This working cap does not provide unlimited protection. For your own protection read the instruction carefully. When not in use, it is recommended to store this working cap in a clean and dry environment and placed away from direct sunlight and out of sources of solvents. This working cap is designed for your personal safety. It must be worn during the whole duration of exposure to any potential hazard. Leave the work area immediately if the working cap becomes damaged. To maintain your working cap in optimum conditions do not use any abrasive materials or solvents and clean any part of the working cap with warm soapy water and dry with a soft cloth. A mild disinfectant can also be used, in line with the manufactures instructions, if required. Only use original accessories and spare parts (harness made and supplied by the manufacturer). Inspect for damage regularly. If the shell or harness, working cap show any signs of damage, it must be replaced immediately. The shelf life of this product, if stored and used correctly, is indefinite. However, we would recommend it be changed every 2-3 years as necessary precaution.
