

The new  
**T-Roc**

Volkswagen

---

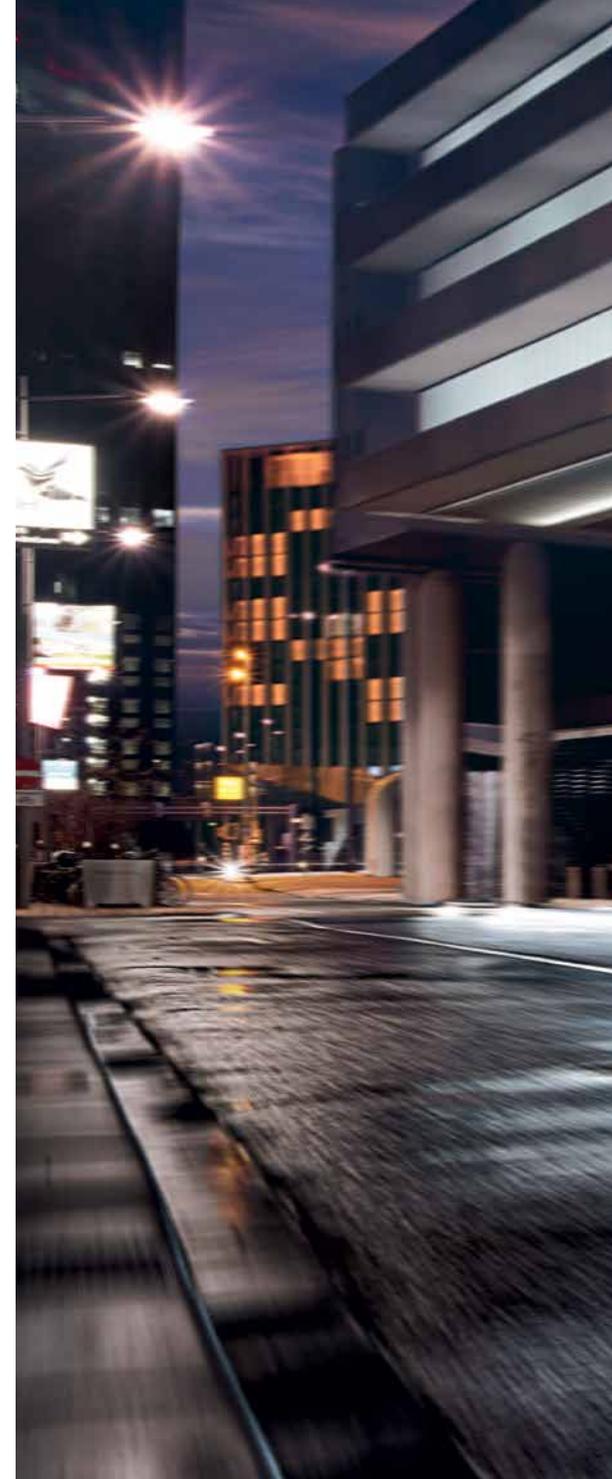

# Strong impression and expression.

Strong, striking and sporty, the T-Roc exudes character and confidence. The R-Line package combines a number of sporty exterior touches such as the 19 inch 'Suzuka' alloy wheels, signature LED daytime running lights, with silver anodised roof rails and rear spoiler.

Available in the R-line trim, you can combine a choice of different exterior colours, some with black roofs and black contrasting exterior mirrors to perfectly reflect your personality.

**01** Dynamically designed **rear tail lights** are wide and distinctive, giving real road presence. The LED darkened rear light clusters enhance the sporty, modern design, while maximising visibility day or night.

---

# Convinces. Right from the start.

Do you appreciate good design and individuality? The self-confident T-Roc stands out from the crowd with its expressive design and powerful turbocharged petrol engine delivering 140kW with 320Nm torque. The powerful engine is coupled with a 7-speed dual clutch gearbox (DSG) and 4MOTION drivetrain.

The T-Roc features 4MOTION Active Control which allows you to adapt your T-Roc to suit the weather and road conditions by choosing special all-wheel drive modes.

