Informative notice and instructions for use
dive mask

English

INFORMATIVE NOTICE AND INSTRUCTIONS FOR USE - DIVE MASK

This document is an integral part of the product and must be stored with it as long as it is in use.

This is Category I Personal Protective Equipment (PPE) and was designed and manufactured to protect the user's eyes from direct contact with the water, in accordance with Regulation (EU) 2016/425. The testing procedures were performed in accordance with standard EN 16805:2015, in conformity with the aforesaid Regulation, which sets out the conditions for marketing and essential safety requirements for Category I Personal Protective Equipment (PPE).

The EU Declaration of Conformity is available at: www.seacsub.com

USE: the dive mask should only be used in the water, because its sole purpose is to protect the eyes from direct contact. Before using the mask, make sure the seal is sound and that the buckles and strap work properly, and check the general condition of the product. Do not use the product if it is worn or not performing perfectly.

⚠ WARNING - Never dive into water while facing the surface to avoid strong blows against the lenses in the mask, which could break and cause injury to the user.

MAINTENANCE: if the mask fogs up, use the specific Seac product. Never use solvents, hydrocarbons, detergents, or alcohol. Never heat the lenses (with lighters, for example), because this could compromise the tempering and weaken them, thereby creating a hazard to the safety of the user while wearing the mask. After every use, rinse thoroughly with fresh water, leave to dry in the shade, and store the product out of direct sunlight and away from sources of heat.
