

Sacred Anatomy Energy Medicine

The Collective Field

Treating Astral Deity Sepsis

What?

In times like these it is not enough to clear and heal the individual. Because there is a societal disharmony the Collective Field we all share must also be treated. This is because both subtle and electromagnetic energies radiate out from everybody's Human Energy Structure into our global-wide human energy field. Because we all share it, this Collective Field can affect the well-being of all people.

Each of these quantum energies, subtle and electromagnetic energies have different origin points within the human structure. Human electromagnetic energy begins in the electrical firings of the brain, the heart, and the electrically discharging sparks in every cell of the physical body. Human electromagnetic energy also radiates out from the subtle anatomy through the reflective-chakras and the reflective-layers. The Human Electromagnetic Field extends into the surrounding universal. Subtle energy is generated by and radiates out from the nine primordial frequencies of the Harmonizing Network. Each is created in a different resonating chamber located throughout the subtle structure. These Harmonizing Network energies act a little like the chemical systems of the physical body making connections and stimulating actions that cause internal communication inside of the energy structure and between the physical and the subtle.

For the observer these frequencies are "felt" and "heard" as tonal waves and as specific resonate harmonizing frequencies. Each one has a specialize offering to the whole that powerfully stimulates the subtle system, the Harmonizing Network. This system and its nine frequencies act to "hold the human energy structure together" and each harmonizing frequency is necessary to make up the whole individual. To understand how to work with this larger Collective Field we have to know how this energy goes out and how it impacts the world around us all.

A partial answer lies in what Rupert Sheldrake speaks of *morphic resonance* as, “a connection across time from the past to the present”. It is the way that members of a species, animals or objects take from the collective memory. Everything is energy and resonant. Each type has a unique vibratory rate that makes it resonant with other things like it. *Morphic resonance* is carried outside of the confines of the physical manifestation by everything from crystals to biological species. Sheldrake states that scientific evidence shows us: “*Morphic Fields exist around chemicals and other biological systems as organizing fields*”. The resonant properties of the nine frequencies of the Harmonizing Network are exactly that, organizing systems that hold memory and purpose while they direct the actions and behavior of the larger Human Energy Structure keeping it vibrationally compatible. This starts to answer the question of how these energies impact the larger world around us. The radiant properties of electromagnetic energies created by the physical body and harmonized frequencies produced by the Harmonizing Network push out of the structure into the surrounding universal. There, they create a Collective Field.

Why?

In the context of the Sacred Anatomy, the reflective layers and chakras of the HEMF and the resonating chambers of the Harmonizing Network work together across systems to make an individuated impact on the whole. As these frequencies emerge from the subtle structure they move into the Collective Field which holds both historic and present-day expressions of human life. Humanity shares what Jung called the *collective unconscious* or what Sheldrake calls a *morphic field*. Consciousness and form, health and wellbeing, harmony and discord are all sheltered here. The sum total of our common experience is cultivated and saved by our better angels in this subtle realm. This powerful Collective Field is generated by us across the planet and in many ways this is what defines who and what we are not just as countries but as a whole, as a species.

We can connect with the Collective Field through individual portals located directly beneath your axis chakras in the tribe strata of the HES primal layer. This matrix-like surrounding universal field I named the Human Universal Resonating Chamber in *Your Sacred Anatomy*. It is the place in the subtle structure where we can tap into our connection with all humanity experiencing in a felt-sense-manner the family of man. This is also where we can offer healing for the many ills humankind suffers. The Human Universal Resonating Chamber is also how we connect to the planet. I have always found it incredibly poetic that the part of our structure that connects us to the larger human energetic also connects us to the body of our Mother Earth.

How?

In the language of Sacred Anatomy one of the most damaging problems we currently face is the spread of a sepsis-like infection into the Collective Field caused by a powerful type of Astral Deity possession. This has happened throughout human history in different cultures. It is a powerful and coldly unsentimental contamination that is not as common as other types of less virulent Astral Deity possessions.

