

# Connecting Chakra Wisdom & the Bio Layer

## **What?**

Like the strata of the layers are contained within the larger layer, little gateways into the bio layer exist in the different parts of the chakra anatomy of the Blended Energies System. Through places in the subtle structure where purely physical issues can be addressed, access to more intensive organic healing through the Sacred Anatomy is thought to be possible.

## **Why?**

These locations also may shed light on the root cause of disease. When a disease, disorder, misalignment, or injury is detectable as a subtle memory in a part of the chakra, the incoming pathway, alignment or dispersal valves, or the chakra stream it is said to be “held” in that location. The structure tells us by its location of the trauma or issue the part of the physical body where (BES held) issues might arise. The reverse is true. When a physical issue is present, we have an opportunity to right the problem or trauma there in the location in the portion of the BES that is indicated and therefore affected. This condition is called “associated” anatomy.

## **How?**

This association will enable the practitioner to learn by its placement where in the BES, the illness, or injury began or at least is currently being held as a subtle reflection. An injury, trauma, imbalance, or wound can be addressed in this associated location. This is also true for the anatomy of other parts of the structure such as the strata of the layers, the regions of the Template, and parts of the Harmonizing Network. The Elimination System, the HEMF, and the BOL all have their own versions of this kind of mapping of material manifestation.

This information gives you a specific entry into the structure so you can bring in specific energies to correct imbalance or dysfunction for healing benefit. Using *Source Energies* this way is *in addition* to bringing them in through the receptor site at the Edge and sending a specific energy freely throughout the subtle structure. Working in such a highly directed way allows a different sort of impact with *Source Energies* on disharmony and subtle structure distress in the structure. Whether resolving injury or treating a pathology, having access to the physical body through a subtle BES gateway gives you another approach to treatment of biologically presenting disease or distress. While at the same time giving access to an important piece of information that may hold a way to understand the whole story. BES Magic helps you discover the history of issues and at the same time provides a place to approach resolution that brings deep harmony to the individual client while respecting their unique relationship to Divine Source and the billions of energies it expresses