---

# Self-confidence comes from within.

Volkswagen

Robust, modern and elegant, the interior of the T-Roc embraces the future, with an all-new design combined with Volkswagen's characteristic build quality. Inside a luxurious interior, with front sports seats and aesthetic detail, creating the look and feel of a real sports performer. Unprecedented levels of functionality and technology, enhanced by ergonomic attention to detail, places it in a league of its own.

**02** The front **sports seats** are ergonomically designed for both comfort and style. Finished in stylish 'Carbon Flag' with the 'R-Line' logo displayed on the seat backrests, not only do they look good, but also provide excellent lateral support when cornering.

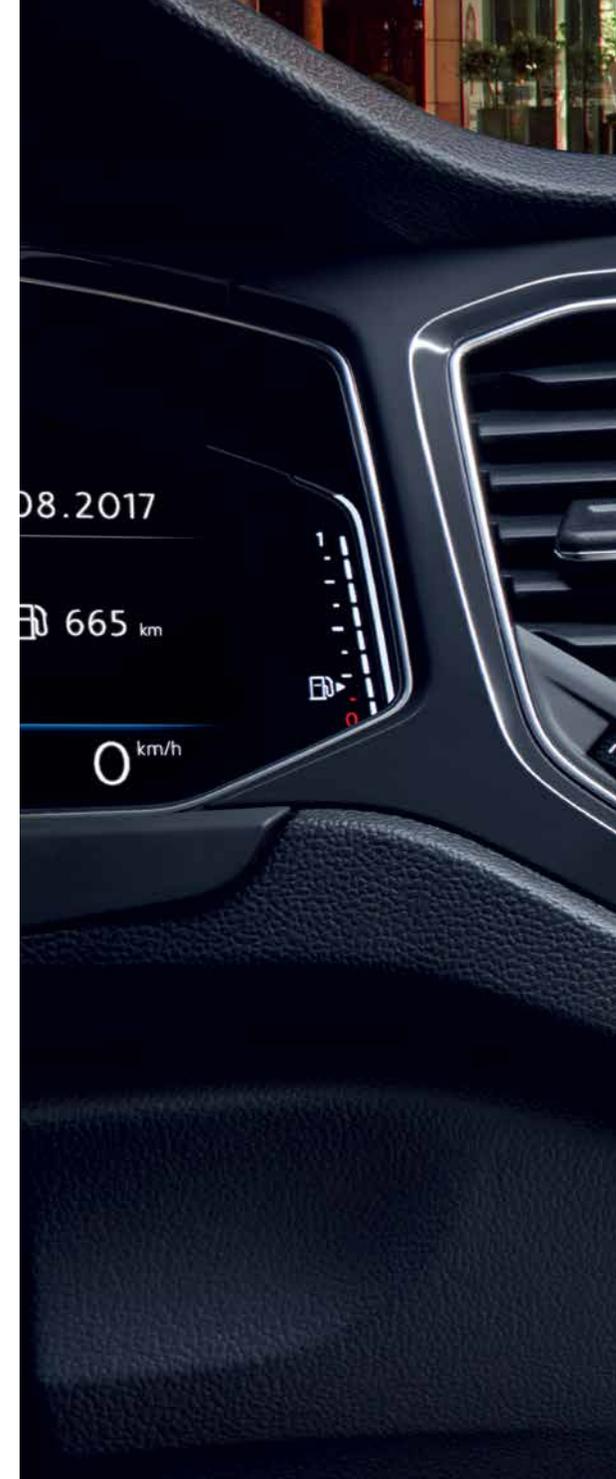

02

# Be entertained.

Enjoy all the benefits of an interactive, digital dashboard thanks to a host of standard equipment such as the 10.25 inch TFT Active Info Display and the Discover Media with 8 inch glass-covered touchscreen with navigation. A wide range of services and apps such as App-Connect and Volkswagen Media Control are available via your smartphone.

**03** The **Discover Media** 8 inch glass-covered touchscreen navigation builds upon the impressive Composition Media infotainment system, but with additional features enabling you to easily manage not only your music, but also navigation data and a broad range of vehicle information.

