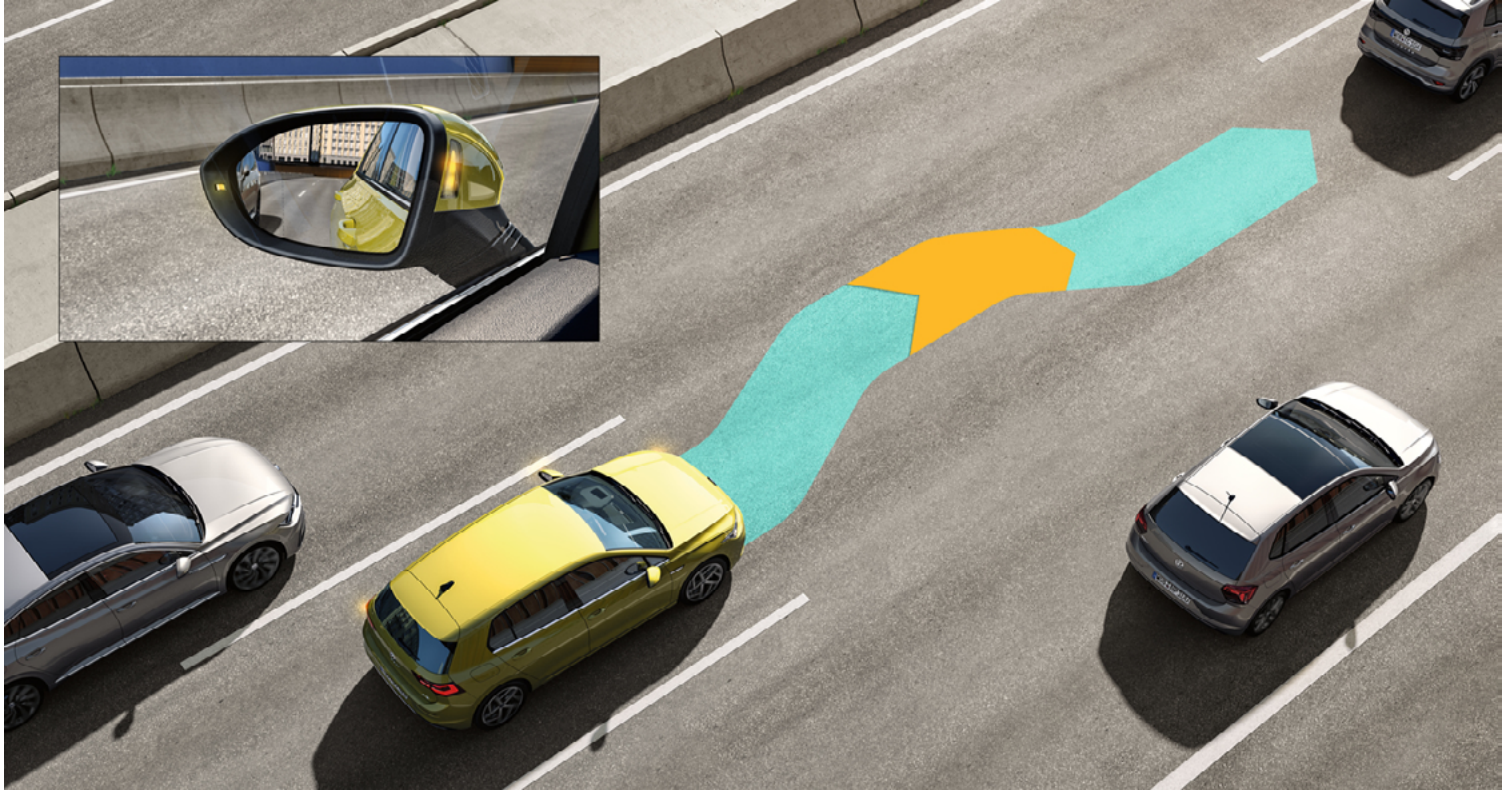

Especially on the motorway and on well-maintained roads, your new Golf can help keep you in-lane, maintain your speed and even monitor the distance from the traffic in front.

Standard on Golf TSI R-Line

* Within the limits of the system. The driver must be ready at all times to override the assist system and is not relieved of his responsibility to drive the car carefully.

We've got your back and your front

Side Assist (Blind Spot Monitor) uses an LED signal on your exterior mirrors to warn you if there's a vehicle you might not be able to see. Helping to keep you and your family safe on the road.

Front Assist (Autonomous Emergency braking assistant with Pedestrian & Cyclist Monitoring) can help reduce the severity of an accident or, ideally avoid the accident in the event of a collision threat. It can detect pedestrians and vehicles on the road and warn the driver in time. If the driver does not react the system can initiate emergency braking.*

* Within the limits of the system. The driver must be ready at all times to override the assist system and is not relieved of his responsibility to drive the car carefully.

Charging on the go

Compatible smartphones (Qi-enabled) can be charged without the use of any cables. On the R-Line, this also pairs with Wireless App-Connect (Android Auto and Apple Carplay).

Keeping your eyes on the road

The main advantage of the head-up display in your Golf is that you can keep your eyes on the most important information while watching the road ahead.

The windscreen is used as the projection surface for both the speed, driver assistance notifications and navigation instructions.

*Standard on Golf TSI R-Line

Tailored entirely to you

The Golf will be the envy of all your friends with the all-new digital cockpit. The Active Info Display 'Pro' (10.25" configurable driver display) is standard across the entire Golf range and brings an expanded range of innovative technology and state-of-the-art connectivity.

Bigger isn't **always better**

A significantly smaller gear knob comes as a result of adopting a new shift-by-wire system. This space-saving feature frees up room in the interior by introducing an electronic connection between the gear lever and the transmission.
