

NEW Sacred Anatomy

The YES! Circuit

The YES! Circuit is a thin track just inside the soul layer. Durable membranes secure it to the underside of the edge and separate it from the churning energies of the fuel tank. Poised between the base of the receptor sites where the Template villi emerge and the outer-edge of the inner most membrane of the soul layer the YES! Circuit is the second significant interaction the individuated structure has with incoming Source energies after being attracted by the Template villi and receptor sites.

The YES! Circuit is where universal Source energies are received after being captured and transported into the HES. The receptor sites call in a specific Source energy the structure wants and needs, the villi deliver the personalized invitation, attract the energy and then immediately transfer the specific energy to the YES! Circuit. The first personalization of a universal energy occurs in this innertube-like anatomy surrounded by tough membranous walls that contain dedicated tracks or circuits encircling the under-edge in an unbroken trajectory. Energies enter the YES! Circuit constantly answering the structure's unceasing need for the raw materials that are a component of the subtle fuel being created every moment.

The space these subtle energies take up is miniscule. Millions travel into and around the Circuit at the same time each in their own tiny circuits. The energies enter all over the edge through villi and receptor sites and move in all directions making continuous circuits increasing or decreasing in speed as they make their way around the tracks. This increase or decrease in speed acts to regulate the Source energy and begin adapting it to the personal use of the structure it has

been called to serve and is called *attenuation*. Universal energies are sacrosanct pure frequencies and as such will not disintegrate but will instead adapt in an effort to be in harmony with the co-creative individuation creating attenuation. Flooded with the harmonizing energy, *Harmonizing the Blended Energies System* the YES! Circuit directs the universal energies to stay in place as they encircle the under-edge and attenuate.

This Yes! Circuit is a place where extra sensory awareness is stimulated within the structure giving us a way to “feel” at the edge. It is related to each system and the BES, the Layers, the Harmonizing Network, the BOL, and the Template all interact with this anatomy. Both the Elimination System and the HEMF release through it.

It is the location of the first step in the personalization of the universal energies so that they can be used by the HES. As the YES! Circuit attenuates the frequency that the subtle universal energies must be moving at to travel down the Template strands into the e-stomach, it both decreases and increases the energies. Each tiny track dials the universal energy up, down, or holds the rate of travel steady to bring each into compatible resonance with individuated energies.

The Individuated Energies Become Available

After the individuated currents split off from the core they move dynamically and with no clear direction in the soul layer. It is as if they are bouncing off the walls of the soul layer and off each other like a million ping pong balls in a wind tunnel with wind coming from all directions at once. At first, the individuated energies will not mix or change because the intensity of the core is so pure it does not allow the currents to break down. This makes them unusable. This is where the

universal Source frequencies support the development of the individuated co-creative structure as it forms.

For the Blended Energies System to mix the individuated energies with the universal energies and create the needed fuel of the structure; they must become compatible with each other so that when they eventually arrive back in the soul layer after the journey through the e-stomach the attenuated and personalized universal Source energies can be assimilated and used by the energy structure as fuel. That is only possible if the individuated currents can also be incorporated and used to temper the powerful cosmic energies of the Source.

The red, blue and yellow currents of the core would forever remain distinct and separate if it was not for the radiant influence of three specific energies.

Universal Love and Light, Harmonizing the Surrounding Universal which first occurs as a Source energy, and *Spontaneous Light*, a powerful subtle frequency that is a dull silver color and acts like a leavening for the released triple currents, temporarily puffing them up in size and distorting their shapes. These three primordial energies combine in a blend to do this job and none of them could do this work alone. This collaborative energetic action essentially makes the newly individuated currents available to influence softening their resolve and helping them learn how to be in relationship. These three Source energies combine to create a tempering bath for the individuation as it is released from the fountainhead. They act as midwives supporting the newly freed individuation and influence their very make-up by giving them a way to become useful. The individuation is now ready to mix with the Source energy but before that can happen the incoming energy must become compatible to the individuation.

The Universal Energies Attenuate

When a specific universal Source energy first begins traveling on it's part of the YES! Circuit it enters the Circuit from the base of the attracting Template villi. Next, it follows its particular tiny Circuit until it achieves the correct velocity choosing to either go faster, slower or sometimes stay exactly the same speed. This is attenuation. When attenuated the energy comes back to original mother villi, turns to face the Template hook, and quantum leaps across the YES! Circuit to the membrane at the upper edge of the soul layer. It is now facing it's goal the beginning of the strand to which it is attracted and attenuated. The energy again quantum leaps but this time to the Template hook at the beginning of the designated strand where it enters into the first neural net fiber of the Template strand. Located right at the mouth of the strand the attenuated energy begins the journey to the center of the structure by quantum leaping from one neural net fiber to the next like they are stepping stones across a stream. In this way each universal Source energy crosses the subtle structure and approximately twenty feet later enters the star point and star point conduit at the center of the Template. Strands enter the star point from every direction and although they do not move through the core, they travel easily around it to reach the star point which is anterior to the core.

