Basic Clearing of the Bones of Light

Clearing the Bones of Light is not done with new clients. It must be preceded by the Clearing of the Elimination System. These two systems work together to release the most deeply held debris of the structure. Determine readiness by dowsing.

1. Receive permission at the edge.
2. Using Light Fingers do a deep activation of the BOL System by gently touching the grand cross at the channel on both sides of the bio layer. (One hand posterior and one anterior-)
3. Insert Light Fingers pointing toward the core sheath.
4. Witness as the channel becomes receptive. It is now stimulated to naturally release.
5. Clear through the BOL System in this order as you monitor release. (Only bring in *ULL* in underneath the release as an assist. No other energy is brought in for this clearing.)

Channel Sheath

Witnessing Chamber

Caduceus

Clear closed circuits by supporting them with the energy of the caduceus sheath- they will clear as a by-product of the caduceus clearing.

6. Determine completion by dowsing. Ask: *Is the clearing complete?*
7. Fill the Bones of Light with *ULL*.
8. Bring in *Harmonizing Blend* to replenish the channel sheath, inner edge of the soul Layer, the suspending tracks of the divine gate and the chi pool, the caduceus sheath, and the edge receptors.
9. Bring in *Harmonizing the Bones of Light*.
