

Explanation on Cancelling AMASS Trademark Printing for Some Products

Dear customer,

Due to uncontrollable factors, AMS will lock onto the first batch of UAVs

The third-generation products used have undergone treatment to remove the AMS trademark (on the packaging bag product certificate label)

Retain the trademark), and suspend production of some black lock gold products (only produce yellow lock gold)

Please refer to Attachment 1 for the list of currently locked products.

1、 For products without trademarks in the following list, if samples or product recognition documents are required (regulations)

Grid books/2D drawings can be requested from the pre-sales personnel responsible for your company's business;

2. Sample confirmation period: June 10th to July 13th is the above sample confirmation period

During this period, orders with "trademark" or

Products before discontinuation;

3. Order revision period: New orders for products in "Attachment 1" will be issued after July 14th

Products without AMASS trademark;

4. Attention:

CI) Attachment I is the first batch of UAVs that have been identified for use after consulting with the majority of customers

The company does not rule out the possibility of adding material models based on actual control results for the AMS connector;

As a 23-year-old domestic brand connector manufacturer, the above measures are really helpless. We hope that

Our clients are doing well, and we wish for world peace.
