

This is a Bicycle Rechargeable Compact Light Set

Ultra-thin, powerful and designed in a very innovative and modern way. This light can fits perfectly to any MTB, trekking bike or other sportive vehicle. Most unique element of this light set is that it features the ground-breaking COB LED technology, which accounts for the design and light output.

The light suits the needs of any modern-day cyclist in several ways. First of all, it is using COB LEDS, which are the most innovative and modern LEDS in the market nowadays. Secondly, this bicycle lights feature a USB-rechargeable lithium-polymer battery. Good for the environment, since there is no need to ever replace your batteries. To recharge the battery, you simply use the micro USB cable (supplied with the light) and connect it to your laptop. Within a few hours, your battery is fully charged again. Both headlamp and rear light have a safe-switch button, which means you need to press a couple of seconds to turn the lights on and off.

- Bicycle Rechargeable Compact Light Set
- 1 pc (10 chips) COB high brightness white/red LED
- 4 lighting mode
- 4 flashing mode
- Short press to switch, double press to change the mode and long press to put off
- Water resistant: IPX4
- Battery: lithium polymer battery 3.7V/330mAh
- with Micro-USB rechargeable cable
- Charging time: Around 3 hours
- With low battery indicator
- Universal bracket with rubber band
- Weight: 84g
- Size: 70x20x17mm
- Color: White
