

The Advanced HEMF Suite

The Advanced HEMF Suite can be done in almost any order as long as you do the HEMF Rebuild first or first check in to see if it is needed before proceeding. If you do a majority of these pieces it is The HEMF Suite- If you are just doing one or two of these pieces such as the **HEMF Rebuild** and **Strengthening the Containing Membrane**, it is not **The Suite** but the pieces are instead just that, a piece or two that support the experience of your larger session.

When approaching the entire **HEMF Suite** as a whole you can postpone the IBWSIB until the very end. This is not a requirement but instead, an option to condense the value of the pieces making them essentially one whole piece standing alone. This is not a requirement at all and if you are more comfortable doing each piece as written, please do so. Ordinarily, we do not wait to do IBWSIB and it is not yet advised in other systems or with other Suites.

Moving in a flow from the **HEMF Rebuild** right into **Strengthening the HEMF Containing Membrane** and then into teaching **Golden Rain/Power Pak** leads to a natural pause as you assist the client in **Severing Entanglements**. Next step in really reclaiming the functionality and health of the HEMF is done with **Restoring the Light Body** and or **Clearing and Balancing the Light Body**. **Reshaping the HEMF** will move you into **Reconnecting the Silver Tethers** making it an easy fit for the next step and as you support the release of **Emotional Signatures from the HEMF** you prepare the client to attack the **Hidden Agenda** that is rising up out of this release in the HEMF. Following this with the **HEMF Massage** is a wonderful help in integrating the substantial shift the combination of the Emotional Signatures and the Hidden Agendas represent. Now the subtle structure is ready to approach **Mending the**

Fabric of the Soul a deeply held piece that does not need to be repeated over and over. It is the kind of piece that is a culmination of a lot of restoration and release. Finally, end the Suite with a replenishing **HEMF Charge**. This gives you an amazing way to empower the client and to engage the HEMF consciously. Doing the **Ending Protocol** here is a powerful statement that will help to establish ownership of the massive shift engendered by the **HEMF Suite**.

As an adjunct to EMF sensitive clients, help them **Seal Tech** in the shape of their phone, tablet, or computer (whatever they have with them). This offering gives them an extra treat that is fun and helpful. I suggest you do not teach Sealing Tech to clients as they do not have the Edge Practice yet. Do it for them instead.

Because the **HEMF Suite** does not have to contain all of the pieces listed the HEMF pieces can be arranged in different combinations that are all valid. The consistent thing is that they are HEMF focused and that the Harmonizing the HEMF and IBWSIB can be done at the conclusion of all the HEMF pieces instead of one at a time throughout. If you chose to do the IBWSIB after each piece that is your option, or if you choose to bring it in after one or two pieces but not all of them you can do that also. The key is that they are done together for a collaborative shift that builds out of each piece.

To know which combination to use, which of the examples listed, simply dowse for how many pieces in the **HEMF Suite** then dowse which should be included. Be careful that you do not put the cart before the horse doing something like the **Hidden Agenda** before **HEMF Rebuild** or **HEMF Charge** before a **Rebuild** and **Reattaching the Silver Tethers**. Content defines the Suite and to a large degree it is how that content works together that make the difference.

Order Options recommended for **The Advanced HEMF Suite:**

EVEN DOZEN

1. HEMF Rebuild or HEMF Clearing (as needed)
2. Strengthening the HEMF Containing Membrane
3. Golden Rain & Power Pak
4. Severing Entanglements
