AeroPower
USB Charging Device

AeroPower is a panel-mount or cabin-mount USB power product for charging any handheld electronic device such as a phone, tablet and ADS-B portable, while the aircraft is in operation. This useful accessory has two USB type A input ports, and can easily be installed to provide 2.5 amps of dedicated power per port.

Each unit is offered with a faceplate and installation kit and is backed up with a two-year warranty. The AeroPower is the lowest-priced TSO certified unit available in the market, offering the highest value.

Flexible

The installation is minimal and straightforward – drill-in cylindrical shape. It is also quite easy to install multiple units throughout the aircraft to provide convenient access to power to flight crew and passengers. When mounted, the unit is almost flush with the panel (or cabin).

Certified

TSO-C71 and DO-160G certified. Each unit is radio-shielded from NAV/COM interference ensuring the operation of flight instrumentation, GPS, audio, or other devices, is trusted.

Affordable

The AeroPower is the lowest-priced TSO'd USB charging port available in the market. All accessories are shipped with the unit and included free of charge. A two-year warranty is included to make this a worry-free purchase.

Specifications

Charging Port Type:
USB Standard-A
Two (2) ports

Input voltage range:
10-32 VDC

Current requirements:
<25 mA at 14V and 28V with
no USB connections

0.95 amps at 28V at full output
load on both ports

1.9 amps at 14V at full output
load on both ports

Use with:
2 amp breaker for 28V systems
4 amp breaker for 14V systems
Inline fuse for either system

Dimensions:
1.848" W x 1.848" H x 1.391" D
(depth includes mating connector)

Weight:
2.56 oz

Voltage output range:
5 VDC +/- 0.25V

Max current output:
2.5 amps per port

Mounting:
Rear panel mount

Certifications:
FAA TSO-C71
RTCA DO-160G
