Removing A Death Weapon

What?

Death weapons are the echo or residue left in the Template as memory and are lodged in related parts of the structure. These etheric imprints are of the weapon that was used to purposefully kill the client in a past life. Sometimes simple death weapons appear in the course of clearing or other more basic work and may pop up and out of the structure without any additional effort.

Why?

All death weapons resemble light versions of what the weapon looked like at the time of death. Guns and cannons, bombs and other large delivery systems will not usually lodge in the Human Energy Structure but the bullets and exploded casings of bombs, cannon balls, grenades and other explosives will. You might see a handgun, rifle or a machine gun if it was used to club the person to death. Hatchets, spears, knives, bullets, clubs and cannon balls may lodge in the structure and continue to cause varying levels of distress. The memory of the Death Weapon is attached to the HES as a memorial wound. Held in the Template they do not stop growth and development and remain virtually unnoticed until they are “up” for removal. But when they are ready to let go the value of release can be relevant to the health of the physical body as when a Death Weapon comes “up” it may cause physical pain.

How?

Death Weapons are dispatched in a straightforward physical removal. The area in the structure (including the physical body) suffering from the presence of a death weapon will feel dense and heavy. The physical body may actually hurt.

You will be able to feel the contours of the weapon as it is coming up to release. Your job will be to assist the client in releasing the weapon with no trauma and in fact experiencing relief from symptoms.

What If It Is Karmic?

It does not always, but if Karma exists between the person inflicting the death and the person dying, the weapon will be Karmic in nature and attached to another piece of work. In this case, you may “sense” a Death Weapon.

A simple Death Weapon will not come up for removal unless it furthers the current life path. Death Weapons will come up for release with debris clearings and occasionally with procedures. Sometimes people will have Karma with a culture or an organization like their platoon, tribe, an army, a valiant cause, or a country and their government in relation to the weapon of death.

Karma might be addressed in a Karmic Wound or other Karmic pieces in an SAEM Session and in that situation often the Karmic impact will reveal or release an associated weapon. If the Death Weapon is Karmic it will have other associated work and will be removed at the time of the larger removal of a wound or other issue. Pay attention when doing a Karmic Wound and check to see if there is an *Associated Death Weapon*.
