Remote Control Instructions

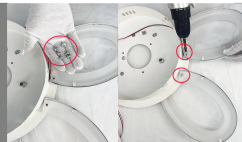

AAA Batteries not Included

Kind Tips: When the remote control fails, use the wall switch to turn on the fan light, and press and hold the "SET UP" button within 3 seconds. After the light flashes, the remote is ready to use again.

Installation Steps

Step 1: Remove the mounting plate with screwdriver. Hanging panel. Take out the inside accessories.

Step 4: Fix the upper hole and lock the screws

Step 7: Install the fan and fix it with small white plate.

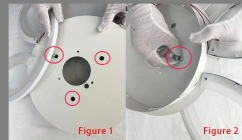

Step 2: Then remove the three nuts that lock the motor

Step 5: Install the round cover plate, fix it with nuts.

Step 8: Use self-tapping screws (expansion screws for concrete wall tops) to fix the hanging plate directly on the ceiling.

Step 3: Figure 1: Clamp the good hole position
Figure 2: Screw the petals in turn

Step 6: Remove the 3M adhesive film from the controller

Step 9: Connect the home power cord to the corresponding N/L wire, align the light with the hole in the hanging plate, and use the hanging plate screw to lock the light.
