Question: What to do if the slat frame is tilted?

Answer:
The hole on the hydraulic rod is oval. Please make sure that the installation positions on the left and right sides are the same. If you accidentally install one side of the hydraulic rod in the front and the other side in the back, the slat frame will be crooked and you will need to disassemble it and reinstall it.
Das Loch an der Hydraulikstange ist oval. Bitte stellen Sie sicher, dass die Einbaupositionen auf der linken und rechten Seite gleich sind. Wenn Sie versehentlich eine Seite der Hydraulikstange vorne und die andere Seite hinten einbauen, kann dies zu Problemen führen. Der Rahmen der Hydraulikstange ist schief und Sie müssen sie zerlegen und neu installieren.

Question: What to do if the hydraulic system fails to press down?

Answer:
When turning off the hydraulic pressure, make sure that the pressure point is at the position indicated by the arrow. Place your hand at the pressure point.
If you place the mattress on a slatted frame, it will be easier to turn off the hydraulic pressure.
Do not press only on the left side or only on the right side, as this will damage the hydraulic system.

Stellen Sie beim Abschalten des Hydraulikdrucks sicher, dass sich der Druckpunkt dort befindet, wo der Pfeil anzeigt. Legen Sie Ihre Hände auf die Druckpunkte. Wenn Sie die Matratze auf einen Lattenrost legen, lässt sich der hydraulische Druck leichter abstellen. Drücken Sie nicht nur auf die linke oder nur die rechte Seite, da dies zu Schäden am Hydrauliksystem führen kann.

If you are having trouble closing the bed frame please scan the link below which will show you how to close the bed frame properly