Some clients have repeated occurrences of Astral Deity infection. This kind of repeated Astral Deity infection happens for a lot of reasons. This is primarily because of personal karmic connections and unfinished relationships that have activated with ancient gods or goddesses. If there was some form of relationship with Set, Apollo or Isis (any god or goddess, really) in a past life, the veils of time and space can part and past Karma can be experienced contemporaneously.

Please note that this type of repeated Astral Deity possession doesn't happen to everyone and it is not ADS. It happens to people who are still Karmically "in thrall" and who are bound in some way to the long defunct Deity. It's possible to learn about the ancient myths and legends of despotic rulers who were treated like gods in their time and who were feared and worshipped. In the 20th century there were the examples of Adolph Hitler the Nazi leader who murdered six million Jews, Gypsies, intellectuals and

infirm people, Idi Amin, former president of Uganda famous for burning people to death by surrounding them with a flaming tire, and Pol Pot, the author of the bloody killing fields of Cambodia. All humanity has both feared and loved these oppressors. The consistent question we struggle with is: *why do otherwise reasonable and ethical people follow and facilitate such corrupt and evil leaders?*

There are a million behavioral reasons we could explore and some that might even shift the cultish behavior of former and current followers of such beings, but the Sacred Anatomy Energy Medicine treatment for this epidemic problem is to approach the effects of a big and infectious Astral Deity as a type of energetic sepsis in the Collective Field.

The first thing to realize is that a profound and completely ensconced Astral Deity is always charismatic and can compel to themselves devoted followers. They attract people with a compatible resonance of one of the powerful emotions they feel all the time: *hate, anger, jealousy, lust, greed and fear*. That part is easy. Their tools are always lies and manipulation. Deceit and lack of emotional attachment to their actions and behaviors are a big factor in ADS. Shirking responsibility or refusing to shoulder blame for their actions are hallmarks of the presence of the type of Astral Deity. Their clever manipulations become more and more evident as the Astral Deity gets stronger over time. The longer it is possessing the person the more magnetic and powerful they become and even though they may be foxy and cagey they do not appear to be as intelligent or as compassionate as they “used to be”. The host may become enamored of the strong pull the Astral Deity exerts on followers believing over time that it is their own personal power doing this to their devotees. This collective fantasy is supported by the followers who become more and more obsessed, fawning, and cultish over time. People infected with the sepsis will willingly sacrifice their money, time, dignity, integrity, their families, friends, and even their lives to worship or support their Astral Deity.

This type of Astral Deity will generate a small inner circle of disciples who are dedicated beyond all reason to ideas, principles and beliefs that do not even reflect their own nature. Instead they suspend their own thoughts and desires in service of the “dear leader.” They claim to have become awakened or enlightened by the influence leader has exerted in their life. These sorts of Astral Deities emit a strong radiation and others may feel strongly affected by the intense energy in their presence. The person possessed cannot help it nor can the people who are following them. They have become addicted to the energy and dependent on the toxins spreading through their world. Clients suffering from Astral Deity Sepsis (ADS) which has taken hold of them (usually in a group) and is like a tar pit, pulling down a mastodon, causing them to sink deep into the infection. Then people suffering ADS may vow to follow their leader (really the deity) until death or... Supporters with ADS will do things that appear to be insane breaking their own values and norms following their charging leader off the cliff like lemmings.

Except, the leader almost never sacrifices themselves. Never goes off the cliff. Only the disposable followers are used as tools. This is the tragedy. Beyond the families, friendships, and homes destroyed by an ADS he or she will always be save by the inner cohort and in most cases be protected from suicidal and self-destroying impulses.

A sign you are dealing with ADS is that the client can talk about little else and somehow, the conversation always comes back around to the Astral Deity and it’s host. Negative or positive- it is the intensity that defines ADS. You want to treat anyone infected with an ADS including the actual host of the Astral Deity the same way. This is because everyone infected is toxic and dangerous to the safety and health of other people.
