

# The Order of the HEMF Suite

The Suite can be done in almost any order as long as you do the HEMF Rebuild first or first check in to see if it is needed before proceeding. If you do all these pieces in this order the is The HEMF Suite- If you are just doing one or two of these, it is not The Suite but the pieces are instead just that, a piece that supports the larger session.

When approaching the entire Suite as a whole you can wait to IBWSIB until the very end of it. This is not a requirement but instead an option to save time. Ordinarily, doing this is not advised.

Moving in a flow from the HEMF Rebuild right into Strengthening the HEMF Containing Membrane and then into teaching Golden Rain and Power Pak leads to a natural pause as you assist the client in Severing Entanglements. Reconnecting the Silver Tethers is an easy fit for the next step and as you support the release of Emotional Signatures from the HEMF, the Massage is a wonderful help in integrating the substantial shift the Emotional Signatures represent. Finally ending the Suite with the HEMF Charge gives you an amazing way to empower the client and to engage the HEMF consciously. Doing the Ending Protocol here is a powerful statement helping establish ownership of the shift represented by the HEMF Suite.

As an adjunct helping them Seal Tech in the shape of their phone, tablet, or computer (whatever they have with them) gives them an extra treat that is fun and helpful. Do not teach Sealing Tech to clients. Do it for them.

This is the recommended order for do The HEMF Suite:

1. HEMF Rebuild
2. Strengthening the HEMF Containing Membrane
3. Golden Rain & Power Pak
4. Severing Entanglements
5. Reconnecting the Silver Tethers
6. Releasing HEMF Emotional Signatures
7. HEMF Massage
8. HEMF Charge