# Driver's assistance systems.

Volkswagen

Take everyday obstacles in your stride: The T-Roc's driver assistance systems<sup>1)</sup> are designed to take the stress out of everyday driving and help you react to the unexpected. From perfect parking to accident avoidance, the T-Roc will help you stay cool, calm and collected.

**04** The **Front Assist** monitoring system combines Pedestrian Monitoring with City Emergency Braking, alerting you if it detects vehicles or pedestrians at the edge of the road, via acoustic and optical signals, as well as a gentle application of the brakes. The system even performs an emergency stop should the distance become critical, helping to protect other road users and possibly avert potential accidents.<sup>2)</sup>

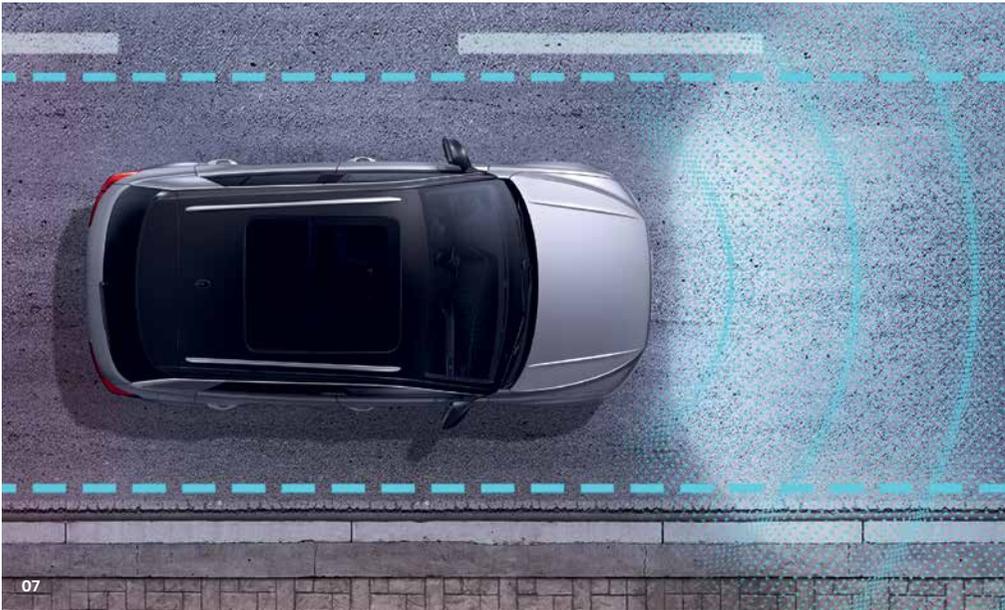

**05** **Lane Assist** is a camera-controlled warning system that alerts you if your vehicle drifts out of its lane, and even helps correct your steering to avoid an accident, making long motorway journeys safer.

<sup>1)</sup> The new T-Roc is equipped with advanced driver assistance systems. However, these systems are NOT designed for autonomous driving in any way. Therefore, the driver is strictly advised to drive the vehicle with full attention and has to keep his/her hands on the wheel at all times. <sup>2)</sup> Overseas model shown.

Volkswagen

**06** The **Blind spot sensor** can alert you to vehicles in your blind spot (within the system's limits) so that you don't change lanes. When you're reversing out of a parking space, the **Rear Traffic Alert** monitors the areas behind and to the side of your vehicle and warns you if there is traffic crossing your path.

**07** The **Adaptive Cruise Control (ACC)**, can help you to maintain a set maximum speed and a minimum distance to the vehicle in front.

**08** In a medical emergency or in the event of the drivers inactivity, **Emergency Assist** automatically controls some functions of the new T-Roc with the aim of avoiding accidents or minimising their consequences.

**09** To help you get through stop-and-go traffic easily, **Traffic Jam Assist** uses proven functions like Adaptive Cruise Control and Lane Assist to allow easy, slow driving in traffic jams. The car will follow the vehicle ahead at a speed of 0-60 km/h and automatically operate the accelerator and brakes within system limits.
