# **PBYR1645F**, **PBYR1645X**

## **FEATURES**

- Low forward volt drop
- Fast switching
- Reverse surge capability
- High thermal cycling performance
- Isolated mounting tab

## **SYMBOL**

## QUICK REFERENCE DATA

$$V_R = 40 \text{ V} / 45 \text{ V}$$
 $I_{F(AV)} = 16 \text{ A}$ 
 $V_F \le 0.6 \text{ V}$ 

#### **GENERAL DESCRIPTION**

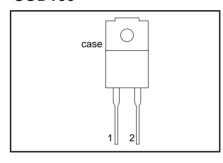

Schottky rectifier diodes in a plastic envelope with electrically isolated mounting tab. Intended for use as output rectifiers in low voltage, high frequency switched mode power supplies.

The PBYR1645F is supplied in the SOD100 package. The PBYR1645X is supplied in the SOD113 package.

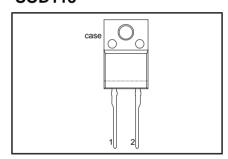

## **PINNING**

| PIN | DESCRIPTION |  |  |
|-----|-------------|--|--|
| 1   | cathode     |  |  |
| 2   | anode       |  |  |
| tab | isolated    |  |  |
|     |             |  |  |
|     |             |  |  |

#### **DEFINITIONS**

| Data sheet status         |   |  |  |  |
|---------------------------|---|--|--|--|
| Objective specification   | This data sheet contains target or goal specifications for product development.       |  |  |  |
| Preliminary specification | This data sheet contains preliminary data; supplementary data may be published later. |  |  |  |
| Product specification     | This data sheet contains final product specifications.                                |  |  |  |
| Limiting values           |   |  |  |  |

Limiting values are given in accordance with the Absolute Maximum Rating System (IEC 134). Stress above one or more of the limiting values may cause permanent damage to the device. These are stress ratings only and operation of the device at these or at any other conditions above those given in the Characteristics sections of this specification is not implied. Exposure to limiting values for extended periods may affect device reliability.

#### Application information

Where application information is given, it is advisory and does not form part of the specification.
