

Sacred Anatomy Energy Medicine Procedure

## **Loaded Signature or a Loaded Karmic Signature**

*This removal is a procedure and not a simple Signature to be removed at the start of the session.*

### **What?**

A Loaded Signature (LS) is an energetic signature that wraps itself into a part of the anatomy and evokes emotion and story. A Loaded Signature contains more information in it than a regular Signature and is rooted in a flash point in the client's current life holding emotion and the sizzle of the age of onset.

A Loaded Signature becomes more complex if it contains a Karmic component and then becomes a Loaded Karmic Signature (LKS). If it is a Loaded Karmic Signature it will be more influenced by the time it was collected and that time will be from a past life. The relevance to this current life experience will be obvious.

Both LKS and LS are handled the same way with a few differences. Each type holds emotional charge and will lodge into a location in the structure that helps define the lesson held there for the client.

### **Why?**

Sometimes the impact of an event has far reaching consequences such as a profound accident or a dramatic change from one way of being to another such as: a person who has a stroke and can no longer form words. These events in and of themselves contain a Signature but there is a particular long-lived charge that has also resulted from where it is held and the energy contained within the Loaded Signature. You can think of this as the drama factor. When experiencing a Loaded Karmic Signature the past life impact will more dramatically affect the long life of the structure, forming and shaping the way the soul brings or does not bring its purpose forward into manifest

reality. An LKS can be the underpinning for the way a structure manifests in a given lifetime causing every thing from disease, illness, to physical deformities and personality issues. This is no little thing and releasing it can change a life.

## How?

Because these Loaded Signatures occur in manifest physical reality the event and moment of on-set have an electromagnetic charge that is still firing. They imprint the structure in a specific location and capture the emotional content and flavor of the event. After the event is past and the person has had time to heal it should dissipate but if it is deeply imprinted it will not. It is caught in the “muscle memory” of the Human Energy Structure and will continue shaping the reactions and decisions of the individual. If the person dies unresolved and still carrying the LKS as a charge it will be incorporated into the HES and may show up influencing the physical body or even the influencing the personality development in the next incarnation.

Hauntings of houses or other sites are LKS that have lodged in a location. The event, emotions and moment keep occurring over and over again like a broken record until the energy eventually dissipates over a long period of time.

I went to Greece in 1990 and we visited an ancient Phoenician city right on the ocean called Phoenix located on the less populous side of the big island of Crete. It had been virtually deserted for thousands of years and the ruins were unexcavated. We wandered around the site for hours and I kept seeing sailors fishing off of an old jetty that stuck out into the water. It wasn't until I saw an ancient Phoenician ship pull up beside the now transparent fishermen that I realized I was seeing a haunting of apparently a very special place by ancient spirits. It was so vivid I asked our hostess about it. She said it was a holy place of the dead and that the locals didn't like to go there... too many ghosts. Fascinating.

Releasing a Loaded Karmic Signature or a Loaded Signature is much like clearing a haunted house because the event no longer is looping within the client and establishing the environmental climate of that moment frozen in time. Removal can be incredibly freeing.

Sacred Anatomy Energy Medicine Procedure

## **Loaded Signature or a Loaded Karmic Signature**

1. With permission at the edge, dowse the need for removing a Loaded Signature or a Loaded Karmic Signature. The pulse will register heavier and thicker with a LKS than LS.
2. Determine the System affected by dowsing the list:
  - § Layers
  - § Template
  - § Blended Energies System
  - § Bones of Light
  - § Elimination System
  - § HEMF
  - § Harmonizing Network
3. By dowsing through the anatomy of the System (open your book to the page in the chapter that lists the System Components.) Dowse the Component List to determine the exact location of the Signature (Loaded or Loaded Karmic). Keep your book open so your client can have a visual of where it is located. Because the location will help the client understand the affect of the LS or LKS on their life more completely allowing you to partnership with the client draw out more information about it.
4. Dowse for the type of signature from the Signature List.
5. Dowse for client age at of onset of the signature. If it is a Loaded Karmic Signature time travel to date of onset of Signature.

Unlike a Karmic Wound there are no other people in the Signature. It will reflect the experience of only the client. Knowing the date of onset gives the Signature heft and may reveal something important to the client.

6. Dowse for the number of emotions lodged in the Signature.
7. Dowse the Word List for emotions contained in the Signature unless, of course, they are already clearly demonstrating in the session.
8. The Scenario: Put the information gathered together and determine the story of the Loaded Signature. Remember the most important feature is the emotional content. The anatomical location gives you info about how this has impacted the client's experience.
9. Bring the awareness of the scenario to 100% by reviewing the many ways the Loaded Signature (LS) has influenced the experience of living.
10. *For the LKS:* everything is the same except also address the soul's purpose and evolution of the individuation as it has been held back or "offended" (put off-delayed- lost focus) by this piece preventing the fulfillment of the soul's purpose- LKS is a longer arc and a deeper burden for the client. It is a lifelong influence.
11. Activate the signature in the structure by shaking and stimulating it if needed.
12. Check to be sure they are 100% aware of the meaning of the LKS or LS.
13. Ask the client to breathe in and lift the whole thing out with their help and any helpers you might need to call upon.
14. Fill the gap with *ULL*.
15. Check for immediate Imbalances as they often will hide underneath the Signature and come roaring up when it is removed.
16. Bring in *Harmonizing Energies* related to the System affected and *Harmonizing the BOL*.
17. Bring in *IBWSIB*.