Ultimately the energy arrives at the extragenic stomach where it will be initialized and personalized before being released into the soul layer to at last become fuel and happily combine with the swirling individuated strands who are bathed and ready to be in service to the Divine Creative Force.

RENEWED Sacred Anatomy Energy Medicine Procedure Inspiring the YES! Circuit

WHAT?

Issues arise when different obstacles occur throughout the journey of the incoming Source energy but the most profound obstacle is a frozen YES! Circuit. This means the universal energy is useless to the structure as it is unable to be attenuated. Eventually it will disperse and in this condition as it is un-received; there is no attachment and the energy returns to the universal unused and unfulfilled.

However, if there is an attachment to NOT RECEIVING- in other words saying: “No!” The energy cannot return to the universal and it fulfills its directive to do exactly the opposite. In other words, *Universal Love and Light* experiencing a “no” becomes *NO Universal Love and Light*, which is a totally different energy! No wonder things haven’t been working out like you expected!

WHY?

The YES! Circuit is built to say: “Yes”- to receive and appreciate the abundance of the universal creative flow. But at the same time, we humans have free will and are the only ones who can also stop our own benefit from coming to us. If we can do that, we can reverse it. Saying: *No*, to the flow of universal Source is pretty much always based in a contraction of some kind. Trauma occurs, and we contract, lose the integrity of our shape for a moment in a destabilized reaction and then quickly reconfigure in a new stability. This a natural and necessary part of the experience of living, a powerful flow of the creative force in expression. Being able to restabilize is a part of the life of the structure, a primary function of the Sacred Anatomy.

In a healthy structure, contraction is inevitably followed by a restabilizing expansion, a return to the equilibrium the structure requires to function at peak. But when the persona rejects something good for them out of a fear or anger reaction driving the personality to self-destruction, self-hatred, disgust or self-loathing say it is effectively saying “no” to a specific energy that would have given a beneficial experience and stimulated self-love it effectively freezes the YES! Circuit. The tiny circuit devoted to a particular energy goes into a contracted and shutdown state refusing the very energy that would heal and balance the personality and the spirit. When the inspiration to the fuel from this specific universal energy fails to materialize a lack of proper nutrition is the result. To compensate the frozen YES! Circuit responds by generating the exact opposite energy, one that is a “no”, that may not be beneficial but that will still seek to balance the structure and feed the strand. So instead of self-love the strand gets: no-self-love. Ouch!

When the HES is directed by the eternally patient 4 Aspects to finally address this contraction several clues will point the way to the YES! Circuit needing a jolt of Inspiration. The pulse will contract and hold to the center of the swing, giving the feeling of an inability to open up. The percentage of effectiveness will be between 25% and 30% which is quite low so it will definitely get your attention. The client will be struggling with being stuck in either a way of thinking that is old and no longer serving them or will be acting in a way that is not bringing them health and well-being doing self-destructive things or holding self-loathing beliefs. They will be aware of this trend and unhappy but feel stuck and *frozen* in their position.

HOW?

A healing requires returning the Yes! Circuit to a flowing and happy: YES!. This is done by thawing the frozen section of the circuit and releasing the trapped inspiration which will clear the “no” substitute and release the “yes!”. Attenuate the new energy and the Circuit will be back on track.

Stopped movement in the YES! Circuit is like screaming “NO!” at the universe. The collective expression of life, which has no agenda or attachment and functions to only to provide what is truly needed and being requested. A single energy is the same as the next; to the Source. But to a human being turning a “no” to a “YES!” can be life changing!

Sacred Anatomy Energy Medicine Procedure

Inspiring the YES! Circuit

1. **Assessment:** With permission at the EDGE assess for need to *Inspire the YES! Circuit* by checking the percentage, pulse and then dowsing yes or no for the procedure. You can check for astral or entity numbers but it is possible a possession may not register in Assessment.
2. **Place 3 Sticky Boxes:** There may be an astral or entity that may want to release during the procedure so place 3 Sticky Boxes around the client and put on Haz Mat Gear. The astral or entity may release at any point. You can track the need for release as it arises by checking their EPA numbers throughout the course of the procedure.
3. **Determine the NOT by Determining the Pattern:** Ask the client to share with you what strand of their life fabric is stuck in a pattern giving them exactly NOT what they want to have happen. The opposite of what they desire is happening to them. There is a pattern yes, but that isn't the important thing. They may have reactively created a pattern out of NEVER having the correct energy coming in. The idea is to help them state what is NOT happening and then state what they WANT to have happen. Check the EPA numbers now.
 - ⦿ Asking questions like: *Is there an area in your life where you always seem to get the exact opposite result of what you have worked for and tried to have happen?*
 - ⦿ You don't need a lot of story and drama although tears may fall.
 - ⦿ What you want is the exact energy that is NOT coming in by defining what IS currently coming in.
 - ⦿ If you are having difficulty nailing it down ask: *In a perfect world, were everything happened exactly as it should to*

make you happy and contented in your life what self-doubt, self-concept, self-assessment would you eliminate?

- ⦿ *Only proceed when you are sure you have the NO named and the YES focused.*
- ⦿ *Check the EPA numbers.*

4. Encapsulated Astral or Entity Release:

- a. Sometimes you will not have either an EA or an Entity. If that is the case, leave the boxes in place until the end of the procedure to be on the safe side.
- b. To determine if there is EPA, measure for EA-number or E-number once you have determined the type of release.
- c. Remove the Encapsulated Astral and/or the Entity. Using the most interior box first and then fill the 2nd one with Tier 3- ULL to release any remaining debris the entity or astral may have caused.

5. Release #1(of 3): [Do all 3 Releases to support the entire release.]

- a. Extend your light fingers into the Yes! Circuit- telegraph them into the part of the circuit that is frozen- ask for the “no” to reveal itself.
- b. Tell your light fingers: *Go to the frozen part of the Yes! Circuit that is dedicated to: _____(NO) energy of (client's name) _____.*
- c. When you find the frozen part touch it with both sets of fingers extended out to the YES! Circuit at the left and right side of the structure ask the client to speak about their NO.
- d. In this posture, witness the frozen YES! circuit and simply thank it for doing a great job being frozen.
- e. Say: *Thank you Yes! Circuit for doing the very best possible job you could do! You have done exactly what I asked you to do and you have been so good at your job. I really appreciate you.*

- f. As the YES! Circuit releases ask the client to take a deep breath and as you witness the release ask the client to take another deep breath and feel the expansion of the entire structure as it responds

6. Release #2-(of 3):

- a. Extend your light fingers into the Yes! Circuit- telegraph them into the part of the circuit that is frozen- ask for the “no” to reveal itself.
- b. Tell your light fingers: *Go to the frozen part of the Yes! Circuit that is dedicated to: _____(NO) energy of (client's name) _____.*
- c. When you find the frozen part touch it with both sets of fingers extended out to the YES! Circuit at the left and right side of the structure ask the client to speak about their NO.
- d. In this posture, witness the frozen YES! circuit and simply thank it for doing a great job being frozen.
- e. Say: *Thank you Yes! Circuit for doing the very best possible job you could do! You have done exactly what I asked you to do and you have been so good at your job. I really appreciate you.*
- f. As the YES! Circuit releases ask the client to take a deep breath and as you witness the release ask the client to take another deep breath and feel the expansion of the entire structure as it responds

7. Release #3 (of 3):

- a. Extend your light fingers into the Yes! Circuit- telegraph them into the part of the circuit that is frozen- ask for the “no” to reveal itself.
- b. Tell your light fingers: *Go to the frozen part of the Yes! Circuit that is dedicated to: _____(NO) energy of (client's name) _____.*
- c. When you find the frozen part touch it with both sets of fingers extended out to the YES! Circuit at the left and right side of the structure ask the client to speak about their NO.
- d. In this posture, witness the frozen YES! circuit and simply thank it for doing a great job being frozen.

- e. Say: *Thank you Yes! Circuit for doing the very best possible job you could do! You have done exactly what I asked you to do and you have been so good at your job. I really appreciate you.*
 - f. As the YES! Circuit releases ask the client to take a deep breath and as you witness the release ask the client to take another deep breath and feel the expansion of the entire structure as it responds
8. **Turn the NO to a YES:** Ask your client to breath and to focus on the “NO” specific energy- to make it crystal clear. Witness them again as they go into the final release. The combination of the clients breath and your focus, the repeated witnessed releases, will turn the NO into a YES and watch as the originally desired specific energy rises up to replace the old energy.
9. **Restate the Commitment:** At this point, ask the client to restate their commitment to receiving the YES energy. Ask them to repeat after you and say: *I, (state their name) accept and receive the support of the Universal Source. I allow this beautiful Source energy to fulfill my needs and life. I am willing to let in all the love and care I need to shift completely. I allow my YES! Circuit to succeed. I say YES! to: (state the exact desired result).*
10. **Feel the Inspiration:** of the YES! Circuit filling the entire structure!
11. **For good measure:**
- a. Check for EPA numbers once more.
 - i. If flat- remove the final box with your Haz Mat.
 - b. If not flat- put up 2 more boxes and do the appropriate removal.
 - i. When finished, remove the Haz Mat.
12. **Bring in:** *ULL* throughout the entire structure. Bring in: *Organ Vitality of the Yes! Circuit.* Bring in: *Rejuvenation and Source Light.*

13. **Med Bag Carriers:** Proceed to step 11. **Practitioners:** Bring in:

*Harmonizing: the BES, the Layers, the Template, the BOL, and the
Harmonizing Network.*

14. *IBWSIB*
