

*****WARNING*****

This AX15, model #52108118AB, is shipped DRY; it does not have oil in it. You will need to purchase either 4 quarts of Chrysler oil p/n 68218930AB from your local Chrysler dealership, or purchase Advance Adapters p/n 29-2341 Red Line MTL and add to this transmission. (Red Line MTL is a 75W80 GL-4 gear oil that is the suitable replacement for Chrysler's synthetic SAE 10W/30 oil viscosity)

Locate the fill plug on the left side of the transmission. As outlined by a service manual, fill the transmission level to the bottom edge of the fill plug hole (about 3 ¼ quarts) and no less than ¼” below this level.

Failure to comply with any of these steps will void the warranty of your transmission.

WARRANTY: Advance Adapters warranties all the products sold and distributed by our company without exception, even those used in competition-type vehicles. Warranty is limited to repair or replacement. Advance Adapters *does not offer* any type of labor allowance, and all warranty claims are subject to inspection by Advance Adapters. We have different warranties on the several products that we manufacture and they are as follows:

AX15:

These products have a warranty good for ninety (90) days from the date of shipping. These products will be free from defects in material and workmanship under customary and normal installation, use, and service.
