

## COMPLETE

The complete vitamin and mineral package your cows need in one bag.

Lactisol™ Complete is formulated to meet the nutritional requirements of cows when grazing pasture and consuming meals/silage. It contains all the calcium, salt, minerals, vitamins and antioxidants required to maintain production and health in high producing dairy cows, plus DSM's unique Hy-D® which is the form of vitamin D required for optimum uptake and utilisation.

### Dose rate

Feed Lactisol Complete at 200g/cow/day.

Ensure Lactisol Complete is mixed evenly through the feed.

### Warnings

Danger: Keep out of reach of children

### Storage Instructions

Store in a cool dry place free from dampness and rodent infestation.

### Ingredients

Vitamin A, Vitamin D3, Vitamin E, Hy-D, Biotin, Cobalt, Iodine, Copper, Zinc, Magnesium, Selenium (8mg/200g), Calcium, Sodium Chloride, Monensin, Molasses.

### Nutritional Information

Optimum adsorption of calcium and phosphorus is required for strong healthy cows – putting back what we take out.

Calcium deficiency in early lactation is one of the major factors pre-disposing cows to conditions such as ketosis, dystocia, mastitis, milk fever, retained membranes, metritis and low fertility.

Lactisol Complete contains the calcium and sodium your cows need along with the correct balance of trace minerals, vitamins and antioxidants for mineral adsorption. Used throughout lactation along with Tranzsol™ in transition it will help maintain herd health and production.

The requirements of cows change throughout lactation stages and seasons. Sollus's expert nutrition team monitor these requirements and make adjustments to the Lactisol Complete formula, meaning you don't have to worry about your cows' needs. Sollus has taken care of that for you.

Lactisol Complete contains the unique 'next generation' source of Vitamin D, Rovimix® Hy-D by DSM, which ensures optimum uptake and utilisation within the animal.

Lactisol Complete contains Rovimix Biotin, essential for the synthesis of keratin in hooves and energy uptake in the liver.

Lactisol Complete contains zinc which is present in many enzymes and proteins supporting metabolism, growth, production and reproduction. Zinc is required for protective keratins in the hoof and teat. Lactisol contains multi-stage release zinc compounds to optimise uptake and utilisation.

Lactisol Complete contains antioxidants to improve health and support the immune system.

Lactisol Complete contains magnesium, important in the adsorption of calcium from the gut and mobilisation of calcium from the skeleton. Lactisol uses rumen available magnesium for a safer, better response.

**Lactisol Complete** is for the user who wants, Lactisol, lime and salt in the one bag. Sollus also produce **Lactisol Nucleus** for those who can use their own lime and salt.

### Withholding Period

Meat: Nil, Milk: Nil

### Pack Size

25kg, 1,000kg
