

Keybase User Guide

We are using Keybase as an open source and very secure platform for asking questions of Desda during your class.

The Keybase App is available for use on your phone and/or computer.

1. Choose to have it on your phone or computer

Choose your preferred way of accessing this online conversation: on your Smartphone or your Computer

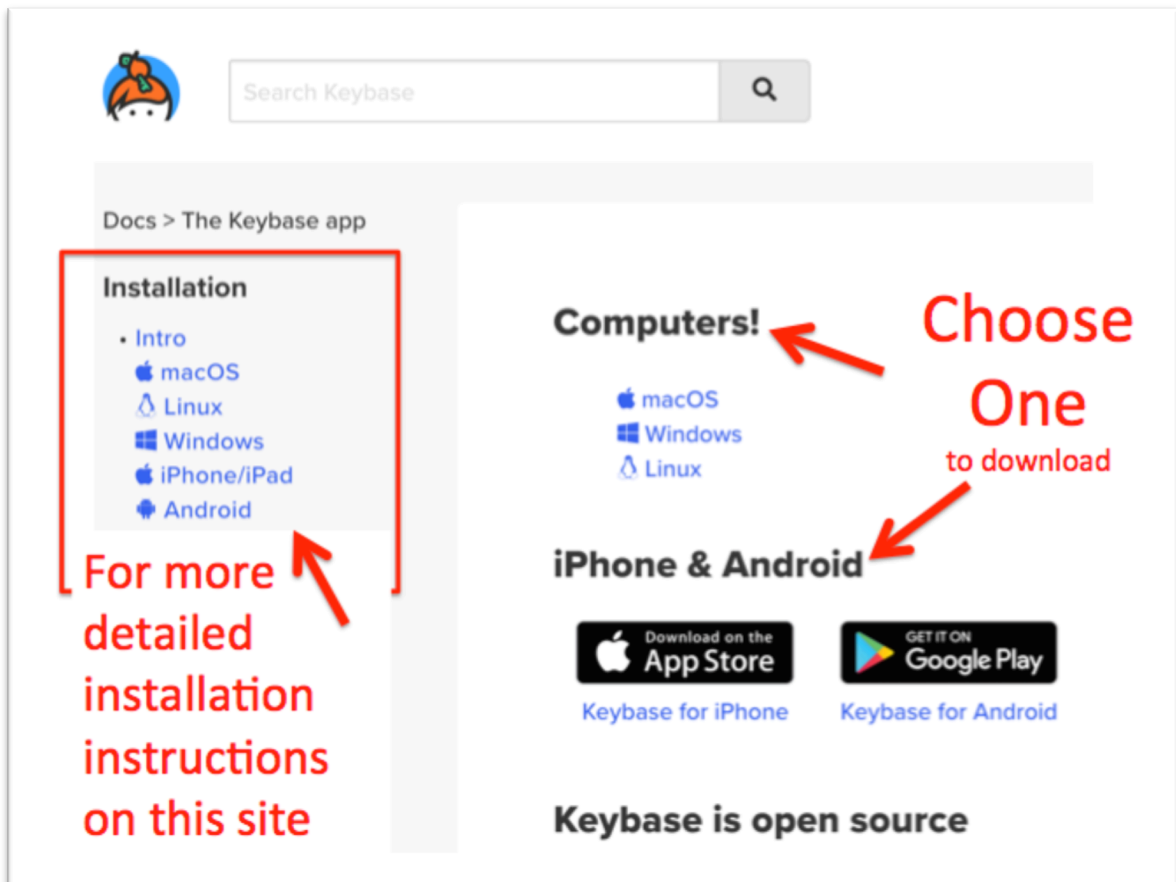

2. Download the App

You can download it to your device from this website:

Copy this link or type into your phone or computer browser

<https://keybase.io/download>

Click the link (see Choose One to download) for your type of phone or computer OS.

The screenshot shows the Keybase website's download page. At the top left is the Keybase logo and a search bar labeled "Search Keybase". Below the search bar is a breadcrumb trail: "Docs > The Keybase app". On the left side, there is a sidebar menu titled "Installation" which is highlighted with a red box. The menu items are: "Intro", "macOS", "Linux", "Windows", "iPhone/iPad", and "Android". A red arrow points from the text "For more detailed installation instructions on this site" to the "Installation" menu. On the right side of the page, there are two main sections: "Computers!" and "iPhone & Android". The "Computers!" section lists "macOS", "Windows", and "Linux" with their respective icons. The "iPhone & Android" section features two buttons: "Download on the App Store" and "GET IT ON Google Play". A large red text overlay "Choose One to download" is positioned between the two sections, with two red arrows pointing to the "Computers!" and "iPhone & Android" headings. At the bottom of the page, it says "Keybase is open source".

3. Receive verification code

Verification code number will be texted to your phone or email, depending upon which you designated: your phone or computer.

4. Create a Recognizable Username:

Before establishing your account, think about a username that will help other class members and Desda recognize you. You may use **only lower case letters** and numbers and have **no spaces** within that name.

5. Add Your Picture (if desired)

6. Click to Access the Chat

At the bottom of your phone's screen click/touch this icon (circled in red)

When it is white (shown below) you are in the Chat for Teams where you can see the class chat

**Also use this icon:
when you want to open and start
or return to the class chat for our "Team"**

7. From "Chat view" select Join a Team option

8. Type in search for your class name

medbag2022

9. Select JOIN option and type in *medbag2022*

Join a team

medbag2022

Examples: keybasefriends, stellar.public, etc.

Continue

10. Click Chat Icon to see and participate in the class conversation!

For more information you can read the Keybase book:
