

Sacred Anatomy Energy Medicine

Refreshing the Subtle Light Matrix

An Update of a old procedure

Subtle Light Matrix pours into the four Template vents, which go down the core sheath of the BES directly into the star point. It is also funneled into the star point and BOL through the umbilicus that rests atop the anterior channel and connects with the continues to the star point that carries *SLM* to the Template heart connection tat the core sheath. The umbilicus moves both forward and backward and is the way *SLM* is replenished and ultimately blended into the e-stomach and then into the soul layer. This personalized and charged amniotic-like energy will become the subtle life within both the material and the subtle parts of the one body.

The *SLM* exists between lifetimes in the structure in a slightly different form. It stores some remembered information like serious trauma and injury from previous lifetimes similar to the Template but its main internal support function is devoted to congealing light into form, creating a skeletal structure and support system. Because it experiences and stores trauma and injury, the *SLM* needs to be periodically refreshed and cleansed. It can also hold on to Karmic signatures and Loaded Karmic Signatures deep within the matrix causing it to misread data or bring distorted information into physical experience.

When someone needs the *SLM* refreshed and released they are either suffering from what appears to be a sort of energy malaise or flat out injury to the bio layer such as a broken bone or cut, a sprain or torn muscle or tendon. The client will feel depressed or down and will possibly be suffering from exhaustion. They will ache and pain will result from injury. This can also be caused because the bio layer may be undergoing an illness or chronic condition that is difficult to diagnose and treat. When it occurs the pulse will look lackluster. The percentage of effectiveness will

be above 75% and yet raise no higher and the structure will not require other types of clearings. *Refreshing and Replenishing the SLM* is a Centerpiece that looks like a Replenishing piece for a mid-level treatment. It could also serve as a Replenishing piece for a more advanced treatment.

The *Subtle Light Matrix (SLM)* is a weave made of eight powerful energies. Resolution of this imbalance requires bringing in one or more of these specific super energies through the super villi and receptor sites. Held Karmic issues will release from the *SLM* only when completely balanced and strong. When this happens the Karmic signature stored in the matrix will simply release. Witnessing is all that is required when interacting with this sophisticated component of the sacred anatomy.

These are the energies:

Universal Love and Light, Sanctuary, Witness, Harmonizing the Layers, Golden Light of Wisdom, Red Light of Purpose, Stabilization and Organ Vitality (non-specific)

Sacred Anatomy Energy Medicine

Refreshing and Releasing the *SLM*

1. Apply the Edge Practice and with Permission determine need by dowsing the *SLM value*.
2. It should be at 100%. If it reads less than that, the SLM is depleted and tired, dirty or holding a Karmic or Loaded Karmic Signature. The same treatment is used for all. Signatures will simply release out of the *SLM* as it returns to balance. It is not important to identify or process the signature. But knowing it is Karmic may explain why you feel so tired!

3. Determine which of the 8 *Super Energies* are required.
 - a. *Universal Love and Light*,
 - b. *Sanctuary*,
 - c. *Witness*,
 - d. *Harmonizing the Layers*,
 - e. *Golden Light of Wisdom*,
 - f. *Red Light of Purpose*,
 - g. *Stabilization*
 - h. *Organ Vitality (non-specific)*

4. Bring in needed energies until the *SLM* value reads: 100%

5. Monitor any Karmic or Loaded Karmic Signatures that want to release as they will do so now at 100% *SLM* value.(they won't be able to hold on at this point)

6. Bring in *Harmonizing the BOL*, and *Harmonizing the Layers*.

7. *IBWSIB*
