

Della Natura Cream with Urea 50% - 50ml

Product Information Sheet

Product Description:

Della Natura's Urea 50% cream is specifically formulated for daily foot care with exfoliating properties, designed especially for cracked heels and hardened skin on knees and elbows. Suitable for all skin types, this cream is highly effective in restoring smoothness and softness to tough, dry skin.

The 50% urea concentration acts as a keratolytic agent, meaning it softens and exfoliates the skin while reducing the formation of hard and calloused areas. Glycerin deeply moisturizes dry skin, while Shea Butter regenerates severely dry, cracked heels. Regular use ensures a long-lasting smoothing effect on the skin.

Key Ingredients:

- Urea (50%): Softens and exfoliates thickened skin.
- Glycerin: Provides long-lasting moisture.
- Shea Butter (Butyrospermum Parkii Butter): Regenerates dry, cracked skin.
- Ammonium Lactate: Contributes to exfoliation and hydration.
- Caprylic/Capric Triglyceride: A lightweight moisturizer that nourishes the skin.

Usage Instructions:

Apply the cream to clean, dry skin in areas with hardened or cracked skin. Gently massage until fully absorbed. Use as needed, at least once a day, preferably in the evening for best results.

Packaging:

50 ml

Full Ingredients List:

Aqua, Urea, Hydroxyethyl Urea, Cetearyl Alcohol, Glyceryl Stearate SE, Glycerin, Caprylic/Capric Triglyceride, Butyrospermum Parkii Butter, Ceteareth-20, Paraffinum Liquidum, Ammonium Lactate, Phenoxyethanol, Parfum, Ethylhexylglycerin, Limonene, Hexyl Cinnamal
